Commercial Observation Satellites At The Leading Edge Of Global Transparency:

Commercial Observation Satellites John C. Baker, Kevin M. O'Connell, Ray A. Williamson, 2001 Featuring numerous satellite images and case studies this book brings together an impressive group of experts to assess the implications of this emerging information technology

The Perils and Promise of Global Transparency Kristin M. Lord, 2012-02-01 While the trend toward greater transparency will bring many benefits Kristin M Lord argues that predictions that it will lead inevitably to peace understanding and democracy are wrong The conventional view is of authoritarian governments losing control over information thanks to technology the media and international organizations but there is a darker side one in which some of the same forces spread hatred conflict and lies In this book Lord discusses the complex implications of growing transparency paying particular attention to the circumstances under which transparency's effects are negative Case studies of the 1994 genocide in Rwanda and the government of Singapore's successful control of information are included

Commercial Satellite Imagery and United Nations Peacekeeping Rob Huebert, 2017-05-15 This book examines the possibilities for the use of satellite imagery in support of UN peacekeeping operations and also to protect the national security of Canada Experts in the field discuss the needs of peacekeeping operations the requirements for the use of such imagery and the capabilities for providing it The organizational political and other issues which arise from the use of such imagery are also given careful consideration

Nuclear Non-proliferation and Arms Control Verification Irmgard Niemeyer, Mona Dreicer, Gotthard Stein, 2020-03-12 This book strives to take stock of current achievements and existing challenges in nuclear verification identify the available information and gaps that can act as drivers for exploring new approaches to verification strategies and technologies With the practical application of the systems concept to nuclear disarmament scenarios and other non nuclear verification fields it investigates where greater transparency and confidence could be achieved in pursuit of new national or international nonproliferation and arms reduction efforts A final discussion looks at how in the absence of formal government to government negotiations experts can take practical steps to advance the technical development of these concepts

Fundamentals of Satellite Remote Sensing Emilio Chuvieco, 2009-12-01 An extensive review of remote sensing principles with an emphasis on environmental applications Fundamentals of Satellite Remote Sensing discusses a wide range of topics from physical principles to data acquisition systems and on to visual and digital interpretation techniques The text focuses on the interpretation and analysis of remote sensing images and how they improve our understanding of environmental processes and their interaction with human activities The authors discuss new interpretation approaches including hyperspectral analysis high spatial resolution data and radiative transfer models The presentation includes an analysis of accuracy assessment methods and demonstrates how to integrate remote sensing results with geographic information systems It also covers recent missions such as Terra Aqua Envisat Ikonos Quickbird GeosEye and SPOT 5 as well as LIDAR and interferometric radar The discussion of visual criteria to extract interpretation from satellite images

emphasizes differences and similarities with conventional photo interpretation techniques A chapter on accuracy assessment and the connection between remote sensing and geographic information systems helps readers extend the interpretation of satellite images to a more operational applications oriented framework

Internationalizing Media Studies Daya Kishan Thussu, 2009-05-15 The explosion of transnational information flows made possible by new technologies and institutional changes economic political and legal has profoundly affected the study of global media At the same time the globalization of media combined with the globalization of higher education means that the research and teaching of the subject faces immediate and profound challenges not only as the subject of enquiry but also as the means by which researchers and students undertake their studies Edited by a leading scholar of global communication this collection of essays by internationally acclaimed scholars from around the world aims to stimulate a debate about the imperatives for internationalizing media studies by broadening its remit including innovative research methodologies taking account of regional and national specificities and pedagogic necessities warranted by the changing profile of students and researchers and the unprecedented growth of media in the non Western world Transnational in its perspectives Internationalizing Media Studies is a much needed guide to the internationalization of media and its study in a global context

Digital Anthropology Heather A. Horst, Daniel Miller, 2020-05-26 Anthropology has two main tasks to understand what it is to be human and to examine how humanity is manifested differently in the diversity of culture These tasks have gained new impetus from the extraordinary rise of the digital This book brings together several key anthropologists working with digital culture to demonstrate just how productive an anthropological approach to the digital has already become Through a range of case studies from Facebook to Second Life to Google Earth Digital Anthropology explores how human and digital can be defined in relation to one another from avatars and disability cultural differences in how we use social networking sites or practise religion the practical consequences of the digital for politics museums design space and development to new online world and gaming communities The book also explores the moral universe of the digital from new anxieties to open source ideals Digital Anthropology reveals how only the intense scrutiny of ethnography can overturn assumptions about the impact of digital culture and reveal its profound consequences for everyday life Combining the clarity of a textbook with an engaging style which conveys a passion for these new frontiers of enquiry this book is essential reading for students and scholars of anthropology media studies communication studies cultural studies and sociology

