**The Meaning Revolution** Fred Kofman, 2018-05-01 Advisor of Leadership at Google and former vice president of leadership at LinkedIn claims that the biggest driver of motivation is the chance to serve a larger purpose beyond our careers and ourselves rather than salary benefits bonuses or other material incentives companies that are able to successfully focus their people their teams and their culture around meaning outperform their competition Fred Kofman s approach to leadership has little to do with the standard practices taught in business school and traditional books Bringing together economics and business theory communications and conflict resolution family counseling and mindfulness mediation Kofman argues in The Meaning Revolution that our most deep seated unspoken and universal anxiety stems from our fear that our life is being wasted that the end of life will overtake us when our song is still unsung Material incentives salary and benefits account for perhaps 15 percent of employees motivation at work The other 85 percent is driven by a need to belong a feeling that what we do day in and day out makes a difference that how we spend our time on earth serves a larger purpose beyond just ourselves Kofman claims that transcendental leaders wherever they are in the hierarchy are able to put aside their self interests and help others to feel connected with others on a team or in an organization on a great mission and part of an ennobling purpose He argues that every organization involved in work that is nonviolent and non addictive has what he calls an immortality project at its core And the challenge for leaders is to identify and expand on that core to inspire all stakeholders to take part

Waterman EdD,2021-05-11 As we strive for good through our fear and sense of lack we inadvertently give power to a coalition that infuses cultures in a philosophy of eternal conflict and domination as a means of preserving civic order that is controlled by promises of greater good while guiding policies and actions protect and produces a world of haves and have nots The deeper impulse of the Soul to thrive and transform itself into loving is an eternal force and is unstoppable in the long run Though ominous these times embody a great opportunity for humanity to change the narrative To do so we need to rise above the inversion layer of shadows into transcendent realms and resources Prophecy portends a new day and new dawn We are that promise We live in a time that invites a vision for humanity and leadership based on integrity and spiritual awakening Remember As we incarnate into the human condition the most essential and most forgotten element of life for each of us is that we are the ones that bring love In our first breath we encounter an overwhelming challenge to identify with the world in which we find ourselves and forget the world of love from whence we came I invite you to engage in an exploration of Self that is continuous and reveals the truth of life without fear inspired by Soul and guided by love Consider perhaps that the
