Help students become more confident and successful readers, writers, and thinkers in today's world. In this new edition of a bestseller, highly acclaimed author and speaker Heidi Hayes Jacobs offers practical ideas for closing the literacy gap by teaching classic literacies (reading, writing, speaking, and listening) along with essential new literacies (digital media and global). The expanded second edition features Heidi's latest work on the new literacies and provides enhanced versions of strategies designed to help educators integrate critical language skills into their daily operational curriculum. These strategies include: Revising and expanding the role of all teachers so that they see themselves as classical language and contemporary literacy teachers; Separating vocabulary into three distinctive types with distinctive instructional approaches to sustain and extend independent language development; Building creative and visual notetaking and sketchnoting strategies; Designing media projects for every class level and employing a consistent editing and revision policy for writing assignments; Using a formal approach to develop speaking skills through four discussion types to increase civil public discourse; Employing direct technical instruction that promotes the use of the human voice and body as a speaking and communication instrument; Using Curriculum Mapping to develop formal benchmark assessments for active literacy and new literacy cultivation in every subject and on every level. Each chapter is focused on a specific strategy and includes practical examples so you can easily implement the ideas no matter what grade level or subject area you teach. **From Mandate to Achievement** Elaine Makas, 2009-09-14

This engaging book will guide your journey through the morass of curriculum alignment, development, and assessment. Our school struggled through missteps in curriculum alignment and implementing common assessments without the benefit of Makas' wisdom and experience. I highly recommend this book for teachers, administrators, and interested parents. Robert A. Martin, Leadership Consultant, Oakland Schools, Waterford, MI. Raise schoolwide performance with a systematic teacher-driven approach to curriculum development. Purposeful curriculum design is essential to attaining consistent academic improvement. Educators often find, however, that a viable curriculum based on mandated standards can be exceedingly challenging to create, implement, and sustain. In this book, curriculum consultant Elaine Makas provides a step-by-step guide to establishing the processes and documents necessary to build a stable, cohesive curriculum system that aligns to educational benchmarks. Based on the DAILY model (Data Alignment, Instructional Pace Guides, Local Common Assessment, and Yearly Review), this system deconstructs the curriculum process into sequential steps that facilitate the development of instructional priorities, reveal students in need of intervention, and help ensure continuous process improvement. With numerous templates, samples, and reflective exercises, this book clearly demonstrates how to collect and analyze data, identify expectations, and recognize learning gaps. Develop curriculum maps that align with standards and grade-level subject goals.

theory of canon formation based on the ideas of Michel Foucault and the assemblage theory of Manuel DeLanda illustrating that the literary canon while frequently contested is integral to the teaching of literature yet changes as the teaching of literature changes
