## **Charting Chinas Future Domestic And International Challenges 2011 08 11:**

*Forecasting China's Future* Roger Irvine, 2015-06-26 China's future development is likely to have a huge impact on twenty first century global outcomes. It is therefore surprising that thus far so little attention has been given to comparing and evaluating expert forecasts of China's future in the post Mao era. This book presents an illuminating and comprehensive summary record of contrasting and competing expert forecasts and judgements about the major issues confronting China within four principal domains: political, economic, environmental and international. After considering the principal forecasting methods available to experts, the author comments critically on the degree of success achieved in using those methods and emphasises the confusion created by the polarisation of opinion and by the failure of many experts to accept the high degree of uncertainty that characterises most of the key issues. The book recommends a new approach based on the study of a hierarchy of critical uncertainties and on continuing analysis of opposing expert opinions about these uncertainties. It emphasises the potential for both positive and negative outcomes for these critical uncertainties and the importance of maximising the potential for positive outcomes through improved analytical and policy frameworks. Providing insights for specialists and non specialists into the most critical issues that will determine China's future direction, this book will be of particular interest to students and scholars of political, economic, environmental and international relations issues in China and Asia, as well as to readers in business and government.

**Critical Readings on the Communist Party of China (4 Vols. Set)** Kjeld Erik Brodsgaard, 2016-12-12 The Chinese Communist Party (CCP) with nearly 90 million members is the largest ruling political party in the world. Its power and influence reach into every corner of state, society and economy in China. Given the CCP's omnipresence, depth of knowledge of how the CCP is organised and managed and how it will likely evolve is of paramount importance and is a basic prerequisite for understanding China's rise. By bringing together the best scholarship on the CCP covering areas such as organisation, cadre management, recruitment and training, ideology and propaganda, factions and elites, reform and adaptation, corruption and law, this collection provides a key to open the black box of Chinese politics.

**China's Challenge to US Supremacy** John G. Glenn, 2017-02-27 This book analyzes China's development in the wider context of the global trade, investment, security, knowledge and production regimes established by the United States. It argues that although China has thus far been able to enjoy rapid growth within this global architecture, it will have to deal with a more challenging external environment as other states react to its rise. More specifically, it is facing growing pressure to realign its currency, a greater number of trade, investment and intellectual property disputes, a more hostile security environment and exclusionary regional Trans-Pacific and Trans-Atlantic trade agreements. It is also being confronted by an array of internal issues, from an ageing population and weaknesses in the high tech sector to over reliance on foreign companies for exports, non performing loans and a burgeoning state debt. This in turn has led an increasing number of firms to relocate to other countries. For the time being, the author concludes, China's global ambitions and

challenge to US supremacy will have to be scaled back This insightful work will appeal to students and scholars of China's politics economy and development      China Goes Global David Shambaugh,2013-01-18 Most global citizens are well aware of the explosive growth of the Chinese economy Indeed China has famously become the workshop of the world Yet while China watchers have shed much light on the country's internal dynamics China's politics its vast social changes and its economic development few have focused on how this increasingly powerful nation has become more active and assertive throughout the world In *China Goes Global* eminent China scholar David Shambaugh delivers the book that many have been waiting for a sweeping account of China's growing prominence on the international stage Thirty years ago China's role in global affairs beyond its immediate East Asian periphery was decidedly minor and it had little geostrategic power Today however China's expanding economic power has allowed it to extend its reach virtually everywhere from mineral mines in Africa to currency markets in the West to oilfields in the Middle East to agribusiness in Latin America to the factories of East Asia Shambaugh offers an enlightening look into the manifestations of China's global presence its extensive commercial footprint its growing military power its increasing cultural influence or soft power its diplomatic activity and its new prominence in global governance institutions But Shambaugh is no alarmist In this balanced and well researched volume he argues that China's global presence is more broad than deep and that China still lacks the influence befitting a major world power what he terms a partial power He draws on his decades of China watching and his deep knowledge of the subject and exploits a wide variety of previously untapped sources to shed valuable light on China's current and future roles in world affairs      **Sino-Japanese Relations After the Cold War** Michael Yahuda,2013-10-01 Since the end of the Cold War China and Japan have faced each other as powers of relatively equal strength for the first time in their long history As the two great powers of East Asia the way they both compete and cooperate with each other and the way they conduct their relations in the new era will play a big part in the evolution of the region as a whole This textbook will explore in detail the ways in which politics has shaped the thinking about history and identity in both China and Japan and explain the role political leadership in each country has played in shaping their respective nationalisms Michael Yahuda traces the evolution of the relationship over the two decades against the framework of a rising China gaining ground on a stagnant Japan and analyzes the politics of the economic interdependence between the two countries and their cooperation and competition in Southeast Asia and in its regional institutions Concluding with an examination of the complexities of their strategic relations and an evaluation of the potentialities for conflict and co existence between the two countries this is an essential text for students and scholars of Sino Japanese and East Asian International Relations      *The Subtle Logics of Knowledge Conflicts in China's Foreign Enterprises* Constanze Wang,2016-05-04 This book investigates knowledge interactions in China's foreign enterprises It reveals that cultural differences strongly account for knowledge related obstacles namely knowledge leakage and insufficient knowledge sharing Contrary to conventional wisdom however widespread cultural arguments such as Confucianism or

collectivism hardly apply to Chinese employees handling of knowledge In fact more subtle cultural logics are relevant in daily work which are connected to the perceived stability of the enterprise itself But these usually go unnoticed Thus rather than being distracted by a national Chinese culture managers can take real action to solve knowledge conflicts in their particular enterprise

