Common Sense Reasoning And Rationality New Directions In Cognitive Science:

Common Sense, Reasoning, & Rationality Renée Elio,2002 While common sense and rationality have often been viewed as two distinct features in a unified cognitive map this volume engages with this notion and comes up with novel and often paradoxical views of this relationship   *Common Sense, Reasoning, & Rationality* Renée Elio,2002 While common sense and rationality have often been viewed as two distinct features in a unified cognitive map this volume engages with this notion and comes up with novel and often paradoxical views of this relationship   *Rationality and the Reflective Mind* Keith Stanovich,2011-02-03 In this book Keith Stanovich attempts to resolve the Great Rationality Debate in cognitive science the debate about how much irrationality to ascribe to human cognition Stanovich shows how the insights of dual process theory and evolutionary psychology can be combined to explain why humans are sometimes irrational even though they possess cognitive machinery of remarkable adaptiveness Using a unique individual differences approach Stanovich shows that to fully characterize differences in rational thinking the traditional System 2 of dual process theory must be partitioned into the reflective mind and the algorithmic mind Using a new tripartite model of mind Stanovich shows how rationality is a more encompassing construct than intelligence when both are properly defined and that IQ tests fail to assess individual differences in rational thought Stanovich discusses the types of thinking processes that would be measured in an assessment of rational thinking   *Reference* Jeanette K. Gundel,Nancy Ann Hedberg,2008-01-29 This volume is concerned with central themes in research on reference within the cognitive sciences The articles written by leading scholars in linguistics computational linguistics philosophy and cognitive psychology examine reference from a number of disciplinary and interdisciplinary perspectives informed by different research traditions and employing different methodologies   **Data Mining: Foundations and Practice** Tsau Young Lin,Ying Xie,Anita Wasilewska,Churn-Jung Liau,2008-08-17 The IEEE ICDM 2004 workshop on the Foundation of Data Mining and the IEEE ICDM 2005 workshop on the Foundation of Semantic Oriented Data and Web Mining focused on topics ranging from the foundations of data mining to new data mining paradigms The workshops brought together both data mining researchers and practitioners to discuss these two topics while seeking solutions to long standing data mining problems and stimul ing new data mining research directions We feel that the papers presented at these workshops may encourage the study of data mining as a scienti c eld and spark new communications and collaborations between researchers and practitioners Toexpressthevisionsforgedintheworkshopstoawiderangeofdatam ing researchers and practitioners and foster active participation in the study of foundations of data mining we edited this volume by involving extended and updated versions of selected papers presented at those workshops as well as some other relevant contributions The content of this book includes st ies of foundations of data mining from theoretical practical algorithmical and managerial perspectives The following is a brief summary of the papers contained in this book   *The Journal of Philosophy* ,2002   *Advances in Conceptual Modeling. Creating Consilience Edward Slingerland,Mark Collard,2012-01-19 Calls for a consilient or vertically integrated approach to the study of human mind and culture have for the most part been received by scholars in the humanities with either indifference or hostility One reason for this is that consilience has often been framed as bringing the study of humanistic issues into line with the study of non human phenomena rather than as something to which humanists and scientists contribute equally The other major reason that consilience has yet to catch on in the humanities is a dearth of

compelling examples of the benefits of adopting a consilient approach Creating Consilience is the product of a workshop that brought together internationally renowned scholars from a variety of fields to address both of these issues It includes representative pieces from workshop speakers and participants that examine how adopting such a consilient stance informed by cognitive science and grounded in evolutionary theory would concretely impact specific topics in the humanities examining each topic in a manner that not only cuts across the humanities natural science divide but also across individual humanistic disciplines By taking seriously the fact that science humanities integration is a two way exchange this volume takes a new approach to bridging the cultures of science and the humanities The editors and contributors formulate how to develop a new shared framework of consilience beyond mere interdisciplinarity in a way that both sides can accept

Schizophrenia and Common Sense Inês Hipólito,Jorge Gonçalves,João G. Pereira,2018-02-26 This book explores the relationship between schizophrenia and common sense It approaches this theme from a multidisciplinary perspective Coverage features contributions from phenomenology cognitive neuroscience philosophy of mind psychology and social cognition The contributors address the following questions How relevant is the loss of common sense in schizophrenia How can the study of schizophrenia contribute to the study of common sense How to understand and explain this loss of common sense They also consider What is the relationship of practical reasoning and logical formal reasoning with schizophrenia What is the relationship between the person with a diagnosis of schizophrenia and social values Chapters examine such issues as rationality emotions self and delusion In addition one looks at brain structure and neurotransmission Others explore phenomenological and Wittgensteinian theories The book features papers from the Schizophrenia and Common Sense International Workshop held at New University of Lisbon November 2015 It offers new insights into this topic and will appeal to researchers students as well as interested general readers   Delusions and Other Irrational Beliefs Lisa Bortolotti,2010 The book is an interdisciplinary exploration of the nature of delusions It brings together recent work in philosophy of mind cognitive psychology and psychiatry offering a comprehensive review of the philosophical issues raised by the psychology of normal and abnormal cognition   **Proceedings of the 25th Annual Cognitive Science Society** Richard Alterman,2013-12-16 This volume features the complete text of the material presented at the Twenty Fifth Annual Conference of the Cognitive Science Society As in previous years the symposium included an interesting mixture of papers on many topics from researchers with diverse backgrounds and different goals presenting a multifaceted view of cognitive science This volume includes all papers posters and summaries of symposia presented at the leading conference that brings cognitive scientists together The theme of this year s conference was the social cultural and contextual elements of cognition including topics on collaboration cultural learning distributed cognition and interaction   **Computing the Mind** Shimon Edelman,2008-09-08 In a culmination of humanity s millennia long quest for self knowledge the sciences of the mind are now in a position to offer concrete empirically validated answers to the most fundamental questions about human nature What

