Changing the Course of Failure Sandra Stotsky, 2018-05-18 The basic purpose of this book is to help policy makers at all levels of government understand that 1 widespread adolescent underachievement is not susceptible to solution by educational interventions no matter how much money is allocated to public education and 2 there are unidentified educational and civic costs to focusing on low achievement and to expecting public institutions of education for K 12 and college to solve a growing social problem Many policy makers seem to think that teachers schools are the primary cause of low achievement Educational institutions still cannot solve a non education caused problem and haven't done so for over fifty years despite all the public and private money that has been allocated The book concludes with suggested policies for addressing the damage to public education from gap closing standards and with suggested areas for policy making in order to change the current course of failure for many low achieving students

Reforming the Reform Susan L. Moffitt, Michaela Krug O'Neill, David K. Cohen, 2023-08-18 School reforms are almost always born out of big dreams and a well-meaning desire to change the status quo of the American education system as we know it was the product of such a reform. But between the lawmakers who spearhead these changes and the students whose education is at stake, there are countless teachers, principals, administrators, and local politicians, and correspondingly countless ways that things can go sideways. In *Reforming the Reform*, political scientist Susan Moffitt, education scholar Michaela O'Neill, and the late policy and education scholar David K. Cohen take on a wide-ranging examination of the nitty-gritty of school reform. They focus especially on mezzo-level actors, but the countless school superintendents, principals, and teachers figuring out how to apply a new policy in the unique context of their district or school. They conducted more than 250 interviews with mezzo-level administrators in Tennessee and California, chosen as contrasts for their different political makeup and centralization of the education system between 2016 and 2020, ending their data collection as schools were going virtual at the beginning of the pandemic. They also collected survey data from across the US. Finally, they turned to archival data dating to the earliest American educational reform, the creation of a centralized national education policy. Taken together, this data demonstrates an impressive ambition to identify common problems that arise when a general policy is implemented in a local context. The framework provides a general explanation for problems facing social policy reforms in federalist systems, including healthcare, and offers pathways forward for education policy in particular.
