

### 1.4.1 Organisational Measures

In addition to the operating instructions, applicable national regulations and any other binding regulations on the prevention of accidents and protection of the environment must be followed and passed on. These should be added to the operating instructions.

Such regulations may include, for example, handling/hazardous substances, making available / wearing personal protective equipment or road traffic regulations.

In addition to the operating instructions and the accident prevention regulations valid in the country and on the operating site where the crane is in use, the recognised technical regulations pertaining to safe and correct working procedures must also be observed.

The operating instructions should be supplemented by any other instructions that are necessary, including supervisory and operating rules for any special operating occurrences, for example with regard to work organisation, operating procedures, abstract personnel etc.

Keep a complete and legible set of all safety and hazard instructions on the crane at all times. (2.15.201)

Safety guards on the crane must not be opened or removed during crane operation.

Provide instructions on the location and use of fire extinguishing equipment.

The fire extinguishers which are supplied are located near the passenger seat in the cab of the crane chassis.

First aid kit, fire extinguishers and other accessories in accordance with road traffic licensing regulations – must be taken by the crane operator from the pack supplied and placed in the cab of the crane chassis.

In case of poor visibility or darkness, the immediate area in front of the crane operator's cab, the outriggers and the winches should be illuminated using the spot lights on the crane.

The cab and area front, back, left, right, lifting straps, driving route etc. (to be illuminated using suitable equipment, separate from the crane. The + the crane operator + are responsible for providing the lighting.