does it mean to be a mind How is the mind related to the brain How are minds shaped by their embodiment and environment What are the principles behind cognitive functions such as perception memory language thought and consciousness By analyzing the tasks facing any sentient being that is subject to stimulation and a pressure to act Shimon Edelman identifies computation as the common denominator in the emerging answers to all these questions Any system composed of elements that exchange signals with each other and occasionally with the rest of the world can be said to be engaged in computation A brain composed of neurons is one example of a system that computes and the computations that the neurons collectively carry out constitute the brain s mind Edelman presents a computational account of the entire spectrum of cognitive phenomena that constitutes the mind He begins with sentience and uses examples from visual perception to demonstrate that it must at its very core be a type of computation Throughout his account Edelman acknowledges the human mind s biological origins Along the way he also demystifies traits such as creativity language and individual and collective consciousness and hints at how naturally evolved minds can transcend some of their limitations by moving to computational substrates other than brains The account that Edelman gives in this book is accessible yet unified and rigorous and the big picture he presents is supported by evidence ranging from neurobiology to computer science The book should be read by anyone seeking a comprehensive and current introduction to cognitive psychology **On Folk Epistemology** Mikkel Gerken,2017-09-15 On Folk Epistemology explores how we ascribe knowledge to ourselves and others Empirical evidence suggests that we do so early and often in thought as well as in talk Since knowledge ascriptions are central to how we navigate social life it is important to understand our basis for making them A central claim of the book is that factors that have nothing to do with knowledge may lead to systematic mistakes in everyday ascriptions of knowledge These mistakes are explained by an empirically informed account of how ordinary knowledge ascriptions are the product of cognitive heuristics that are associated with biases In developing this account Mikkel Gerken presents work in cognitive psychology and pragmatics while also contributing to epistemology For example Gerken develops positive epistemic norms of action and assertion and moreover critically assesses contextualism knowledge first methodology pragmatic encroachment theories and more Many of these approaches are argued to overestimate the epistemological significance of folk epistemology In contrast this volume develops an equilibristic methodology according to which intuitive judgments about knowledge cannot straightforwardly play a role as data for epistemological theorizing Rather critical epistemological theorizing is required to interpret empirical findings Consequently On Folk Epistemology helps to lay the foundation for an emerging sub field that intersects philosophy and the cognitive sciences The empirical study of folk epistemology **Critical Thinking in Moral Development** ,2024-12-09 This book is for anyone interested in these topics whether they are veterans or relative newcomers to the field because the editors have assembled a stellar group of seventeen international contributors There are four sections devoted respectively to philosophical perspectives developmental psychology educational practices and

assessment Each section consists of three initial chapters followed by a commentary that highlights notable themes and gives guidance for further inquiry Along with the Introduction and Epilogue contributed by the editors Daniel Fasko and Frank Fair the chapters develop themes such as the role of the ideas of Aristotle and Kant in shaping our moral development and educational practices Here readers will encounter informative discussions of among other things The 4Es of Virtuous Purpose The Rational Construction of Morality and Philosophy Goes to High School Readers are also led to consider Measures of Moral Identity The EQUIP Program and Assessing Value Clarity and Moral Blueprints The diversity of expertise and the international vantage points of the contributors make this book an informative overview for the expert and a useful introduction for the beginning student concerning the issues involved Contributors are Jennifer Baker Marvin W Berkowitz M Neil Browne Michael W Creane Juan P Dabdoub Frank Fair Daniel Fasko Jr John C Gibbs David Kaspar J n Knap k Martina Kosturkov Shane McLoughlin Chad Miller Benjamin Mitchell Yellin David Moshman G Felicitas Munzel Renee B Patrick Timothy S Reilly and Di You   **American Book Publishing Record** ,2001   <u>Irrationality</u> Lisa Bortolotti,2014-12-01 We talk about irrationality when behaviour defies explanation or prediction when decisions are driven by emotions or instinct rather than by reflection when reasoning fails to conform to basic principles of logic and probability and when beliefs lack coherence or empirical support Depending on the context agents exhibiting irrational behaviour may be described as foolish ignorant unwise or even insane In this clear and engaging introduction to current debates on irrationality Lisa Bortolotti presents the many facets of the concept and offers an original account of the importance of judgements of irrationality as value judgements The book examines the standards against which we measure human behaviour and reviews the often serious implications of judgements of irrationality for ethics and policy Bortolotti argues that we should adopt a more critical stance towards accepted standards of rationality in the light of the often surprising outcomes of philosophical inquiry and cognitive science research into decision making Irrationality is an accessible guide to the concept and will be essential reading for students and scholars interested in the limitations of human cognition and human agency