The Power of the Space Club Deganit Paikowsky, 2017-07-20 This book analyses the decisions of nations to develop indigenous space programs in order to become a leading world power

Visual Politics and North Korea David Shim, 2013-10-15 In the realm of international relations there are seemingly few states like North Korea Whether it is the country s human rights situation its precarious everyday life or its so called foreign policy of coercion and nuclear brinkmanship no matter what this pariah nation says and does it affects the state and stability of regional and global politics But what do we know about North Korea and how do we come to

know it This book argues that visual imagery plays a decisive role in this operation By discussing two exemplary areas everyday photography and satellite imagery the book takes into account the role of images in the way that particular issues related to North Korea are understood in contemporary geopolitics Images work They do something by evoking a particular perspective of what is shown in them allowing only specific ways of seeing and knowing In this sense images are deeply political Individual methodological usages in the book can provide a procedural basis from which to start or rethink further studies on visibility both in IR and beyond It also opens an innovative path for future studies on East Asia making the book attractive to a range of specialists and thus holding an appeal beyond the boundaries of a single discipline

Commercial Satellite Imagery Bhupendra Jasani, Gotthard Stein, 2002-06-01 This will be the first book that deals with the use of commercial satellite imagery to monitor non proliferation of nuclear weapons non intrusively from space by an international organisation The book deals with both the technical as well as policy issues related to the nuclear weapons non proliferation issues The authors discuss how an international organisation such as the International Atomic Energy Agency can use information derived from satellites to

enhance its policing task **From Pigeons to News Portals** David D. Perlmutter, John Maxwell Hamilton, 2007-11-01 Ever since the invention of the telegraph journalists have sought to remove the barriers of time and space Today we readily accept that reporters can jet quickly to a distant location and broadcast instantly from a satellite connected video enabled cell phone hanging from their belts But now that live news coverage is possible from virtually anywhere is foreign correspondence better And what are the implications of recent changes in journalistic technology for policy makers and their constituents In *From Pigeons to News Portals* edited by David D Perlmutter and John Maxwell Hamilton scholars and journalists survey probe and demystify the new foreign correspondence that has emerged from rapidly changing media technology These distinguished authors challenge long held beliefs about foreign news coverage not the least of which is whether in our interconnected world such a thing as foreign news even exists anymore Essays explore the ways people have used new media technology from satellites and cell phones to the Internet to affect content delivery modes and amount and style of coverage They examine the ways in which speedy reporting conflicts with in depth reporting the pros and cons of parachute journalism the declining dominance of mainstream media as a source of foreign news and the implications of this new foreign correspondence for foreign policy Entertainment media such as film television and video gaming form worldwide opinions about America often in negative ways Meanwhile live reporting abroad is both a blessing and curse for foreign policy makers Because foreign news is so vital to effective policy making and citizenship we imperil our future by failing to understand the changes technology brings and how we can wrest the best practice out of those changes This provocative volume offers valuable insights and analyses to help us better understand the evolving state of foreign news **Information Systems for Emergency Management** Bartel Van De Walle, Murray Turoff, Starr Roxanne Hiltz, 2014-12-18 This book provides the most current and comprehensive overview available today of the critical role of information systems in emergency response and preparedness It includes contributions from leading scholars practitioners and industry researchers and covers all phases of disaster management mitigation preparedness response and recovery Foundational chapters provide a design framework and review ethical issues Context chapters describe the characteristics of individuals and organizations in which EMIS are designed and studied Case Study chapters include systems for distributed microbiology laboratory diagnostics to detect possible epidemics or bioterrorism humanitarian MIS and response coordination systems Systems Design and Technology chapters cover simulation geocollaborative systems global disaster impact analysis and environmental risk analysis Throughout the book the editors and contributors give special emphasis to the importance of assessing the practical usefulness of new information systems for supporting emergency preparedness and response rather than drawing conclusions from a theoretical understanding of the potential benefits of new technologies **Societal Impact of Spaceflight** Steven J. Dick, Roger D. Launius, 2007 Since the dawn of spaceflight advocates of a robust space effort have argued that human activity beyond Earth makes a significant difference in everyday life Assertions abound about the impact

of spaceflight on society and its relationship to the larger contours of human existence Fifty years after the Space Age began it is time to examine the effects of spaceflight on society in a historically rigorous way Has the Space Age indeed had a significant effect on society If so what are those influences What do we mean by an impact on society And what parts of society Conversely has society had any effect on spaceflight What would be different had there been no Space Age The purpose of this volume is to examine these and related questions through scholarly research making use especially of the tools of the historian and the broader social sciences and humanities Herein a stellar array of scholars does just that and arrives at sometimes surprising conclusions

