*Demographic Developments in China* China Development Research Foundation,2014-06-05 This book assesses current developments in China's demography and discusses the changes which should be implemented to bring policy into line with the current demographic situation. It considers the results of the 2010 census which showed the very significant shifts that are occurring including a declining rate of population growth ongoing growth of the number of people in the floating population an increasingly imbalanced sex ratio among newborn children and ongoing ageing of the population. Besides discussing population planning policy the book also examines how policies in the fields of education health gender relations child development in rural areas and policies for the elderly and families should be adjusted to accommodate demographic developments.

*Chinese Economists on Economic Reform - Collected Works of Li Jiange* Jiange Li,2016-10-04 This book is part of a series which makes available to English speaking

audiences the work of the individual Chinese economists who were the architects of China's economic reform. The series provides an inside view of China's economic reform revealing the thinking of the reformers themselves unlike many other books on China's economic reform which are written by outside observers. Li Jiange, 1949, is one of the most notable and powerful economists holding office in China at present. He is currently the Vice Chairman of the Central Huijin Investment Company, one of the most influential financial institutions in China. He is also a member of the National Committee of the Chinese People's Political Consultative Conference and a Professor at the Chinese Academy of Social Sciences and other academic institutions. He has held many important positions in the state Research Office and the Department of Policies, Laws and Regulations and has been Director of the China Securities Regulatory Commission. His work has included major contributions to debates about maintaining financial stability, about achieving equitable income distribution and about China's overall economic development. The book is published in association with China Development Research Foundation, one of the leading economic and social think tanks in China where many of the theoretical foundations and policy details of economic reform were formulated. China's Exchange Rate Regime China Development Research Foundation, 2014-12-05. The imbalance between China's currency, the RMB, and those of other countries is widely regarded as a major problem for the world economy. There was a reform of China's exchange rate mechanism in 2005 following which the RMB appreciated 17% against the US dollar, but many people argue that further reform is still needed. This book reports on a major research project undertaken following the 2005 reform to assess the impact on China's economy. It considers the impact in a number of areas of the economy including export-oriented companies, the banking industry, international trade, international capital flows and China's macroeconomic policy. It concludes that the policies pursued so far have been correct and that further reform, both to the exchange rate and to the system overall, would be desirable but that any reform should be gradual and incremental, preserving economic stability and integrating changes with reform in other parts of the economy. Governing the Commons in China Yan Zhang, 2017-01-20. The idea of the commons is a long-standing concept in the English-speaking world and in English law. A similar concept occurs in China. How different from or similar to the English idea of the commons is the idea in China and how is the concept applied? This book explores this important subject. It examines the subject from a philosophical and theoretical perspective, considers the commons widely including tangible commons of resources, intangible commons of culture, identity and social capital, and institutional commons of welfare, security and public goods, and goes on to examine the concept as it applies to the hydropower developments along the Lancang River, outlining the different competing interests of local people, central and provincial government, and environmental considerations. It argues that the concept of the commons in China is dual-dimensional, with a vertical dimension of public authority and a horizontal dimension of commonly sharing that power. Structures in China have often been flexible and polycentric, and that correctly applied, this approach will do much to serve the common interest of the people, ensuring positive impacts for shared prosperity for
