Career Pathways In Psychiatry Transition In Changing Times:

Career Pathways in Psychiatry Arthur Lazarus, 2013-06-17 Career transitions in psychiatry have rarely been discussed openly. Yet in the light of health care reform and other forces affecting clinical practice it is more important than ever that psychiatrists have information about the career options within their specialty. *Career Pathways in Psychiatry Transition in Changing Times* serves that purpose. It explores the professional development and career choices of prominent American psychiatrists, each of whom is identified with a particular career track and many of whom have themselves experienced one or more career transitions. The autobiographical accounts of the contributors survey a wide range of career pathways in psychiatry including clinical practice, HMO practice, research, administration, entrepreneurship, psychoanalysis, organized medicine, the pharmaceutical industry, public psychiatry, occupational psychiatry, forensic psychiatry, and military psychiatry. These accounts are as engaging as they are informative; their anecdotal nature and conversational tone make for pleasurable reading. References at the end of each chapter serve as recommended reading for those who wish to learn more about specific career options. Intended for psychiatric residents and psychiatrists early in their careers, *Career Pathways in Psychiatry* will also appeal to their more experienced colleagues including seasoned clinicians who have contemplated career changes. With a preface summarizing research on career transitions in medicine and numerous chapters shedding light on factors contributing to resistance to change, this book will also be of interest to social scientists, mental health administrators, and professional recruiters.

A Phenomenology of Career Change in the Malaysian Workforce Jennifer Yee Quan Tham, Yit Sean Chong, Pervaiz K. Ahmed, 2023-07-25 Evolution in economy technology and social institutions over time have given rise to boundaryless and Protean careers that promote mobility and self direction in

managing one's career This has led to the phenomenon of career change whereby individuals undertake a shift from one field of work to a completely different field of work In career change research career changers have been studied as a collective singular group undergoing a similar change experience which neglects individual differences that may contrast the experience of change from one changer to another Furthermore the emotional experience that accompanies a career change has been examined with a primary focus on the role of positive emotions which overlooks the role of negative emotions in career change Thus this book sheds light on three key narratives of career change Rejectors Navigators and Seekers that were identified in a phenomenological study of career change amongst Malaysian working adults Semi structured interviews were conducted with 30 career changers across age gender and ethnicity with a focus on how they made sense and meaning of their lived experience of career change within their environment and context Each career change narrative was found to have different characteristics motivations and behaviors respectively which shaped their unique career change process Negative emotions were also revealed as key drivers of the career change process although each narrative expressed different types of negative emotions Finally the book also introduces an adaptive perspective to career development by way of the Adaptive Career Construal Model ACCM which was proposed based on the continuous bi directional relationship between career decisions and career outcomes

Young Adult Development at the School-to-Work Transition E. Anne Marshall, Jennifer E. Symonds, 2021-01-18 The school to work transition is a critical part of the human life span for young adults their families and society The timing of the transition varies greatly and its co occurrence with a number of other life transitions make it challenging to summarize or generalize Individual differences and normative developmental factors as well as external contextual factors such as global pandemics changing economic circumstances workplace demands and cultural shifts intersect to create a range of challenges and opportunities for those navigating this transition Written by internationally renowned scholars in developmental psychology applied psychology counseling and sociology the chapters in this book highlight the trends issues and actions that researchers academics practitioners and policy makers need to consider in order to effectively support young adults transition to work pathways This volume provides an explicitly international perspective on this area broad coverage of psychological topics on the school to work transition and an inclusive focus on sub groups and minority groups making it a must read for those who support young adults as they move from school to work
