Democratization in Africa: Challenges and Prospects Gordon Crawford, Gabrielle Lynch, 2013-09-13 It is two decades since the third wave of democratization began to roll across sub Saharan Africa in the early 1990s This book provides a very timely investigation into the progress and setbacks over that period the challenges that remain and the prospects for future democratization in Africa It commences with an overall assessment of the lack of progress made from 1990 to 2010 exploring positive developments with reasons for caution Based on original research subsequent contributions examine various themes through country case studies inclusive of the routinisation of elections accompanied by democratic rollback and the rise of hybrid regimes the tenacity of presidential powers the dilemmas of power sharing ethnic voting and rise of a violent politics of belonging the role of donors and the ambiguities of democracy promotion Overall the book concludes that steps forward remain greater than reversals and that typically though not universally sub Saharan African countries are more democratic today than in the late 1980s Nonetheless the book also calls for more meaningful processes of democratization that aim not only at securing civil and political rights but also socio economic rights and the physical security of African citizens This book was originally published as a special issue of *Democratization*

The Role of Civil Society in Africa's Quest for Democratization Abadir M. Ibrahim, 2016-12-08 This book tests many of the assumptions hypotheses and conclusions connected with the presumed role of civil society organizations in the democratization of African countries Taking a comparative approach it looks at countries that have successfully democratized those that are stuck between progress and regression those that have regressed into dictatorship and those that are currently in transitional flux and evaluates what role if any civil society has played in each instance The countries discussed South Africa Ghana Nigeria Ethiopia Egypt and Tunisia represent a diverse set of social and political circumstances and different levels of democratic achievement providing a rich set of case studies Each sample state also offers an internal comparison as each has historically experienced different stages of democratization Along the course of each case study the book also considers the effect that other traditionally studied factors such as culture colonization economic development and foreign aid may have had on individual attempts at democratization The first extensive work on civil society and democratization in Africa the book adds new insights to the applicability of democratization theory in a non Western context both filling a gap in and adding to the existing universal scholarship This book will be useful for scholars of political science economics sociology and African studies as well as human rights activists and policy makers in the relevant geographical areas

State Building and Democratization in Africa Kidane Mengisteab, Cyril K. Daddieh, 1999-01-30 State building and democratization in Africa rarely attract the attention they deserve Few have grappled with the relationship between state building nation building and democratic experiments in Africa This collection consciously corrects this shortcoming in African political studies Among the issues raised Does democracy facilitate state building or does it exacerbate ethnic conflicts Are certain modalities of democratization more likely to facilitate state building than others Has the era of democracy created the need for new state building strategies Does the objective of state building require significant

modifications in the essence and form of democracy This collection combines theoretical explorations with empirical case studies It looks at both anglophone and francophone countries of sub Saharan Africa While the contributors have written extensively on African issues there is no consensus among the authors most argue that integrating ethnic groups that already face discrimination and often are engaged in conflict requires compromise political settlements and new terms of incorporation into the state These compromises in turn involve new arrangements in how democracy is perceived and instituted An important collection for scholars students and other researchers involved with African political social and economic development

Election Observation and Democratization in Africa NA NA, 2016-04-30 This book offers an authoritative study of election observation in Africa and its relation with democratization processes Election observation is a hotly debated issue in contemporary international relations and in political science It is seen by donor countries and the international community as a means to enhance democratization but has been controversial with regard to the mandates of the observers the cases of its misappropriation by authoritarian governments and its masking of other donor country interests The book addresses fundamental issues of elections and democratization in Africa evaluation policies and implementation as well as the historical backgrounds A range of case studies leads to new interpretations which challenge previous empiricist accounts of election observation in Africa Greater

attention to historical and cultural context is required than has been present in previous somewhat prescriptive accounts. An interdisciplinary approach gives fair coverage of the historical political and cultural issues involved in elections and election observation in Africa. Key examples of the interface between election observation and democratization processes in various important countries in Africa are presented, linking an analysis of policies and practice. The book contributes to topical debates on the dilemmas and challenges of good governance and on the varieties of democracy as a global phenomenon.

Media and Democracy in Africa Michael Leslie, 2017-07-05. Recent discussion of democratization in Africa has focused primarily on the reform of formal state institutions: the public service, the judiciary, and the legislature. Similarly, both scholars and activists have shown interest in how associational life and with it a civil society might be enhanced in the countries of the African continent. Much less concern, however, has been directed to the communications media, although they form a vital part of this process. *Media and Democracy in Africa* provides the first comprehensive and up-to-date assessment of the role of the media in political change in sub-Saharan Africa. The central argument of the volume is that while the media may still be relatively weak compared to their positions in liberal democracies, they have come to play a much more important role than ever before since independence. Although they have not yet demonstrated sufficient effectiveness as public watchdogs and agenda setters, they have succeeded in creating new communicative spaces for people who have previously been intimidated or silent. Building on this, the contributors argue that a different conceptualization of democratization than the mainstream currently uses may be necessary to capture the process in Africa, where it is characterized by contestation rather than consolidation. This volume shows that the media scene in Africa is diverse. It stretches from the well-developed and technologically advanced situation in South Africa to the still fledgling media operations that are typical in sub-Saharan Africa. In these countries, print media as well as television and radio are just beginning to take their place in society and do so using simple and often outdated technology. The volume also examines how these growing outlets are supplemented by informal media, the so-called radio trottoir or rumor mill, whereby the autocratic and bureaucratic direction of public affairs are subject to private speculation and analysis. *Media and Democracy in Africa* is organized to provide a historical perspective on the evolution of the African media, placing the present in the context of the past, including both colonial and post-colonial experiences. It will be of interest to Africa area specialists, students of media and communications, political scientists, and sociologists.

Democratization in Africa Earl Conteh-Morgan, 1997-03-25. In this stimulating and carefully researched study, Conteh-Morgan offers a multidimensional look at the political economy of African states. While many books focus on explanations of the processes and outcomes of political transitions, this work demonstrates a deeper understanding of democratization by combining macro and micro issues and actors and historical and contemporary dynamics into a theoretical framework that underscores anomalies, dilemmas, and paradoxes in the political transformation of Africa. Offering one of the first detailed and balanced evaluations of democratization, Conteh-Morgan breaks new ground by providing

thought provoking insights into political transitions in developing countries The work will be of interest to scholars in comparative politics development studies and African studies The Democratization of Africa Alexius Amtaika, 2017
