Activity, Diet and Social Practice Sarah Schrader, 2018-12-05 Day to day activities are important in the development of social identities the establishment of social standing and the communal understanding of societal rules This perspective is broadly referred to as practice theory and relates to the power of an overarching social structure and the individual actors that exist within it Practice theory has made an important contribution to anthropological and archaeological research as these fields are particularly interested in daily life and the importance of these actions This volume argues that practice theory can also be used in a bioarchaeological context through the examination of human skeletal remains and the archaeological context in which they were excavated Bioarchaeology offers a unique perspective on these day to day experiences skeletal tissue is constantly undergoing a process of change and as a living biological system it can adapt to external forces Furthermore bioarchaeological studies are multi scalar and can examine individuals groups or entire populations Using osteological indicators of activity patterns enthesal changes osteoarthritis and dietary isotopes carbon nitrogen as examples this book addresses patterns of everyday life in the ancient past Physical activities and food consumption are actions that are carried out on a daily basis While bioarchaeology does not have the ability to recreate specific day to day activities we can assess broad trends in everyday life The volume illustrates these points using examples from the Ancient Nile Valley Through the examination of over 800 Egyptian and Nubian individuals from five different archaeological sites the research addresses patterns of everyday life as they relate to social inequality agency and practice Beyond osteological indicators of activity and dietary patterns this book also discusses additional methods that can be pursued to draw attention to daily life Lastly this book also highlights the applicability of and potential contribution that practice theory can make to this area of research

Physical Anthropology Aleš Hrdlička, 1919 The Bioarchaeology of Urbanization Tracy K. Betsinger, Sharon N. DeWitte, 2020-11-05 Urbanization has long been a focus of bioarchaeological research but what is missing from the literature is an exploration of the geographic and temporal range of human biological demographic and sociocultural responses to this major shift in settlement pattern Urbanization is characterized by increased population size and density and is frequently assumed to produce negative biological effects However the relationship between urbanization and human health requires careful examination given the heterogeneity that exists within and between urban contexts Studies of contemporary urbanization have found both positive and negative outcomes which likely have parallels in past human societies This volume is unique as there is no current bioarchaeological book addressing urbanization despite various studies of urbanization having been conducted Collectively this volume provides a more holistic understanding of the relationships between urbanization and various aspects of human population health The insight gained from this volume will provide not only a better understanding of urbanization in our past but it will also have potential implications for those studying urbanization in contemporary communities

Design and Analysis of Ecological Experiments Samuel M. Scheiner,Jessica Gurevitch,2001-04-26 Ecological research and the way that ecologists use statistics continues to change rapidly This second edition of the best selling Design and Analysis of Ecological Experiments leads these trends with an update of this now standard reference book with a discussion of the latest developments in experimental ecology and statistical practice The goal of this volume is to encourage the correct use of some of the more well known statistical techniques and to make some of the less well known but potentially very useful techniques available Chapters from the first edition have been substantially revised and new chapters have been added Readers are introduced to statistical techniques that may be unfamiliar to many ecologists including power analysis logistic regression randomization tests and empirical Bayesian analysis In addition a strong foundation is laid in more established statistical techniques in ecology including exploratory data analysis spatial statistics path analysis and meta analysis Each technique is presented in the context of resolving an ecological issue Anyone from graduate students to established research ecologists will find a great deal of new practical and useful information in this current edition Rethinking the Andes-Amazonia Divide Adrian J. Pearce,David G. Beresford-Jones,Paul Heggarty,2020-10-21 Nowhere on Earth is there an ecological transformation so swift and so extreme

as between the snow line of the high Andes and the tropical rainforest of Amazonia The different disciplines that research the human past in South America have long tended to treat these two great subzones of the continent as self contained enough to be taken independently of each other Objections have repeatedly been raised however to warn against imagining too sharp a divide between the people and societies of the Andes and Amazonia when there are also clear indications of significant connections and transitions between them Rethinking the Andes Amazonia Divide brings together archaeologists linguists geneticists anthropologists ethnohistorians and historians to explore both correlations and contrasts in how the various disciplines see the relationship between the Andes and Amazonia from deepest prehistory up to the European colonial period The volume emerges from an innovative programme of conferences and symposia conceived explicitly to foster awareness discussion and co operation across the divides between disciplines Underway since 2008 this programme has already yielded major publications on the Andean past including History and Language in the Andes 2011 and Archaeology and Language in the Andes 2012
