Luterbach, 2022-05-12 *Creating Stellar Lessons with Digital Tools* prepares teachers in training and in-service teachers to use technologies for design and development activities with middle and high school students. While software, open resources, handheld devices, and other tools hold great potential to enhance learning experiences, teachers themselves must model technology use in ways that inspire students to become producers and leaders rather than consumers and followers. Featuring concrete applications in social studies, English, mathematics, and science scenarios, this book provides pre-service and in-service teachers with seven paths to creatively integrate and innovate with computational thinking, datasets, maker spaces, visual design, media editing, and other approaches. *Eco-Mathematics Education* Nataly Chesky, Jack Milgram, 2021-10-18 *Eco-Mathematics Education* strives to show how everyone can experience the embedded connection between mathematics and the natural world. The authors' sincere hope is that by doing so we can radically change the way we come to understand mathematics as well as humanity's place in the ecosystem. The book hopes to accomplish this by providing in-depth lesson plans and resources for educators and anyone interested in teaching and learning mathematics through an ecological/aesthetic perspective. All lessons are based on the inquiry method of teaching aligned to standards, incorporate art projects inspired by famous artists, and utilize recycled and/or natural materials as much as possible. *Teaching Students With High-Incidence Disabilities* Mary Anne Prater, 2016-12-29 To ensure that all students receive quality instruction, *Teaching Students with High Incidence Disabilities* prepares preservice teachers to teach students with learning disabilities, emotional/behavioral disorders, intellectual disabilities, attention deficit/hyperactivity, and high-functioning autism. It also serves as a reference for those who have already received formal preparation in how to teach special needs students. Focusing on research-based instructional strategies, Mary Anne Prater gives explicit instructions and includes models throughout in the form of scripted lesson plans. The book also has a broad emphasis on diversity with a section in each chapter devoted to exploring how instructional strategies can be modified to accommodate diverse exceptional students. Real-world classrooms are brought into focus using teacher tips, embedded case studies, and technology spotlights to enhance student learning. **The School Story** David Aitchison, 2022-02-04 *The School Story* Young Adult Narratives in the Age of Neoliberalism examines the work of contemporary writers, filmmakers, and critics who, reflecting on the realm of school experience, help to shape dominant ideas of school. The creations discussed are mostly stories for children and young adults. David Aitchison looks at serious novels for teens including Laurie R. King's *Speak* and Faiza Guane's *Kiffe Kiffe Tomorrow*, the light-hearted middle-grade fiction of Andrew Clements and Tommy Greenwald, and Malala Yousafzai's autobiography for young readers *I Am Malala*. He also responds to stories that take young people as their primary subjects in such novels as Sapphire's *Push* and films including *Battle Royale* and *Cooties*. Though ranging widely in their

accounts of young life such stories betray a mounting sense of crisis in education around the world especially in terms of equity the extent to which students from diverse backgrounds have fair chances of receiving quality education and empowerment the extent to which diverse students are encouraged to gain strength confidence and selfhood as learners Drawing particular attention to the influence of neoliberal initiatives on school experience this book considers what it means when learning and success are measured more and more by entrepreneurship competitive individualism and marketplace gains Attentive to the ways in which power structures institutional routines school spaces and social relations operate in the contemporary school story *The School Story* offers provocative insights into a genre that speaks profoundly to the increasingly precarious position of education in the twenty first century [Unpacking Fractions](#) Monica Neagoy, 2017-03-10

For years the teaching and learning of fractions has been associated with rote memorization But this mechanical approach to instruction which strips students of an ability to reason or make sense of math has resulted in a failure of understanding Author Monica Neagoy drawing on decades of research studies evidence from teacher practice and 25 years of experience working around the world with teachers students and parents addresses seven big ideas in the teaching and learning of fractions in grades 2 6 Each idea is supported by a vignette from a real classroom common misconceptions a thorough unpacking of productive mathematical thinking and several multistep and thought provoking problems for teachers to explore She offers three fundamental reasons why it is imperative for us to take a closer look at how we teach fractions Fractions play a key role in students feelings about mathematics Fractions are fundamental to school math and daily life Fractions are foundational to success in algebra While a solid grounding in algebra is necessary for a STEM career the worthy goal of algebra for all will not be possible until fractions for all is a reality *Unpacking Fractions* provides teachers with concrete strategies for achieving that reality in short helping all students gain the knowledge they need to feel at ease with fractions
