Dulebohn, Brian Murray, Dianna L. Stone, 2022-01-01 As we enter the third decade of the twenty first century we are seeing a renaissance of context in influencing leadership leader follower relations and leader effectiveness as well as a recognition of the tripartite nature of leadership To fully understand and appreciate leadership one must see the multiple parts of it as well as the connections among them Leadership is multi dimensional leadership depends on leaders followers and context Leadership research in the past three decades has been dominated by interest in neo charismatic leadership styles and a focus on leadermember exchange in leader follower relationships Recently other

approaches to leadership such as ethical and authentic leaders have garnered greater attention in response to the moral and ethical challenges in the workplace. Additionally, established approaches to leadership emergence and development have been challenged by their relevance to diverse work forces and issues of inclusion. This twelve article volume includes an outstanding roster of established and emerging leadership authors who tackle questions of leadership at the intersections of leaders, followers, and context. The volume opens with two articles that set the stage for the current state of leadership research and paths for its future, including a commentary by Edwin Locke and Gary Latham on current management research practices and an action oriented review of leadership research from the start of the 21st century. The volume is organized around three themes: leadership and diversity, leader-follower relationships, and systems of leader-follower and context. Articles in the volume advance diversity research with an integration of leadership and diversity theories that demonstrate the former's need for re-examination in light of the latter, a systematic development of inclusive leadership theory, and a close examination of immigrant ethnic identity. The authors of several articles expand our understanding of leader-follower relationships in the context of teams and alliances, the contextual boundaries of authentic leadership theory, and the authentic leader's potential impact on harassment in organizations. The volume culminates with three demonstrations of leadership as systems of leader-follower-context interaction, including a close examination of the toxic triangle's manifestation in university scandals, a micro-process model of power and leadership, and a configurational approach to studying leadership. The volume is designed primarily for scholars in the fields of human resource management, organizational behavior, and leadership. It also well serves the needs of instructors and students in master's and doctoral courses in leadership or organizational behavior. Each article is grounded in managerial context that will appeal to practitioners in the field.

Advancing Relational Leadership Research Mary Uhl-Bien, Sonia M. Ospina, 2012-10-01 Leaders and followers live in a relational world, a world in which leadership occurs in complex webs of relationships and dynamically changing contexts. Despite this, our theories of leadership are grounded in assumptions of individuality and linear causality. If we are to advance understandings of leadership that have more relevance to the world of practice, we need to embed issues of relationality into leadership studies. This volume addresses this issue by bringing together for the first time a set of prominent scholars from different paradigmatic and disciplinary perspectives to engage in dialogue regarding how to meet the challenges of relationality in leadership research and practice. Included are cutting edge thinking, heated debate, and passionate perspectives on the issues at hand. The chapters reveal the varied and nuanced treatments of relationality that come from authors' alternative paradigmatic, entity constructionist, critical views. Dialogue

scholars reacting to the chapters engage in spirited debate regarding the commensurability or incommensurability of the paradigmatic approaches. The editors bring the dialogue together with introductory and concluding chapters that offer a framework for comparing and situating the competing assumptions and perspectives spanning the relational leadership landscape. Using paradigm interplay they unpack assumptions and lay out a roadmap for relational leadership research. A key takeaway is that advancing relational leadership research requires multiple paradigmatic perspectives and scholars who are conversant in the assumptions brought by these perspectives. The book is aimed at those who feel that much of current leadership thinking is missing the boat in today's complex relational world. It provides an essential resource for all leadership scholars and practitioners curious about the nature of research on leadership both those with much research exposure and those new to the field.
