Atwill, 2010-10-01 In Fire and Power William D Atwill maps the cultural contours of space age America through readings of some of the era's most popular and influential narratives Saul Bellow's Mr Sammler's Planet John Updike's Rabbit Redux Norman Mailer's Of a Fire on the Moon Tom Wolfe's The Right Stuff Thomas Pynchon's Gravity's Rainbow and Don DeLillo's Ratner's Star Together Atwill demonstrates these key texts comprise a literary history of the space age an exploration of the novel's possibilities in uncertain times and a disturbing critique of postwar society The massive technological enterprise known as the Manned Space Program was in Atwill's words the historical marker of our age and in our race to the moon he says Bellow Updike Mailer Wolfe Pynchon and DeLillo found a trope for the postmodern condition To these writers the space program was the most visible and outward sign of a radical shift in the culture that fostered it a shift from modernism's search for interior individual unity amidst chaos to the postmodern perception of the individual's fragmentation and uncertain standing in the world **Black World/Negro Digest**, 1975-10 Founded in 1943 Negro Digest later Black World was the publication that launched Johnson Publishing During the most turbulent years of the civil rights movement Negro Digest Black World served as a critical vehicle for political thought for supporters of the movement **1974 Annual Supplement** Joan Schmitz Bergholt, 2013-12-21

Estimating Equilibrium Exchange Rates John Williamson, 1994 The problems of exchange rate misalignments and the

resulting payments imbalances have plagued the world economy for decades At the Louvre Accord of 1987 the Group of Five industrial countries adopted a system of reference ranges for exchange rate management influenced by proposals of C Fred Bergstan and John Williamson for a target zone system The reference range approach has however been operated only intermittently and half heartedly and questions continue to be raised in policy and scholarly circles about the design and operation of a full fledged target zone regime This volume with chapters by leading international economists explores one crucial issue in the design of a target zone system the problem of calculating Williamson s concept of the fundamental equilibrium exchange rate FEER Williamson contributes an overview of the policy and analytic issues and a second chapter on his own calculations

Living in the Labyrinth of Technology Willem H. Vanderburg, 2005-12-15 From

the very beginnings of their existence human beings have distinguished themselves from other animals by not taking immediate experience for granted Everything was symbolized according to its meaning and value a fallen branch from a tree became a lever a tree trunk floating in the river became a canoe Homo logos created communities based on cultures humanity s first megaproject Further symbolization of the human community and its relation to nature led to the possibility of creating societies and civilizations Everything changed as these interposed themselves between the group and nature Homo societas created ways of life able to give meaning direction and purpose to many groups by means of very different cultures humanity s second megaproject What Das Kapital did for the nineteenth century and La technique did for the twentieth Willem H Vanderburg s *Living in the Labyrinth of Technology* seeks to create for the twenty first century an attempt at understanding the world in a manner not shackled to overspecialized scientific knowing and technical doing Western civilization may well be creating humanity s third megaproject based not on symbolization for making sense of and living in the world but on highly specialized desymbolized knowing stripped of all peripheral understanding Vanderburg focuses on two interdependent forces in his narrative namely people changing technology and technology changing people The latter aspect although rarely considered turns out to be the more critical one for understanding the spectacular successes and failures of contemporary ways of life As technology continues to change the social and physical world the experiences of this world grow people s minds and society s cultures thereby re creating human life in the image of technology *Living in the Labyrinth of Technology* argues that the twenty first century will be dominated by this pattern unless society intervenes on human as opposed to technical terms
