Mass Market Medieval David W. Marshall, 2007-04-11 Beginning in 1976 with the first issue of the journal *Studies in Medievalism* all things medieval and the concept of medievalism became a hot topic in culture studies Medievalism examines how different groups individuals or eras use and shape the image of the Middle Ages differentiating between historical knowledge of the Middle Ages and what we have made the period out to be The 13 essays in this book explore the medieval invasion of today's media and consider the various ways from film and print to websites and video games that the Middle Ages have been packaged for consumption Essays encompass diverse theoretical perspectives and are grouped loosely around distinct functions of medievalism including the exposure of recent social concerns the use of medieval images in modern political contexts and the medieval's influence on products of today's popular culture The

legitimization of the study of medievalism and the effect of medievalism on the more traditional subject of medieval studies are also discussed. Instructors considering this book for use in a course may request an examination copy here [Medieval Childhood](#) D. M. Hadley, K. A. Hemer, 2014-08-31 The nine papers presented here set out to broaden the recent focus of archaeological evidence for medieval children and childhood and to offer new ways of exploring their lives and experiences. The everyday use of space and changes in the layout of buildings are examined in order to reveal how these impacted upon the daily practices and tasks of household tasks relating to the upbringing of children. Aspects of work and play are explored how archaeologically we can determine whether and in what context children played board and dice games. How we may gain insights into the medieval countryside from the perspective of children and thus begin to understand the processes of reproduction of particular aspects of medieval society and the spaces where children's activities occurred and the possible role of children in the medieval pottery industry. Funerary aspects are considered: the burial of infants in early English Christian cemeteries; the treatment and disposal of infants and children in the cremation ritual of early Anglo Saxon England and childhood children and mobility in early medieval western Britain especially Wales. The volume concludes with an exploration of what archaeologists can draw from other disciplines: historians, art historians, folklorists and literary scholars and the approaches that they take to the study of childhood and thus the enhancement of our knowledge of medieval society in general.
