Gast, 2005-04-25 As we all know by now wireless networks offer many advantages over fixed or wired networks Foremost on that list is mobility since going wireless frees you from the tether of an Ethernet cable at a desk But that's just the tip of the cable free iceberg Wireless networks are also more flexible faster and easier for you to use and more affordable to deploy and maintain The de facto standard for wireless networking is the 802.11 protocol which includes Wi-Fi the wireless standard known as 802.11b and its faster cousin 802.11g With easy to install 802.11 network hardware available everywhere you turn

the choice seems simple and many people dive into wireless computing with less thought and planning than they'd give to a wired network. But it's wise to be familiar with both the capabilities and risks associated with the 802.11 protocols. And 802.11 Wireless Networks: The Definitive Guide, 2nd Edition is the perfect place to start. This updated edition covers everything you'll ever need to know about wireless technology. Designed with the system administrator or serious home user in mind, it's a no-nonsense guide for setting up 802.11 on Windows and Linux. Among the wide range of topics covered are discussions on deployment considerations, network monitoring and performance tuning, wireless security issues, how to use and select access points, network monitoring essentials, wireless card configuration, security issues unique to wireless networks. With wireless technology, the advantages to its users are indeed plentiful. Companies no longer have to deal with the hassle and expense of wiring buildings and households; with several computers, they can avoid fights over who's online. And now with 802.11 Wireless Networks: The Definitive Guide, 2nd Edition, you can integrate wireless technology into your current infrastructure with the utmost confidence.

The SAMOS workshop is an international gathering of highly qualified researchers from academia and industry sharing in a 3-day lively discussion on the quiet and spiring northern mountainside of the Mediterranean island of Samos. As a tradition, the workshop features workshop presentations in the morning, while after lunch, all kinds of informal discussions and nut-cracking gatherings take place. The workshop is unique in the sense that not only solved research problems are presented and discussed, but also partly unsolved problems, and in-depth topical reviews can be unleashed in the scientific arena. Consequently, the workshop provides the participants with an environment where collaboration rather than competition is fostered. The earlier workshops SAMOS I-IV (2001-2004) were composed only of invited presentations. Due to increasing expressions of interest in the workshop, the Program Committee of SAMOS V decided to open the workshop for all submissions. As a result, the SAMOS workshop gained an immediate popularity: a total of 114 submitted papers were received for evaluation. The papers came from 24 countries and regions: Austria 1, Belgium 2, Brazil 5, Canada 4, China 12, Cyprus 2,
