Money, Markets, and Democracy George Bragues, 2016-11-11 This book offers a comprehensive analysis of the ways that politics and financial markets impact one another In this relationship politics is the ultimate controlling force The kinds and prices of financial instruments that get traded and the individuals and institutions that get to trade them not to mention the rules under which everyone trades are all matters decisively influenced by an array of political variables sometimes for the better but all too often for the worse The fault for this political skewing of the markets chiefly lies with democracy Through its commitment to equality and its inclination towards fiscal profligacy democracy hinders the markets from acting as a greater force for social good To fix this skewing of finance democracy's troubling tendencies must be squarely faced and curbed by a return to its monetary roots Democracy must reinstall gold at the monetary foundations of our financial markets

Financial Crises and the Politics of Macroeconomic Adjustments Stefanie Walter, 2013-10-31 When are policy makers willing to make costly adjustments to their macroeconomic policies to mitigate balance of payments problems Which types of adjustment strategies do they choose Under what circumstances do they delay reform and when are such delays likely to result in financial crises To answer these questions this book examines how macroeconomic policy adjustments affect individual voters in financially open economies and argues that the anticipation of these distributional effects influences policy makers decisions about the timing and the type of reform Empirically the book combines analyses of cross national survey data of voters and firms policy evaluations with comparative case studies of national policy responses to the Asian financial crisis of 1997-8 and the recent global financial crisis in Eastern Europe The book shows that variation in policy makers willingness to implement reform can be traced back to differences in the vulnerability profiles of their countries electorates

The IMF, the WTO & the Politics of Economic Surveillance Martin Edwards, 2018-12-12 Both the International Monetary Fund IMF and the World Trade Organization WTO practice periodic surveillance of members to ensure that countries are adopting appropriate economic policies Despite the importance of these procedures they remain understudied by scholars The global economic crisis has tested both organizations and brought surveillance to the forefront of policy debates Understanding how surveillance works then contributes to both theoretical and policy concerns The world is paying increasing attention to issues of transparency and

accountability questioning whether these organizations are in part responsible for the global economic crisis as well as assessing their responsiveness to the crisis This comparative analysis of surveillance at the IMF and WTO fills a significant gap in the existing literature drawing together a large range of empirical data and offering an extended critical analysis of this key issue Examining how and in what contexts surveillance is influential and how variations in institutional design shape the effectiveness of surveillance Edwards moves on to offer recommendations of how surveillance can be designed differently to make it more effective in the future This work will be of great interest to students and scholars of international organizations international political economy and global governance

Protean Power Peter J. Katzenstein, Lucia A. Seybert, 2018-01-18 Mainstream international relations continues to assume that the world is governed by calculable risk based on estimates of power despite repeatedly being surprised by unexpected change This ground breaking work departs from existing definitions of power that focus on the actors evolving ability to exercise control in situations of calculable risk It introduces the concept of protean power which focuses on the actors agility as they adapt to situations of uncertainty Protean Power uses twelve real world case studies to examine how the dynamics of protean and control power can be tracked in the relations among different state and non state actors operating in diverse sites stretching from local to global in both times of relative normalcy and moments of crisis Katzenstein and Seybert argue for a new approach to international relations where the inclusion of protean power in our analytical models helps in accounting for unforeseen changes in world politics

Politics in the New Hard Times Miles Kahler, David A. Lake, 2013-04-02 The Great Recession and its aftershocks including the Eurozone banking and debt crisis add up to the worst global economic crisis since the Great Depression of the 1930s Although economic explanations for the Great Recession have proliferated the political causes and consequences of the crisis have received less systematic attention *Politics in the New Hard Times* is the first book to focus on

the Great Recession as a political crisis one with both political sources and political consequences The authors examine variation in crises over time and across countries rather than treating these events as undifferentiated shocks Chapters also explore how crisis has forced the redefinition and reinforcement of interests at the level of individual attitudes and in national political coalitions Throughout the authors stress that the Great Recession is only the latest in a long history of international economic crises with significant political effects and that it is unlikely to be the last Contributors Suzanne Berger MIT J Lawrence Broz University of California San Diego Peter Cowhey University of California San Diego Peter A Gourevitch University of California San Diego Stephan Haggard University of California San Diego Peter A Hall Harvard University Miles Kahler University of California San Diego Peter J Katzenstein Cornell University Ikuo Kume Waseda University David A Lake University of California San Diego Megumi Naoi University of California San Diego Stephen C Nelson Northwestern University Pablo Pinto Columbia University James Shinn Princeton University **It'S Nothing**

Personal It'S Only Business William N. Spencer,2016-01-28 Today in America we are no longer the worlds largest market economy If anything the only thing greatest about the American economy is the amount of money we owe to other countries Politicians and activists portray big government as essential to safeguard the common good There is no question we need the government to protect our rights and assure the rule of law But overly large and politicized government ends up dominating and undermining a moral society Instead of empowering people big government programs from welfare subsidies to corporate bailouts promote dependency and deteriorate personal responsibility encouraging both people and companies to make bad decisions How did we as a country allow our students and our citizens in general to become so economically uneducated in just two generations **Globalization and the New Politics of Embedded Liberalism** Jude C.

Hays,2009-08-27 As the world economy slides into the worst recession since the 1930s there is fear that hard times will ignite a backlash against free trade policies and globalization more generally This book explores the political and economic institutional foundations of the bargain of embedded liberalism and the ways domestic institutions shape how governments redistribute the risks and benefits of economic globalization The author identifies the Anglo American democracies because of their majoritarian polities combined with decentralized competitive economies as uniquely vulnerable to the contemporary challenges of globalization and the most susceptible to a backlash against it **Principles of Comparative Politics** ,

Banks on the Brink Mark Copelovitch,David A. Singer,2020-02-20 International capital flow and domestic financial market structures explain why some countries are more vulnerable to banking crises Party Governance and Party Democracy Wolfgang C. Müller,Hanne Marthe Narud,2013-05-15 Given the centrality of political parties in modern democracies most research on these systems either directly address their internal functioning and activities or question their critical role Political science has moved from describing institutions to the thorough analysis of behavior within these institutions and the interactions between them The inevitable consequences of the maturing and institutionalization of the

discipline of political science in many countries include the forming of sub fields and specialized research communities At the same time the number of democracies has vastly increased since the 1980s and although not each attempt at democratization was eventually successful more heterogeneous systems with some form of party competition exist than ever before As a consequence the literature addressing the large issues of party democracy spreads over many research fields and has become difficult to master for individual students of party democracy and party governance The present volume sets out to review the behavior and larger role of political parties in modern democracies In so doing the book takes its departure from the idea that the main contribution of political parties to the working of democracy is their role as vehicles of political competition in systems of government Consequently the focus is not merely in the internal functioning of political parties but rather their behavior the electoral legislative and governmental arenas Thus several chapters address how political parties perform within the existing institutional frameworks One more chapter looks at the role of political parties in building and adapting these institutions Finally two chapters explicitly address the party contributions to democracy in established and new democracies respectively
