58DHC Mid-Efficiency Downflow/Horizontal Induced-Combustion Gas Furnace

Heating Capacities:
40,000 — 110,000 Btuh

Advanced Technology for Mid-Efficiency Gas Furnaces

Carrier leads the industry with our new Crusader gas furnace. This furnace is built with the most advanced manufacturing equipment, processes, and technology available in order to ensure top quality. Packed into the cabinet are the industry's foremost dealer and homeowner features. The 58DHC Downflow/Horizontal furnace is the newest addition to Carrier's line of product leadership in the gas furnace business.

These induced-combustion, gas-fired furnaces offer not only low installation costs, but fuel economy as well — delivering an Annual Fuel Utilization Efficiency (AFUE) rating of 80.2%. The Carrier Crusader utilizes a pilotless, silicon carbide ignition system to save energy and increase reliability. This ignition system does not have a pilot flame to waste gas, nor a pilot orifice to become clogged.

Our engineers used the patented S-shaped, four-pass heat exchanger to make the Carrier Crusader the fine mid-efficiency furnace that is only 40 inches tall. The Super-S heat exchanger provides better heat transfer while enabling us to make a most compact furnace. This provides more room to elect, utility room, and short basement installations — especially with today's taller high-efficiency coils. The Carrier Crusader will fit where other furnaces will not — accomplishing it with a durable, chromium-plated heat exchanger guaranteed by a 20-year Limited Warranty.

For superior attention to cabinet
