Deped Grade 1 Guide:

Aesthetic Teaching Pedagogies Reynaldo B. Inocian, 2018-10-09 This book presents an assortment of teaching and assessment strategies appropriate for 21st century learners based on the author's 25 years of teaching experience in private and state school institutions in the Philippines. It highlights the outcomes-based assessment of learning the curriculum basics for arts-based teaching learning activities based on the integrated arts for an effective instructional process and examples in the teaching of critical thinking, communication, collaboration, and creativity known as the Four Cs. While the monograph focuses on the author's local context, a plethora of citations provides clear connections that address learner diversity in recent global education contexts. Translation Studies in the Philippines Riccardo Moratto, Mary Ann G. Bacolod, 2023-12-01 The contributors to this book examine the state development issues, practices, and approaches to translation studies in the Philippines. The Philippines is a highly multilingual country with many indigenous languages and regional dialects spoken alongside foreign imports, particularly English and Spanish. Professor Moratto, Professor Bacolod, and their contributors analyse the different roles that translation plays across an extensive range of areas, including disaster mitigation, crisis communication, gender bias, marginalization of Philippine languages, academe, and views on sex, gender, and sexuality. They look at a range of different types of translation, from the translation of biblical texts to audio-visual translation and machine translation. Emphasising the importance of translation as an interdisciplinary field, they use a variety of analytic lenses, including anthropological linguistics, language and culture studies, semantics, structural linguistics, and performance arts, among others. A comprehensive resource for scholars and practitioners of translation as well as a valuable reference for scholars across a wider range of humanities and social science disciplines in examining the culture, language, and society of the Philippines.

Research on Reasoning with Data and Statistical Thinking: International Perspectives Gail F. Burrill, Leandro de Oliveria Souza, Enriqueta Reston, 2023-07-21 This book is derived from selected papers from the Fourteenth International Congress on Mathematical Education Topic Study Group 12 Teaching and Learning Statistics. It describes recent research on curriculum, pedagogy, and outreach initiatives from countries as diverse as Brazil, Chile, Columbia, Denmark, Germany, the Netherlands, Spain, Sweden, Thailand, Turkey, the United Kingdom, and the United States. The book has a focus on the use of data in the teaching and learning of statistics across grade levels and begins with an overview of the status of statistics education and the use of data from seven different countries across the continents and the link between research and practice in those countries. Because it contains specific examples of the research, for example on the ways children learn the choice and implementation of tasks or the role of informal inference, the book will be a great resource to those interested and involved in the teaching of statistics, curriculum developers, and statistics education researchers.
