assigning fifty math problems accomplish any more than assigning five. Is memorizing word lists the best way to increase vocabulary especially when it takes away from reading time? And what is the real purpose behind those devilish dioramas? The time our children spend doing homework has skyrocketed in recent years. Parents spend countless hours cajoling their kids to complete such assignments often without considering whether or not they serve any worthwhile purpose. Even many teachers are in the dark. Only one of the hundreds the authors interviewed and surveyed had ever taken a course specifically on homework during training. The truth according to Sara Bennett and Nancy Kalish is that there is almost no evidence that homework helps elementary school students achieve academic success and little evidence that it helps older students. Yet the nightly burden is taking a serious toll on America's families. It robs children of the sleep, play and exercise time they need for proper physical, emotional and neurological development. And it is a hidden cause of the childhood obesity epidemic creating a nation of homework potatoes. In *The Case Against Homework*, Bennett and Kalish draw on academic research, interviews with educators, parents and kids and their own experience as parents and successful homework reformers to offer detailed advice to frustrated parents. You'll find out which assignments advance learning and which are time wasters, how to set priorities when your child comes home with an overstuffed backpack, how to talk and write to teachers and school administrators in persuasive, nonconfrontational ways and how to rally other parents to help restore balance in your children's lives. Empowering, practical and rigorously researched, *The Case Against Homework* shows how too much work is having a negative effect on our children's achievement and development and gives us the tools and tactics we need to advocate for change. Also available as an eBook.

Journey to Literacy Krista Flemington, Linda Hart-Hewins, Una Villiers, 2011. The play-based learning and individualized strategies in this practical book build on the wide range of literacy skills present in the kindergarten classroom. This valuable resource explores simple ways to use traditional learning centres to provide children with real and authentic reasons to listen, speak, read, write and view. Teachers will find a wealth of resources for creating meaningful learning experiences including answers to often asked questions, milestones to inform teaching instruction, activities and games for both individuals and groups, literacy extensions that involve children with quality literature, authentic artifacts and recordings. This highly readable book will support teachers as they move beyond worksheets and nurture students on their journey to lifelong literacy.

Everyday Mathematics Max Bell, 2004. Contains easy to follow three part daily lesson plans. This assists teachers in focusing on lesson objectives, providing ongoing practice for all students and addressing individual student needs for a variety of populations. A unit organizer provides learning goals, planning and assessment support, content highlights, a materials chart, suggestions for problem solving, cross-curricular links and options for individualizing. Each guide is grade level specific.
