Delphi Michael Scott, 2015-10-20 Annotation This work engages with the complex archaeological development of the religious sanctuaries of Delphi and Olympia It investigates the physical remains of both sanctuaries to show how different visitors interacted with the sacred spaces of Delphi and Olympia in an important variety of ways during the archaic and classical periods

Delphi (eGalley) Michael Scott, **The Routledge Companion to Ecstatic Experience in the Ancient World** Diana Stein, Sarah Kielt Costello, Karen Polinger Foster, 2021-12-31 For millennia people have universally engaged in ecstatic experience as an essential element in ritual practice spiritual belief and cultural identification This volume offers the first systematic investigation of its myriad roles and manifestations in the ancient Mediterranean and Near East The twenty nine contributors represent a broad range of scholarly disciplines seeking answers to fundamental questions regarding the patterns and commonalities of this vital aspect of the past How was the experience construed and by what means was it achieved Who was involved Where and when were rites carried out How was it reflected in pictorial arts and written records What was its relation to other components of the sociocultural compact In proposing responses the authors draw upon a wealth of original research in many fields generating new perspectives and thought provoking often surprising conclusions With their abundant cross cultural and cross temporal references the chapters mutually enrich each other and collectively deepen our understanding of ecstatic phenomena thousands of years ago Another noteworthy feature of the book is its illustrative content including commissioned reconstructions of ecstatic scenarios and pairings of works of Bronze Age and modern psychedelic art Scholars students and other readers interested in antiquity comparative religion and the social and cognitive sciences will find much to explore in the fascinating realm of ecstatic experience in the ancient world

Phoenix David Stuttard, 2021-05-04 A Times Literary Supplement Best Book of the Year A vivid novelistic history of the rise of Athens from relative obscurity to the edge of its golden age told through the lives of Miltiades and Cimon the father and son whose defiance of Persia vaulted Athens to a leading place in the Greek world When we think of ancient Greece we think first of Athens its power prestige and revolutionary impact on art philosophy and politics But on the verge of the fifth century BCE only fifty years before its zenith Athens was just another Greek city state in the shadow of Sparta It would take a catastrophe the Persian invasions to push Athens to the fore In *Phoenix* David Stuttard traces Athens s rise through the lives of two men who spearheaded resistance to Persia Miltiades hero of the Battle of Marathon and his son Cimon Athens s dominant leader before Pericles Miltiades s career was checkered An Athenian provincial overlord forced into Persian vassalage he joined a rebellion against the

Persians then fled Great King Darius's retaliation Miltiades would later die in prison But before that he led Athens to victory over the invading Persians at Marathon Cimon entered history when the Persians returned he responded by encouraging a tactical evacuation of Athens as a prelude to decisive victory at sea Over the next decades while Greek city states squabbled Athens revitalized under Cimon's inspired leadership The city vaulted to the head of a powerful empire and the threshold of a golden age Cimon proved not only an able strategist and administrator but also a peacemaker whose policies stabilized Athens's relationship with Sparta The period preceding Athens's golden age is rarely described in detail Stuttard tells the tale with narrative power and historical acumen recreating vividly the turbulent world of the Eastern Mediterranean in one of its most decisive periods

Sibling Action Stefani Engelstein, 2017-12-05 The sibling stands out as a ubiquitous yet unacknowledged conceptual touchstone across the European long nineteenth century Beginning in the late eighteenth century Europeans embarked on a new way of classifying the world devising genealogies that determined degrees of relatedness by tracing heritage through common ancestry This methodology organized historical systems into family trees in a wide array of new disciplines transforming into siblings the closest contemporaneous terms on trees of languages religions races nations species or individuals In literature a sudden proliferation of siblings often incestuously inclined negotiated this confluence of knowledge and identity In all genealogical systems the sibling term not quite same and not quite other serves as an active fault line necessary for and yet continuously destabilizing definition and classification In her provocative book Stefani Engelstein argues that this pervasive relational paradigm shaped the modern subject life sciences human sciences and collective identities such as race religion and gender The insecurity inherent to the sibling structure renders the systems it underwrites fluid It therefore offers dynamic potential but also provokes counterreactions such as isolationist theories of subjectivity the political exclusion of sisters from fraternal equality the tyranny of intertwined economic and kinship theories conflicts over natural kinds and evolutionary speciation and invidious anthropological and philological classifications of Islam and Judaism Integrating close readings across the disciplines with panoramic intellectual history and arresting literary interpretations *Sibling Action* presents a compelling new understanding of systems of knowledge and provides the foundation for less confrontational formulations of belonging identity and agency

