Smith, 2008 The Encyclopedia of Women in World History captures the experiences of women throughout world history in a comprehensive 4 volume work Although there has been extensive research on women in history by region no text or reference work has comprehensively covered the role women have played throughout world history The past thirty years have seen an explosion of research and effort to present the experiences and contributions of women not only in the Western world but across the globe Historians have investigated women's daily lives in virtually every region and have researched the leadership roles women have filled across time and region They have found and demonstrated that there is virtually no historical social or demographic change in which women have not been involved and by which their lives have not been affected The Oxford Encyclopedia of Women in World History benefits greatly from these efforts and experiences and illuminates how women worldwide have influenced and been influenced by these historical social and demographic changes The Encyclopedia contains over 1 250 signed articles arranged in an A Z format for ease of use The entries cover six main areas biographies geography and history comparative culture and society including adoption abortion performing arts organizations and movements such as the Egyptian Uprising and the Paris Commune women and gender studies and topics in world history that include slave trade globalization and disease With its rich and insightful entries by leading scholars and experts this reference work is sure to be a valued go to resource for scholars college and high school students and general readers alike Collage and Architecture Jennifer Shields, 2023-07-04 Collage and Architecture remains an invaluable resource for students and practitioners as the first book to cover collage as a tool for analysis and design in architecture Since entering the contemporary art world over a century ago collage has profoundly influenced artists and architects throughout the twentieth century and into the twenty first In Collage and Architecture Jennifer A E Shields explores its influence using the artworks and built projects of leading artists and architects such as Mies van der Rohe Daniel Libeskind and Teddy Cruz to illustrate the diversity of collage techniques This new edition includes A stronger focus on contemporary practices including digital methods New designers and architects including Marshall Brown WAI Architecture Think Tank and Tatiana Bilbao bringing their methods and work to life An expanded global and diverse perspective of architecture as collage Collage is an important instrument for analysis and design Through its 261 color images this book shows how this versatile medium can be adapted and transformed in your own work Jewellery in the Age of Modernism 1918-1940 Simon Bliss, 2018-11-15 Why has jewellery and body adornment often been marginalized in studies of modernist art and design This study explores the relationship between jewellery modernism and modernity from the jazz age to the second world war in order to challenge the view that these portable art forms have only a minor role to play in histories of modernism From the masterworks of the Parisian jewellery houses to the film and photography of Man Ray this study seeks to present jewellery in a new light where issues of representation and display are considered to be as

important in the creation of a modern jewellery culture as the objects themselves Drawing on material from museums archives contemporary journals memoirs literary and theoretical texts this study shows how the emergence of modern jewellery began to seriously question conventional notions of body adornment *Voiture Minimum* Antonio Amado,2011-02-11 A colorful account of Le Corbusier s love affair with the automobile his vision of the ideal vehicle and his tireless promotion of a design that industry never embraced Le Corbusier who famously called a house a machine for living was fascinated even obsessed by another kind of machine the automobile His writings were strewn with references to autos If houses were built industrially mass produced like chassis an aesthetic would be formed with surprising precision he wrote in *Toward an Architecture* 1923 In his white phase of the twenties and thirties he insisted that his buildings photographed with a modern automobile in the foreground Le Corbusier moved beyond the theoretical in 1936 entering with his cousin Pierre Jeanneret an automobile design competition submitting plans for a minimalist vehicle for maximum functionality the *Voiture Minimum* Despite Le Corbusier s energetic promotion of his design to several important automakers the *Voiture Minimum* was never mass produced This book is the first to tell the full and true story of Le Corbusier s adventure in automobile design Architect Antonio Amado describes the project in detail linking it to Le Corbusier s architectural work to Modernist utopian urban visions and to the automobile design projects of other architects including Walter Gropius and Frank Lloyd Wright He provides abundant images including many pages of Le Corbusier s sketches and plans for the *Voiture Minimum* and reprints Le Corbusier s letters seeking a manufacturer Le Corbusier s design is often said to have been the inspiration for Volkswagen s enduringly popular Beetle the architect himself implied as much claiming that his design for the 1936 competition originated in 1928 before the Beetle Amado Lorenzo after extensive examination of archival and source materials disproves this the influence may have gone the other way Although many critics considered the *Voiture Minimum* a footnote in Le Corbusier s career Le Corbusier did not This book lavishly illustrated and exhaustively documented restores Le Corbusier s automobile to the main text *Designing Reform* Cole Roskam,2021-11-30 Investigating the rich architecture of post Mao China and its broad cultural impact In the years following China s Cultural Revolution architecture played an active role in the country s reintegration into the global economy and capitalist world Looking at the ways in which political and social reform transformed Chinese architecture and how in turn architecture gave structure to the reforms Cole Roskam underlines architecture s unique ability to shape space as well as behavior Roskam traces how foreign influences like postmodernism began to permeate Chinese architectural discourse in the 1970s and 1980s and how figures such as Kevin Lynch I M Pei and John Portman became key forces in the introduction of Western educational ideologies and new modes of production Offering important insights into architecture s relationship to the politics economics and diplomacy of post Mao China this unprecedented interdisciplinary study examines architecture s multivalent status as an art science and physical manifestation of cultural identity **MoMoWo.
