Common Sense in the Scottish Enlightenment C. B. Bow, 2018-04-20 Common sense philosophy was one of eighteenth century Scotland's most original intellectual products It developed as a viable alternative to modern philosophical scepticism known as the Ideal Theory or the way of ideas The nine specially written essays in this volume explore the philosophical and historical significance of common sense philosophy in the Scottish Enlightenment Thomas Reid and David Hume feature prominently as influential authors of competing ideas in the history and philosophy of common sense The contributors recover anticipations of Reid's version of common sense in seventeenth century Scottish scholasticism reevaluate Reid's position in the realism versus sentimentalism dichotomy shed new light on the nature of the constitution in the anatomy of the mind identify changes in the nature of sense perception throughout Reid's published and unpublished works examine Reid on the non theist implications of Hume's philosophy show how polite literature shaped James Beattie's version of common sense reveal Hume's response to common sense philosophers explore English criticisms of the Scottish school and how Dugald Stewart's refashioning of common sense responded to a new age and the British reception of German Idealism In recovering the ways in which Scottish common sense philosophy developed during the long eighteenth century this volume takes an important step toward a more complete understanding of the Scottish philosophy and British philosophy more broadly in the age of Enlightenment

The Illusion of Will, Self, and Time Jonathan Bricklin, 2015-06-01 A Seminary Co op Notable Book of 2016 William James is often considered a scientist compromised by his advocacy of mysticism and parapsychology Jonathan Bricklin argues James can also be viewed as a mystic compromised by his commitment to common sense James wanted to believe in will self and time but his deepest insights suggested otherwise Is consciousness already there waiting to be uncovered and is it a veridical revelation of reality James asked shortly before his death in 1910 A century after his death research from neuroscience physics psychology and parapsychology is making the case both theoretically and experimentally that answers James s question in the affirmative By separating what James passionately wanted to believe based on common sense from what his insights and researches led him to believe Bricklin shows how James himself laid the groundwork for this more challenging view of existence The non reality of will self and time is consistent with James s psychology of volition his epistemology of self and his belief that Newtonian objective even flowing time does not exist
