

**Let the Efficiency Booster cut your
gas heating bill!**

Now, at last, here—exclusively here!—the chimney flue can be sealed and recycled back into the existing furnace heating system. The Efficiency Booster System installs easily on a new or existing central gas heating furnace (either natural or LP gas).

The Efficiency Booster does not alter the operation of the furnace in any way and with only one moving part — a 1/8-horsepower water pump. The system is highly reliable. It is design-certified by the American Gas Association. Where the existing furnace heating system is good and efficient, and the Efficiency Booster System has been expertly installed by a properly trained technician, heating bills can be dramatically reduced. The particular installation, application and local weather conditions will, of course, affect actual results.

Stable classroom

The Efficiency Booster is completely safe when installed by a properly trained technician. If, for any reason, it fails to operate, the furnace continues to function normally. Plus, there's really no cost from the existing chimney.

Qualifies for tax credit (within IRS guidelines)

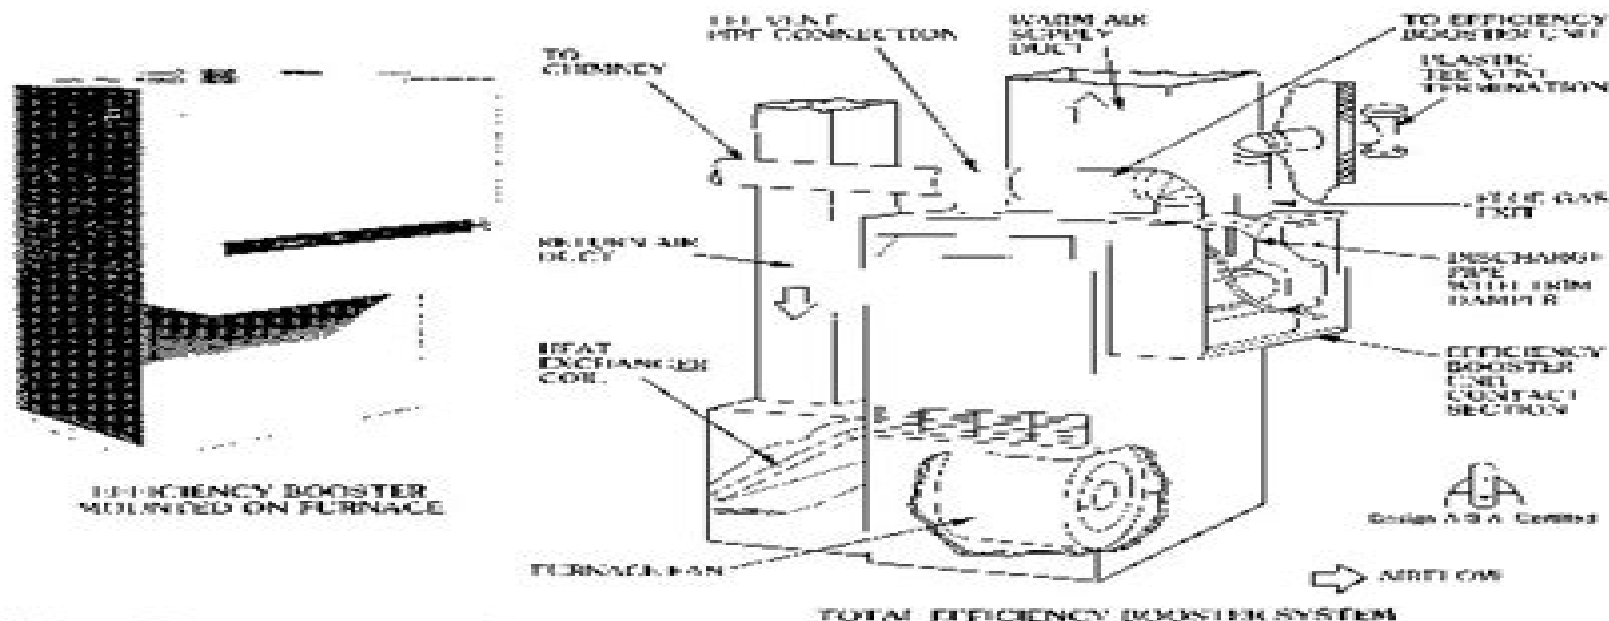

The Efficiency Horowitz qualifies for a 15% Federal Energy Tax Credit when the system is installed in a principal residence substantially completed before April 30, 1977. That means even more savings for the owner, and a faster payback.

Total Efficiency Booster System

The entire side-on system consists of these few parts: main control containing primary and secondary spring-actuated valves, float and float valve assembly, strainers, water supply connections, drain connection, heat exchanger coil, water connections to and from coil, pressure tap vent, and a package of retail hardware. Flueflow, plumbing and vent connections are standard.

Older furnaces can now be made more efficient

The Efficiency Booster System works on furnaces up to 165,000 Btu/h and can raise the average efficiency of conventional furnaces to 92%. That could mean an existing older furnace as energy efficient as a brand new, high efficiency model."

Efficiency: Boiler counts on furnace

5-lbm, lightweight design enables the H5500 to be mounted on either side of the furnace, on the wall, or suspended from ceilings.
