lot of regional geological and soil scientific mapping programs were carried out by government institutions and universities. These maps show when and how the surveyed sediments were formed. The palaeogeographical map reconstructions are subsequently used for the understanding and modeling of the long term coastal evolution, coastal management issues, landscape archaeological purposes and for education and public information reasons. Geoarchaeological investigations play an important role in this study. Geological and palaeo environmental data from archaeological excavations, key sites provided essential information for the palaeolandscape reconstructions. In the presented regional and local case studies of this book, examples of these sites are shown.

Social Justice Instruction Rosemary Papa, Danielle M. Eadens, Daniel W. Eadens, 2016-03-22. This resource offers instructors a full palette of strategies for teaching social justice concepts across subject areas from kindergarten through college. Dividing its content between elementary, adolescent and adult learners, the book analyzes the classroom experience as a powerful means of challenging stereotypes and supporting inclusion, respect and equity. History, language arts, literature and social studies as well as mathematics and science are shown as platforms for tying critical thinking to moral behavior. And while professional development underlies all chapters in the text, special areas such as technology, curriculum design, recognizing student demographics and raising social justice awareness in school culture are spotlighted. Among the topics covered: Reframing social justice for the adult learner, The politics of being faculty of color, teaching social justice in the college classroom, Stories of social justice from the kindergarten classroom, Critical literacy and multicultural literature, The shaming, creating a curriculum that promotes socially responsible online engagement, Literacy is a civil right, the art, science and soul of transformative classrooms. For educators and education researchers involved in the field, *Social Justice Instruction* unlocks the potential for imparting progressive ideas along the educational spectrum. The strategies here model a humanist perspective that will serve learners both in and outside the classroom.