How the World Made the West Josephine Quinn, 2024-09-03 An award winning Oxford history professor makes a forceful argument and tells a story with great verve The Wall Street Journal that the West is and always has been truly global Those archaic Western Civ classes so many of us took in college should be updated argues Quinn who invites us to revel in a richer more polyglot inheritance The Boston Globe AN ECONOMIST BEST BOOK OF THE YEAR LONGLISTED FOR THE CUNDILL HISTORY PRIZE In *How the World Made the West* Josephine Quinn poses perhaps the most significant challenge ever to the civilizational thinking regarding the origins of Western culture that is the idea that civilizations arose separately and distinctly from one another Rather she locates the roots of the modern West in everything from the law codes of Babylon Assyrian irrigation and the Phoenician art

of sail to Indian literature Arabic scholarship and the metalworking riders of the Steppe to name just a few examples According to Quinn reducing the backstory of the modern West to a narrative that focuses on Greece and Rome impoverishes our view of the past This understanding of history would have made no sense to the ancient Greeks and Romans themselves who understood and discussed their own connections to and borrowings from others They consistently presented their own culture as the result of contact and exchange Quinn builds on the writings they left behind with rich analyses of other ancient literary sources like the epic of Gilgamesh holy texts and newly discovered records revealing details of everyday life A work of breathtaking scholarship How the World Made the West also draws on the material culture of the times in art and artifacts as well as findings from the latest scientific advances in carbon dating and human genetics to thoroughly debunk the myth of the modern West as a self made miracle In lively prose and with bracing clarity as well as through vivid maps and color illustrations How the World Made the West challenges the stories the West continues to tell about itself It redefines our understanding of the Western self and civilization in the cosmopolitan world of today

Power of the Priests Sabine Kubisch,Hilmar Klinkott,2023-12-31 Religion plays a central role in nearly every aspect in people s life of most pre modern cultures Especially the interconnection between religion and politics is a common fact but the details of this relation and interacting processes behind this are not substantially studied Therefore this volume does not aim to confirm the linkage of religion and politics in general but to investigate its functionalities in political processes A focus is placed on the political role of religious personnel beyond their religious and cultic tasks and their influence in pre modern societies from a cross cultural perspective Specialists from various disciplines present their research based on case studies Thereby this interdisciplinary volume covers a wide geographical and chronological range from ancient Egypt in the Bronze Age until medieval England These papers are organised according to core functions questioning the instrumentalisation of religious personnel

The Making of the Doric Temple Gabriel Zuchtriegel,2023-04-20 In this volume Gabriel Zuchtriegel revisits the idea of Doric architecture as the paradigm of architectural and artistic evolutionism Bringing together old and new archaeological data some for the first time he posits that Doric architecture has little to do with a wood to stone evolution Rather he argues it originated in tandem with a disruptive shift in urbanism land use and colonization in Archaic Greece Zuchtriegel presents momentous architectural change as part of a broader transformation that involved religion politics economics and philosophy As Greek elites colonized explored and mapped the Mediterranean they sought a new home for the gods in the changing landscapes of the sixth century BC Greek world Doric architecture provided an answer to this challenge as becomes evident from parallel developments in architecture art land division urban planning athletics warfare and cosmology Building on recent developments in geography gender and postcolonial studies this volume offers a radically new interpretation of architecture and society in Archaic Greece

The Audiences of Herodotus
Ian Oliver,2024-12-19 By recognizing the pervasive influence that Herodotus's career as an oral performer had on his composition of the Histories The Audiences of Herodotus Oral Performance and the Battle Narratives argues that the Histories versions of the three most important battles in the Persian Wars the battles of Thermopylae Salamis and Plataea persistently and disproportionately advance the interests biases and political agendas of distinct audiences in the mid fifth century well before Herodotus assembled his famous work of history as it survives to us The Salamis and Plataea narratives reflect a mid century audience of Athenians and their allies the Thermopylae narrative reflects an Amphictyonic audience gathered at the Pythian Festival Ian Oliver concludes that as a participant in a culture of wisdom performance epideixis Herodotus originally composed short ideologically motivated performance pieces that he intended to promote tendentious reinterpretations of these momentous events then relied on these narratives when he composed his final text the unitary Histories
