

Fifth Grade Common Core

Math Standards

These are the math skills that your child will be learning this year in Fifth Grade.

Operations & Algebraic Thinking

1. Use parentheses, brackets, or braces in numerical expressions, & evaluate expressions with these symbols.
2. Write simple expressions that record calculations with numbers, & interpret numerical expressions without evaluating them.
3. Generate two numerical patterns using two given rules. Identify apparent relationships between corresponding terms. Form ordered pairs (consisting of corresponding terms from the two patterns) & plot the ordered pairs on a coordinate plane.

Number and Operations in Base Ten

1. Recognize that in a multi-digit number, a digit in one place represents 10 times as much as it represents in the place to its right & 1/10 of what it represents in the place to the left.
2. Explain patterns in the number of zeros of the product when multiplying a number by powers of 10, & explain patterns in the placement of the decimal point when a decimal is multiplied or divided by a power of 10. Use whole number exponents to denote powers of 10.
3. Read, write, & compare decimals to hundredths.
4. Read & write decimals to hundredths using number names, number names, & expanded form.

5. Compare two decimals to hundredths based on meanings of the digits in each place, using $>$, $=$, and $<$ symbols to record the results of comparisons.
6. Use place value understanding to round decimals to any place.
7. Fluently multiply multi-digit whole numbers using the standard algorithm.
8. Find whole-number quotients of whole numbers with up to four-digit dividends & two-digit divisors, using strategies based on place value, the properties of operations, and the relationship between multiplication & division. Illustrate & explain the calculation by using equations, rectangular arrays, and/or area models.
9. Add, subtract, multiply, & divide decimals to hundredths, using concrete models or drawings & strategies based on place value, properties of operations, and the relationship between addition & subtraction. Relate the strategy to a written method & explain the reasoning used.

Number and Operations - Fractions

1. Add & subtract fractions with unlike denominators (including mixed numbers) by replacing given fractions with equivalent fractions in such a way as to produce an equivalent sum or difference of fractions with like denominators.
2. Solve addition & subtraction of fractions relating to the same whole, including tasks of unlike denominators.
3. Interpret a fraction as division of the numerator by the denominator. Solve word problems involving division of whole numbers leading to answers in the form of fractions.
