Heritage and Sustainable Urban Transformations Kalliopi Fouseki, Torgrim

Guttormsen, Grete Swensen, 2019-07-25 *Heritage and Sustainable Urban Transformations* introduces the concept of deep cities a novel approach to the understanding and management of sustainable historic cities that will advance knowledge about how the long term temporal and transformative character of urban heritage can be better integrated into urban policies for sustainable futures Contrary to the growing emphasis on green or smart cities which focus only on the present and future the concept of deep cities offers an approach that combines an in depth understanding of the past with the present and future Bringing together chapters that cover theoretical methodological and management issues related to deep cities the volume argues that using this approach will force researchers managers and consultants to actively use the heritage and history of a city in the planning and management of sustainable cities Exploring different definitions of deep cities the book reveals varying and sometimes conflicting views among stakeholders concerning how where and when the depth of a city should be conceptualized Despite this the book demonstrates how this new approach can help to create robust cities for the future as new and innovative solutions are combined with the preservation and strengthening of historical features *Heritage and Sustainable Urban Transformations* is the first international collection on the subject of sustainable historic cities As such the book will be of great interest to academics and students engaged in the study of heritage heritage management architecture heritage conservation anthropology development studies geography planning and archaeology

How should we help equip the church leaders of Africa today There remains a well documented lack of theologically sound Bible centric preaching in Sub Saharan Africa The majority of sermons are preached by untrained or undertrained church leaders Following a practical theology praxis this book develops a conceptual framework for the evaluation of existing alternative approaches to grassroots preacher training It also proposes broad principles for effective preacher training and offers a practical solution The 20th century had seen the Christian church in Africa grow 36 fold to 360 million This amazing growth is arguably the largest religious change in human history in such a short period It has shifted the focus of Christianity from North to South This rapid growth is debatably considered by some missiologists and theologians to have resulted in an African church a mile wide and an inch deep That is a church of great size but lacking in spiritual depth The rapid growth has led to insufficient numbers of trained leaders being available to oversee their congregations Most leaders are unpaid Untrained or undertrained leaders have an inadequate knowledge of scripture and lack understanding of its interpretation They also lack the skills they need to communicate its truths Even so they preach up to 90% of the sermons in rural Africa Despite a tremendous hunger for training among many of those preachers traditional college based theological education cannot keep up with the demand for trained pastors and preachers in an affordable or culturally appropriate manner **Technology Mediated Service Encounters** Pilar Garcés-Conejos Blitvich,Lucía Fernández-Amaya,María de la O Hernández-López,2019-01-10
