## **Demography As An Interdiscipline Demography As An Interdiscipline:**

Demography As an Interdiscipline J. Mayone Stycos, This volume draws together some of the pioneer figures in the social science arena who have been working at the margins of demography and other social sciences These articles show the willingness of the new demography to venture into a variety of other disciplines to better appreciate its own special contributions to the world of interdisciplinary research **Population Issues** Leo J.G. van Wissen, Pearl A.

Dykstra, 2012-12-06 This volume marks the end of an eight year program of research on population issues launched in 1990 by the Netherlands Organization for Scientific Research The NWO Priority Program on Population Issues Initiatives for this program of research were taken over ten years ago by Hans Van Ginkel who became the first program chair and Dirk Van De Kaa The Dutch community of population scientists is deeply indebted to them for their early efforts At the time the program carried the name Between Individual Development and Social Solidarity Population and Society in a Period of Transition The goals of the Priority Program were threefold To reduce the fragmentation of research on population issues to increase collaboration among population researchers with different disciplinary backgrounds and to strengthen the position of population studies in Dutch academe and in international forums Looking back over eight years of programmed research we can safely say that the Priority Program has given an enormous impetus to population research in the Netherlands as this volume attests This program of research could not have been carried out successfully without the valuable contributions and constructive input of a large group of scientists The scope and the focus of the Priority Program were defined by a preparatory committee chaired by Gerard Frinking **Demography - Volume I** Zeng Yi, 2010-11-30 According to the

classic and widely accepted statement by Hauser and Duncan 1959 2 demography is defined as the study of the size territorial distribution and components of population changes therein and components of such changes Almost all disciplines of social sciences and most disciplines of natural sciences deal with human beings in one way or another either directly or indirectly Furthermore demographic concepts e.g. birth rate death rate and migration and methods and analysis strategies e.g. life table analysis can be readily extended to other species insects animals plants etc and inanimate collectives enterprises automobiles etc Clearly demography is an important thematic field in science and it may provide the empirical foundation for studying human beings animals and inanimate collectives on which other relevant scientific research is built The volume aims to be of value to the various audiences of both non specialists and experts who seek a comprehensive understanding of issues related to human population As reviewed in the very beginning of the Theme Introduction interdisciplinary is one of the three major features of demography Given the rapid development in techniques for collecting not only demographic data but also other related data concerning health biomarkers genetics behaviors and social and natural environments in conventional population surveys as well as rapidly enhancing computing powers this volume shows and concludes that demography will be even more interdisciplinary in the coming decades A notable example is that the cross field marriage

between bio medical sciences and demography will lead us to enter an era in which bio medical and demographic methods will be well integrated As indicated by James R Carey and James W Vaupel in Chapter 13 of this volume the bio demographic branches of demography are vibrant areas of demographic research that are rapidly growing and that have great potential to enrich and enlarge the domain of demography Not only can demographers learn much from biologists and epidemiologists but demographers can contribute much to research on life in general and to research on population health The increasing availability of data sources and much enhanced computing internet power will also lead demography to be more interactive with the other fields such as psychology environmental science economics business and management etc As discussed in this volume s Chapter 11 by Swanson and Pol for example it is now possible to link conventional demographic data sources of census surveys and vital statistics with administrative records such as social security tax reporting medical insurance hospital records school registration supermarket purchasing cards use etc while protecting individuals privacy Such linkages will substantially increase the value of demographic methods surveys and administrative records for scientific research and policy analysis as well as the applicability of demography in business and governmental decision making processes

**Coping with Demographic Change: A Comparative View on Education and Local Government in Germany and Poland** Reinhold Sackmann, Walter Bartl, Bernadette Jonda, Katarzyna Kopycka, Christian Rademacher, 2014-11-12 With many OECD countries experiencing a decline in their populations, this book offers a theoretical model of coping with demographic change and examines different strategies that societies have used to come to terms with demographic change. In particular, it details the different ways that Germany and Poland have tried to cope with this challenge and reveals three conflicting strategies: expansion, reduction, and phasing out. Coverage includes how and why demographic change was used in Poland to expand the education system, the variance of linkage between demographic change and growth rates in different fields of education in a German Bundesland, modes of reflexivity and personnel policy in German and Polish municipalities, effects of demographic change and forms of coping on fiscal capacity and unemployment rates in German municipalities. *Coping with Demographic Change* examines how and why societies cope with these detrimental effects. It conceptualizes the challenges a society faces as a result of demographic change and focuses on the processes by which actors, organizations, and nation states try to cope with this new situation.

