Denial Nature Environmental Philosophy Capitalism:

The Denial of Nature Arne Johan Vetlesen, 2015-02-11 A study of the increasingly precarious relationship between humans and nature this book seeks to go beyond work already contributed to the environmental movement It does so by highlighting the importance of experiencing rather than merely theorizing nature while realizing that such experience is becoming increasingly rare thus reinforcing the estrangement from nature that is a source of its ongoing human caused destruction In his original approach to environmental philosophy the author argues for the reinstatement of nature's value outside of its exploitative usefulness for human ends Such a perspective emphasizes the extent to which the environmental problem is a concrete reality requiring urgent action based on a multi sensuous appreciation of humans dependence on nonhuman lifeforms Designed as an accompaniment to undergraduate and postgraduate research *The Denial of Nature* draws on empirically informed literature from the social sciences to examine what life is really like for humans and nature in the era of global capitalism The book contends that capitalist society exploits nature both in the form of human capital and natural capital more relentlessly than any other and offers an environmental philosophy which actively opposes current developments Through discussions of the work of Teresa Brennan Theodor Adorno Martin Heidegger and Hans Jonas and through a radical critique of the nature deficit in Jürgen Habermas theory of capitalist modernity *The Denial of Nature* relies on insights from Critical Realism to bring together several seldom linked philosophies and suggest a new approach to the heavily discussed question of environmental ethics Arne Johan Vetlesen is Professor of Philosophy at the University of Oslo Norway and the author of twenty books among them *Perception Empathy and Judgment An Inquiry into the Preconditions of Moral Performance* 1994 *Closeness An Ethics with Heidegger* 1997 *Evil and Human Agency* 2005 and *A Philosophy of Pain* 2010

Cosmologies of the Anthropocene Arne Johan Vetlesen, 2019-03-28 This book engages with the classic philosophical question of mind and matter seeking to show its altered meaning and acuteness in the era of the Anthropocene Arguing that matter and more broadly the natural world has been misconceived since Descartes it explores the devastating impact that this has had in practice in the West As such alternatives are needed whether philosophical ones such as those offered by figures such as Whitehead and Nagel or posthumanist ones such as those developed by Barad and Latour Drawing on recent anthropological work ignored by philosophers and sociologists alike the author considers a radical alternative cosmology animism understood as panpsychism in practice This understanding of mind and matter of culture and nature is then turned against present day posthumanist critiques of what the Anthropocene amounts to showing them up as philosophically misguided politically mute and ethically wanting A ground breaking reconceptualization of the natural world and our treatment of it Cosmologies of the Anthropocene will appeal to scholars of sociology social theory philosophy and anthropology with interests in our understanding of and relationship with nature

Lives and Why They Matter asks how we have come to this and what an alternative less destructive approach to our now precarious coexistence with animals might look like Spanning the disciplines of philosophy psychology and anthropology this enquiry into various cross species relationships and encounters will appeal to scholars and students across the humanities and social sciences with interests in philosophy ethics human animal interaction and environmental thought

Theological Anthropology in the Anthropocene Jan-Olav Henriksen, 2022-12-14 The Anthropocene presents theology and especially theological anthropology with unprecedented challenges There are no immediately available resources in the theological tradition that reflect directly on such experiences Accordingly the situation calls for contextually based theological reflection of what it means to be human under such circumstances This book discusses the main elements in theological anthropology in light of the fundamental points a that theological anthropology needs to be articulated with reference to and informed by the concrete historical circumstances in which humanity presently finds itself and b that the notion of the Anthropocene can be used as a heuristic tool to describe important traits and conditions that call for a response by humanity and which entail the need for a renewal of what a Christian self understanding means Jan Olav Henriksen explores what such a response

entails from the point of view of contemporary theological anthropology and discusses selected topics that can contribute to a contextually based position *Challenging Life: Existential Questions as a Resource for Education* Jari Ristiniemi, Geir Skeie, Karin Sporre, 2018 There is an increasing recognition today that young people need to have knowledge about religions and world views in order to live and work in diverse societies What kind of maps are they provided with through religious values and ethics education Does education address the challenging existential questions that children and adolescents ask about life and the world This volume addresses different aspects of how existential questions have been dealt with in educational research It especially draws attention to the Swedish research tradition of focusing on life questions and the interpretation of life in education but with contemporary international research added It also addresses issues of ethics education and discusses possible options for the future of existential questions as a resource for education The Climate Threat. Crisis for Democracy? Jon Naustdalslid, 2023-08-21 A key point in the book is the need to focus more seriously at the energy problem as the real problem behind global warming The failure of global climate policies to reduce CO2 emissions and halt climate change has led an increasing number of scientist and activists to lose confidence in democracy s ability to handle climate change and led them to look to more authoritarian measures to meet the problem The book documents these trends also from a historical perspective criticize them and sketches more democratic alternatives The Power of the Periphery Peder Anker, 2020-05-28 What is the source of Norway s culture of environmental harmony in our troubled world Exploring the role of Norwegian scholar activists of the late twentieth century Peder Anker examines how they portrayed their country as a place of environmental stability in a world filled with tension In contrast with societies dirtied by the hot and cold wars of the twentieth century Norway s power they argued lay in the pristine ideal natural environment of the periphery Globally a beautiful Norway came to be contrasted with a polluted world and fashioned as an ecological microcosm for the creation of a better global macrocosm In this innovative interdisciplinary history Anker explores the ways in which ecological concerns were imported via Rachel Carson s *Silent Spring* in 1962 then to be exported from Norway back to the world at the Earth Summit in Rio de Janeiro in 1992 This title is also available as Open Access on Cambridge Core

vulnerability by living in love Against this backdrop Henriksen argues that neither how one understands religion God nor how to live a life that relates to ultimacy can be tasks fulfilled as long as history goes on
