Democratizing Innovation:

Democratizing Innovation Eric von Hippel, 2005 Innovation is rapidly becoming democratized Users aided by improvements in computer and communications technology increasingly can develop their own new products and services Eric von Hippel looks closely at this emerging system of user centred innovation Democratizing Innovation Eric A. von Hippel, 2012 Innovation is rapidly becoming democratized Users aided by improvements in computer and communications technology increasingly can develop their own new products and services These innovating users both individuals and firms often freely share their innovations with others creating user innovation communities and a rich intellectual commons In Democratizing Innovation I look closely at this emerging user centered innovation system which is affecting both information products and physical products Drawing on work done with several coauthors I explore why and when users find it profitable to develop new products and services for themselves and why it often pays users to reveal their innovations freely for the use of all Drawing on work with Nikolaus Franke Pam Morrison and others I document that product and service development is concentrated among lead user firms and individuals Lead users that are ahead on marketplace trends do not replicate manufacturer development efforts Instead they develop products that are not yet available Later manufacturers find many of these user developed products to be the basis for commercial products Drawing upon work with Dietmar Harhoff Joachim Henkel and others I report that user innovation has a positive impact on social welfare and propose that government policies including R D subsidies and tax credits should be realigned to eliminate biases against it An electronic version of this book is available under a Creative Commons license **Democratizing Innovation in Organizations** Philippe Davidson, 2022-02-02 Managers often isolate their innovation teams but wouldn't it be better to engage all the workers in innovation This book describes a framework that makes innovation a daily consideration for all It involves allowing a knowledge network to develop naturally which complements the existing organizational structure making it more organic It fosters more extensive collaboration amongst workers to produce more imaginative solutions that maximize value The workers are encouraged to consult one another spontaneously across their organization and beyond its traditional boundaries Insightful and constructive exchanges stimulate their thinking making them creative partners Unsuspected capabilities ideas and value are revealed Philippe Davidson describes creative deliberation techniques designed to maximize stakeholder value The framework also makes organizations nimbler and more resilient to market changes They become more sustainable in ever changing conditions because learning and change become the norm Innovation champions will find powerful arguments for introducing democratized innovation in their organizations A wealth of practical techniques and handy tips for participative work based training will help organizational trainers and facilitators to democratize innovation Management consultants will find invaluable insights to advise their clients on innovation Your workers are your organization's best agents of change unleash their natural creativity **Mechanisms to Enable Follow-On Innovation** Alina

Wernick,2021-05-13 The patent system is based on one patent per product presumption and therefore fails to sustain complex follow on innovations that contain a number of patents The book explains that follow on innovations may be subject to market failures such as hold ups and excessive royalties For decades scholars have debated whether the market problems can be solved with voluntary licensing i e open innovation or with compulsory liability rules The book concludes that neither approach is sufficient On the one hand incentives to engage in open innovation practices involving patents are insufficient On the other hand the existing compulsory liability rules in patent and competition law are not tailored to address follow on innovator s interests To transcend this problem the author proposes a compulsory liability rule against the suppression of follow on innovation that paradoxically fosters early on voluntary licensing between patent holders and follow on innovators The book is aimed at patent and competition law scholars and practitioners patent attorneys managers engineers and economists who either engage in open innovation involving patents or conduct research on the topic It also offers insights to policy and law makers reviewing the possibilities to foster open innovation initiatives or adapt the scope of patent remedies or employ compulsory licenses for patents