**Population and Family in the Low Countries 1995** Hans van den Brekel, F. Deven, 2012-12-06 EDITORS Hans VAN DEN BREKEL and Fred DEVEN NIDI P.O. Box 11650 2502 AR The Hague The Netherlands CBGS Markiesstraat 1 1000 Brussels Belgium The series Population and Family in the Low Countries POPFAM established in 1976 aims to introduce selected issues of demographic research in Flanders, Belgium, and the Netherlands to an international audience. The publication series results from cooperation between the Netherlands Interdisciplinary Demographic Institute NIDI The Hague and the Flemish Population and Family Study Centre CBGS Brussels. This 1995 edition is the 11th in the series. In 1995 the NIDI celebrates its 25th anniversary as the Dutch national demographic institute, making it a special year for Dutch demography. The contents of this publication obviously highlight this event as most articles selected for this edition are written by Dutch or NIDI-related scholars. The article 'Ageing and the demand for care: scenario studies for Europe' by Hanna van Solinge and Jenny de Jong Gierveld concerns a comparative study with respect to the consequences of ageing.

populations for the infrastructure of care for the elderly It presents results of a scenario study on future developments in demand and supply of elderly care services for a selected number of European countries summarizing an extensive study on the impact of ageing populations on the socio medical system conducted by the authors on behalf of the European Population Committee of the Council of Europe      *Demographic Change in Coastal Fishing Communities and Its Implications for the Coastal Environment* Uwe Tietze,G. Groenewold,Alain Marcoux,Food and Agriculture Organization of the United Nations,2000-01-01 An increase in the number of fishers as a result of population growth and migration to coastal fishing communities can be a contributing factor in the overexploitation of fisheries resources and the deterioration of the coastal environment The findings of the development dynamics of rural fishing communities suggest that contrary to the assumed global trend the number of coastal fishers has started to decline or stagnate in recent years in some developing countries The findings further suggest that artisanal fisheries no longer are a last resort employment for people in some coastal areas

*Analyzing Contemporary Fertility* Robert Schoen,2020-08-12 This edited volume offers state of the art research on the dynamics of contemporary fertility by examining the implications of the economic and social forces that are driving the rapid change in fertility behavior and the changing context determinants and measurement of contemporary human reproduction The volume explores new theoretical avenues that seek to incorporate uncertainty examine social contagion effects and explain the rise in childlessness Reproductive attitudes are re examined in chapters that deal with models of parenthood and with the persistence of race ethnic nativity differences A new and important subject of multi partner fertility is also described by examining it in the context of total fertility and from the usually neglected perspective of men The impact of divorce on fertility the measurement of childlessness and the postponement of first births developments in assortative mating and fertility and current patterns of interracial fertility are also addressed in this volume By combining up to date research spanning the entire field to illuminate contemporary developments the book is a valuable source for demographers sociologists economists and all those interested in understanding fertility in today s world      *The New Population Problem*

Alan Booth,Ann C. Crouter,2005-05-06 This book is based on the presentations and discussions from a national symposium on Creating the Next Generation Social Economic and Psychological Processes Underlying Fertility in Developed Countries held at the Pennsylvania State University in 2003 The papers address some of the antecedents and consequences of the recent steep declines in fertility in developed countries from different theoretical and disciplinary angles While fertility rates are still high in some less developed parts of the world the new population problem with many countries in Europe Asia and North America is declining fertility With fertility decline comes a reshaping of the population pyramid The topic of fertility decline is interesting not only at the level of the individuals and couples but also at the level of the societies that must come to grips with their long term implications Divided into four Parts the text looks at contemporary trends in U S fertility thus setting the stage for the entire volume discusses social and cultural values and attitudes analyzes fertility decisions in different countries

and focuses on the possible long term consequences of current fertility trends for individuals families and societies

**Human Evolutionary Demography** Oskar Burger,Ronald Lee,Rebecca Sear,2024-06-14 Human evolutionary demography is an emerging field blending natural science with social science This edited volume provides a much needed interdisciplinary introduction to the field and highlights cutting edge research for interested readers and researchers in demography the evolutionary behavioural sciences biology and related disciplines By bridging the boundaries between social and biological sciences the volume stresses the importance of a unified understanding of both in order to grasp past and current demographic patterns Demographic traits and traits related to demographic outcomes including fertility and mortality rates marriage parental care menopause and cooperative behavior are subject to evolutionary processes Bringing an understanding of evolution into demography therefore incorporates valuable insights into this field just as knowledge of demography is key to understanding evolutionary processes By asking questions about old patterns from a new perspective the volume composed of contributions from established and early career academics demonstrates that a combination of social science research and evolutionary theory offers holistic understandings and approaches that benefit both fields Human Evolutionary Demography introduces an emerging field in an accessible style It is suitable for graduate courses in demography as well as upper level undergraduates Its range of research is sure to be of interest to academics working on demographic topics anthropologists sociologists demographers natural scientists working on evolutionary processes and disciplines which cross cut natural and social science such as evolutionary psychology human behavioral ecology cultural evolution and evolutionary medicine As an accessible introduction it should interest readers whether or not they are currently familiar with human evolutionary demography
