Democratic Schools Michael W. Apple, James A. Beane, 1995 Shows how educators in four communities in the United States have committed themselves to preparing students for the democratic way of life **Official Knowledge** Michael W. Apple, 2014-03-26 This third edition of Official Knowledge the classic text from one of the worlds most distinguished education scholars encourages educators once again to critically examine the relationship among knowledge power and education Rather than simply asking whether students have mastered a particular subject matter or done well on ubiquitous tests Michael W Apple instead challenges readers to probe the deeper questions of whose knowledge the curriculum represents and how it came official The award winning Official Knowledge offers a powerful examination of the rightist resurgence in education and the challenges it presents to concerned educators Updates and features of the 3rd edition include A new and detailed preface that situates it within the current debates within education Updates throughout all chapters with a special focus on Chapter 2 Why the Right is Winning to document how the Right has changed our commonsense about what counts as a good school good curricula good teaching to such an extent that even the Obama Administrations policies for educational reform incorporate much of the neoliberal agenda A new section on the current controversies over curriculum and textbooks focusing on the very conservative changes in textbook policies and content in Texas and Arizona The addition of an autobiographical chapter so that the arguments of the book make sense in terms of the concrete struggles over education over a lifetime of work *Educating for Action* Jason Del Gandio, Anthony Nocella II, 2014-09-09 An inspiring instructional handbook for transforming idealism into social change **Education Policy Research** Helen M. Gunter, David Hall, Colin Mills, 2014-10-23 In Education Policy Research Helen M Gunter David Hall and Colin Mills bring together contributions from a range of researchers academics and practitioners Each chapter draws on critical theoretical perspectives and showcases innovative research projects within educational settings to understand the current changes in schools schooling and education to explore critical questions The varied accounts demonstrate the importance of partnerships between schools and higher education and of putting educational research into context specifically charting the ways in which schools and schooling have been reformed through government interventions Education Policy Research presents new research findings on the realities of how educational practice can be understood and explained so enabling researchers to take a reflexive stance towards their own work The editors and contributors take seriously the need to rethink their data and consider the contribution of research dispositions and practices to ongoing change and development At the same time the chapters give recognition to what research and researchers can and cannot do contributing to the ongoing debates about the value of and the urgent ongoing need for social science research

Democracy Inside Albert W. Dzur, 2019 In our current era of deep distrust in our politics and political institutions there is also a pervasive sense that social problems are so overwhelmingly complex that it is virtually impossible to solve them In

Democracy Inside Albert W Dzur looks at recent instances of effective citizen action across the United States to develop a grounded political theory of democratic change one in which citizens effectively engage with institutions Drawing on qualitative interviews with practitioners involved in democratic schools restorative and community justice and collaborative city governance Dzur stresses that we need to turn to ordinary daily life and focus on how democratic professionals are breaking down barriers and bring people into decision making processes at the granular level These reformers are not transforming high politics or national scale institutions but they have been effective at changing the routine everyday practices where people live and work As Democracy Inside shows if we really want to expand the democracy and build citizen engagement intensity in American life we need to look beyond traditional politics and transform our classrooms courtrooms and offices into accessible civic spaces

School Trouble Deborah Youdell, 2010-11-01 What is the trouble with schools and why should we want to make school trouble Schooling is implicated in the making of educational and social exclusions and inequalities as well as the making of particular sorts of students and teachers For this reason schools are important sites of counter or radical politics In this book Deborah Youdell brings together theories of counter politics and radical traditions in education to make sense of the politics of daily life inside schools and explores a range of resources for thinking about and enacting political practices that make school trouble The book offers a solid introduction to the much debated issues of intersectionality and the limits of identity politics and the relationship between schooling and the wider policy and political context It pieces together a series of tools and tactics that might destabilize educational inequalities by unsettling the knowledges meanings practices subjectivities and feelings that are normalized and privileged in the business as usual of school life Engaging with curriculum materials teachers lesson plans and accounts of their pedagogy and ethnographic observations of school practices the book investigates a range of empirical examples of critical action in school from overt political action pursued by educators to day to day pedagogic encounters between teachers and students The book draws on the work of Michel Foucault Judith Butler Ernesto Laclau and Chantal Mouffe and Gilles Deleuze and Felix Guattari to make sense of these practices and identify the political possibilities for educators who refuse to accept the everyday injustices and wide reaching social inequalities that face us School Trouble appears at a moment of political and economic flux and uncertainty and when the policy moves that have promoted markets and private sector involvement in education around the globe have been subject to intense scrutiny and critique Against this backdrop renewed attention is being paid to the questions of how politics might be rejuvenated how societies might be made fair and what role education might have in pursuing this This book makes an important intervention into this terrain By exploring a politics of discourse an anti identity politics a politics of feeling and a politics of becoming it shows how the education assemblage can be unsettled and education
