Lock,2016-02-22 Triant Flouris is a prominent academic and administrator in aviation management education Dennis Lock has more than forty years experience in practising lecturing and writing about project management When these two experts combined their considerable talents to write their earlier book Aviation Project Management it was little wonder that distinguished reviewers gave generous praise and acclaimed it as a welcome addition to what until then had been a neglected field That first title was structured as an essential primer for managers and students The authors have now written this more in depth book for managers and students who need to study aviation project management in much greater detail as well as critically connect project management within an aviation context to prudent business decision making Aviation project management is described in considerable detail throughout all stages of a lifecycle that begins when the project is

only a vague concept and does not end until the project has been successfully completed fully documented and put into operational service Aviation projects have commonly failed to deliver their expected outcomes on time and have greatly exceeded their intended budgets Many of those failures would have been prevented if the project managers had adhered to the sound principles of project management as described and demonstrated throughout this book Information Technology Control and Audit, Fifth Edition Angel R. Otero,2018-07-27 The new fifth edition of Information Technology Control and Audit has been significantly revised to include a comprehensive overview of the IT environment including revolutionizing technologies legislation audit process governance strategy and outsourcing among others This new edition also outlines common IT audit risks procedures and involvement associated with major IT audit areas It further provides cases featuring practical IT audit scenarios as well as sample documentation to design and perform actual IT audit work Filled with up to date audit concepts tools techniques and references for further reading this revised edition promotes the mastery of concepts as well as the effective implementation and assessment of IT controls by organizations and auditors For instructors and lecturers there are an instructor s manual sample syllabi and course schedules PowerPoint lecture slides and test questions For students there are flashcards to test their knowledge of key terms and recommended further readings Go to <http://routledgegettextbooks.com/textbooks/9781498752282> for more information *CPM in Construction Management, Eighth Edition* James J. world's most accomplished project management authors Lock has stripped project management down to its bare facts simplifying everything but trivializing nothing leaving sound practical advice on how to organize and manage a small or medium sized project The book is written in the direct jargon free style that has become Dennis Lock's hallmark Everything is carefully explained and supported with clear diagrams It covers all the essential aspect of project management in astonishingly few words and provides further instruction with an entertaining case study project that flows logically through the chapters from beginning to end Degree and other students for whom project management is an elective or small part of their course will love this compact time saving and reasonably priced study resource

How to Attract Investors Uffe Bundgaard-Jorgensen, 2016-11-25 Investors are often looked upon as one homogeneous group of people with money ready to invest however this group is very diverse In some ways investors are like car buyers who seek common denominators in a car such as the engine wheels brakes and seats but the car they end up buying depends on personal preferences needs and the money available For investors the common denominator is the good business case the engine wheels brakes seats being a comprehensive business plan However which business case they will prefer in the end depends on their personal preference and financial capacity How to Attract Investors takes the reader into the minds of the investors addressing many of the challenges connected to investor search and negotiation and living with investors as co owners Even the finest skills of the brightest entrepreneurs wouldn't be complete without the knowledge of the investor's mind This is the book that unravels it layer by layer