Disaster Management and International Space Law Diego

Zannoni,2019-06-07 Is international law equipped to tackle the challenges posed by the dramatic increase in disasters In Disaster Management and International Space Law Diego Zannoni attempts to answer this crucial question through an analysis of the main legal issues involved addressing both prevention and relief with a special focus on major space applications such as remote sensing and telecommunications and the attendant specific legal regimes It is argued that when lives of human beings are in danger territorial sovereignty becomes to a certain extent porous and bends in front of the value of human life and the urgent need to rescue On the other hand specific obligations were identified to cooperate in the prevention and management of disasters particularly in terms of data sharing

Dark Skies Daniel Deudney,2020-03-02

Space is again in the headlines E billionaires Jeff Bezos and Elon Musk are planning to colonize Mars President Trump wants a Space Force to achieve space dominance with expensive high tech weapons The space and nuclear arms control regimes are threadbare and disintegrating Would be asteroid collision diverters space solar energy collectors asteroid miners and space geo engineers insistently promote their Earth changing mega projects Given our many looming planetary catastrophes from extreme climate change to runaway artificial superintelligence looking beyond the earth for solutions might seem like a sound strategy for humanity And indeed bolstered by a global network of fervent space advocates and seemingly rendered plausible even inevitable by oceans of science fiction and the wizardly of modern cinema space beckons as a fully hopeful path for human survival and flourishing a positive future in increasingly dark times But despite even basic questions of feasibility will these many space ventures really have desirable effects as their advocates insist In the first book to critically assess the major consequences of space activities from their origins in the 1940s to the present and beyond Daniel Deudney argues in Dark Skies that the major result of the Space Age has been to increase the likelihood of global nuclear war a fact conveniently obscured by the failure of recognize that nuclear armed ballistic missiles are inherently space weapons The most important practical finding of Space Age science also rarely emphasized is the discovery that we live on Oasis Earth tiny and fragile and teeming with astounding life but surrounded by an utterly desolate and inhospitable wilderness stretching at least many trillions of miles in all directions As he stresses our focus must be on Earth and nowhere else Looking to the future Deudney provides compelling reasons why space colonization will produce new threats to human survival and not

alleviate the existing ones That is why he argues we should fully relinquish the quest Mind bending and profound Dark Skies challenges virtually all received wisdom about the final frontier

Cyber-Diplomacy Evan H. Potter, 2002 Potter communications U of Ottawa formerly a senior strategist in the Communications Bureau at the Canadian Department of Foreign Affairs and International Trade DFAIT argues that advances in information technology will act as catalysts for forces of fragmentation and integration in the current international system He presents seven contributions that explore the theoretical implications of the growth of information technologies and test their ideas on how the processes have manifested and the DFAIT Also discussed are the ability of NGOs and social movements to use communication technologies to resist multilateral trade agreements the impact of CNN and other global television phenomena and the possibilities that governments can use information technologies to enhance their public diplomacy and their soft power Annotation copyrighted by Book News Inc Portland OR

Close Up at a Distance Laura Kurgan, 2013-03-26 The past two decades have seen revolutionary shifts in our ability to navigate inhabit and define the spatial realm The data flows that condition much of our lives now regularly include Global Positioning System GPS readings and satellite images of a quality once reserved for a few militaries and intelligence agencies and powerful geographic information system GIS software is now commonplace These new technologies have raised fundamental questions about the intersection between physical space and its representation virtual space and its realization In Close Up at a Distance Laura Kurgan offers a theoretical account of these new digital technologies of location and a series of practical experiments in making maps and images with spatial data Neither simply useful tools nor objects of wonder or anxiety the technologies of GPS GIS and satellite imagery become in this book the subject and the medium of a critical exploration Close Up at a Distance records situations of intense conflict and struggle on the one hand and fundamental transformations in our ways of seeing and of experiencing space on the other Kurgan maps and theorizes mass graves incarceration patterns disappearing forests and currency flows in a series of cases that range from Kuwait 1991 to Kosovo 1999 New York 2001 to Indonesia 2010 Using digital spatial hardware and software designed for military and governmental use in reconnaissance secrecy monitoring ballistics the census and national security Kurgan engages and confronts the politics and complexities of these technologies and their uses At the intersection of art architecture activism and geography she uncovers in her essays and projects the opacities inherent in the recording of information and data and reimagines the spaces they have opened up
