**A Century of Expansion (Classic Reprint)** Willis Fletcher Johnson, 2015-07-12 Excerpt from A Century of Expansion  
The purport of the term expansion is sometimes carelessly misunderstood It is apparently supposed to apply to nothing but acquisition of territory and to that of recent date to wit our annexation of Porto Rico and the Philippines Such a conception is inadequate and misleading Expansion is no new thing and it is not measured by any geographical scale Its history begins with the history of the nation and both its causes and its effects are intimately intertwined with almost every fibre of our national being The expansion of the human body is a process of physical growth which is maintained incessantly so long as vitality is in the ascendant When growth ceases the man begins to die Moreover it involves something far more than increase of physical bulk and stature It is accompanied by a corresponding and indeed largely consequent development of the intellectual and spiritual nature We may not say that the mind and soul are always developed commensurately with the physical body About the Publisher Forgotten Books publishes hundreds of thousands of rare and classic books Find more at [www.forgottenbooks.com](http://www.forgottenbooks.com) This book is a reproduction of an important historical work Forgotten Books uses state of the art technology to digitally reconstruct the work preserving the original format whilst repairing imperfections present in the aged copy In rare cases an imperfection in the original such as a blemish or missing page may be replicated in our edition We do however repair the vast majority of imperfections successfully any imperfections that remain are intentionally left to preserve the state of such historical works

**The Secret of Progress (Classic Reprint)** W. Cunningham, 2016-10-16 Excerpt from The Secret of Progress Buckle<sup>1</sup> regarded it as clear that militarism and high intellectual development were not compatible till recently many people were prepared to believe that warfare was alien to the interest of civilised peoples and could only occur among half civilised or backward races But this war has shown that these hopes were vain and that the last result of civilisation was not to render war impossible but to give the means of carrying it out on a vastly extended scale The increase of knowledge and of power over nature and the sense of the benefits of intercourse and inter communication have not sufficed to give us any immunity from war About the Publisher Forgotten Books publishes hundreds of thousands of rare and classic books Find more at [www.forgottenbooks.com](http://www.forgottenbooks.com) This book is a reproduction of an important historical work Forgotten Books uses state of the art technology to digitally reconstruct the work preserving the original format whilst repairing imperfections present in the aged copy In rare cases an imperfection in the original such as a blemish or missing page may be replicated in our edition We do however repair the vast majority of imperfections successfully any imperfections that remain are intentionally left to preserve the state of such historical works

***Serialization, Commercialization and the Children's Classics*** Amy Webster, 2024-12-12 An exploration of the serialization of children's classics by contemporary publishers this book digs into the impact of the practice and provides new ways of reading the corpus of British children's literature from the 20th century Amy Webster demonstrates how publishers select texts for their series which texts they omit

which outliers are sometimes included and how a core group of works from the golden age of children's literature emerged. The text also examines how texts are abridged and transformed from publisher to publisher through close readings of *The Wind in the Willows* and *Alice's Adventures in Wonderland* and how the repackaging of works within a series highlight issues and choices tied to key paratextual elements. Analysing data through distant reading and close reading of series from Ladybird Longman Puffin and Walker Illustrated editions, this book sheds light on how modern classics series are marked by variation and instability but also a reductive homogeneity. Through her use of quantitative and text-focused research, Webster reveals how commercial motivations have created a gulf between the canonical concepts of the classic and how the term functions as a marketing tool in British children's publishing. With notions of what counts as a classic compromised and complicated, this book leads the call for a critical approach towards both the term classic and to reading children's classics that acknowledges how they are tied to the commercial enterprises of the children's book business.

**Information** Ann Blair, Paul Duguid, Anja-Silvia Goeing, Anthony Grafton, 2021-01-26. A landmark history that traces the creation, management, and sharing of information through six centuries. Thanks to modern technological advances, we now enjoy seemingly unlimited access to information. Yet how did information become so central to our everyday lives, and how did its processing and storage make our data-driven era possible? This volume is the first to consider these questions in comprehensive detail, tracing the global emergence of information practices, technologies, and more from the premodern era to the present. With entries spanning archivists to algorithms and scribes to surveilling, this is the ultimate reference on how information has shaped and been shaped by societies. Written by an international team of experts, the book's inspired and original long and short-form contributions reconstruct the rise of human approaches to creating, managing, and sharing facts and knowledge. Thirteen full-length chapters discuss the role of information in pivotal epochs and regions, with chief emphasis on Europe and North America, but also substantive treatment of other parts of the world, as well as current global interconnections. More than 100 alphabetical entries follow, focusing on specific tools, methods, and concepts, from ancient coins to the office memo and censorship to plagiarism. The result is a wide-ranging, deeply immersive collection that will appeal to anyone drawn to the

*A Cultural History of Tragedy in the Age of Empire* Michael Gamer,Diego Saglia,2021-05-20 This volume traces a path across the metamorphoses of tragedy and the tragic in Western cultures during the bourgeois age of nations revolutions and empires roughly delimited by the French Revolution and the First World War Its starting point is the recognition that tragedy did not die with Romanticism as George Steiner famously argued over half a century ago but rather mutated and dispersed converging into a variety of unstable productive forms both on the stage and off In turn the tragic as a concept and mode transformed itself under the pressure of multiple social historical and political ideological phenomena This volume therefore deploys a narrative centred on hybridization extending

across media genres demographics faiths both religious and secular and national boundaries The essays also tell a story of how tragedy and the tragic offered multiple means of capturing the increasingly fragmented perception of reality and history that emerged in the 19th century Each chapter takes a different theme as its focus forms and media sites of performance and circulation communities of production and consumption philosophy and social theory religion ritual and myth politics of city and nation society and family and gender and sexuality      **The Social Sciences and Democracy** Jeroen Van