**A Cautious New Approach** Denghua Zhang, 2020-03-20 As a student of international relations and a former diplomat Zhang brings the insights of a practitioner and the eye of scholar to explain why Chinese actors choose to engage in aid cooperation with traditional donors in the Asia Pacific This book is among the first to take a holistic approach to understanding the motivations of the many agencies involved in China's aid program and it will challenge the expectations of many readers Dr Graeme Smith The Australian National University This book breaks new ground by examining a little known dimension of China's foreign policy trilateral aid cooperation Denghua Zhang sets this highly original analysis in the context of the new assertiveness of Chinese foreign policy under Xi Jinping the China International Development Cooperation Agency established in 2018 and the Belt and Road Initiative which now serves as the framework for Chinese overseas aid and engagement At a time when the debate in the West about the rise of China has intensified not always knowledgeably this book fills an important gap in our understanding of China in Southeast Asia and the Pacific Dr Stewart Firth The Australian National University This thoroughly researched work examines trilateral cooperation as a new and interesting aspect of China's growing international aid program and as a window into the changing nature of that program as well as the wider foreign policy in which it is embedded The broad themes and topics discussed are clearly significant ultimately touching on one of the most important international issues of our time the implications of the rise of China for a long established Western dominated international system Prof Terence Smith Wesley University of Hawaii

**Worldviews of Aspiring Powers** Henry R. Nau, Deepa M. Ollapally, 2012-10-03 Worldviews of Aspiring Powers provides a serious study of the domestic foreign policy debates in five world powers who have gained more influence as the US's has waned China Japan India Russia and Iran Featuring a leading regional scholar for each essay each essay identifies the most important domestic schools of thought nationalists realists globalists idealists exceptionalists and connects them to the historical and institutional sources that fuel each nation's foreign policy experience While scholars have applied this approach to US foreign policy this book is the first to track the competing schools of foreign policy thought within five of the world's most important rising powers Concise and systematic Worldviews of Aspiring Powers will serve as both an essential resource for foreign policy scholars trying to understand international power transitions and as a text for courses that focus on the same

*Social Mobilisation in Post-Industrial China* Jia Gao, Yuanyuan Su, 2019 In recent years China has experienced intense economic development Previously a rapidly urbanising industrial economy the country has become a post industrial economy with a service sector that accounts for almost half the nation's GDP This transformation has created many socio political changes but key among them is social mobilisation This book provides a full and systematic analysis of social mobilisation in China and how its use as

part of state capacity has evolved      *China's Foreign Policy Contradictions* Tim Nicholas Rühlig, 2022 China's rise to great power status is indisputable but can it shape the future international order This question remains widely debated because China's foreign policy is contradictory Contrary to conventional wisdom this book shows that China does not act from a position of strength but that foreign policy contradictions are the result of the domestic vulnerabilities of the ruling Chinese Communist Party Providing exceptional insights into the considerations behind the opaque institutional structures of Chinese foreign policymaking and decision making it shows that China will not provide a model for a new international system but could undermine the existing order      **China** Gungwu Wang, Yongnian Zheng, 2013 China has achieved significant socio economic progress and has become a key player on the international stage after several decades of open door and reform policy Looking beyond China's transformation this book focusses on the theme of governance which is widely regarded as the next most critical element to ensure that China's growth remains sustainable Today China is confronted with a host of pressing challenges that call for urgent attention These include the need to rebalance and restructure the economy the widening income gaps the poor integration of migrant populations in the urban areas insufficient public housing and healthcare coverage the seeming lack of political reforms and the degree of environmental degradation In the foreign policy arena China is likewise under pressure to do more to address global concerns while not appearing to be overly aggressive The next steps that China takes would have a great deal to do with governance in terms of how it tackles or fails to address the myriad of challenges both domestic and foreign China Development and Governance with 57 short chapters in total is based on up to date scholarly research written in a readable and concise style Besides China's domestic developments it also covers China's external relations with the United States Japan Korea and Taiwan Non specialists in particular should find this volume accessible and useful in keeping up with fast changing developments in East Asia      **COVID-19** **"Humanitarianism"** Mariya Omelicheva, Brittnee Carter, 2024-04-30 What motivates states to assist other countries in need Focusing on Chinese Russian and American decisions about COVID 19 aid this book illuminates the role of historically contingent ideas in donors decisions Drawing on the theoretical insights of the critical geopolitics tradition it advances and tests explanations for aid related decisions on a novel global dataset of COVID 19 aid Rigorously theorized meticulously researched and accessibly written this book illuminates the ways in which China and Russia seek to reshape the humanitarian field consistent with their geopolitical visions Their competition with the US over approaches to aid has weakened the integrity of humanitarian system      **China Conference on Knowledge Graph and Semantic Computing and International Joint Conference on Knowledge Graphs** Bin Xu, Bing Qin, Yannis Tzitzikas, Zhichun Wang, Xian-Ling Mao, Ming Liu, Pavlos Fafalios, Yongbin Liu, Zhiliang Tian, Michalis Mountantonakis, 2025-03-08 This book constitutes the joint refereed proceedings of the 18th China Conference on Knowledge Graph and Semantic Computing and the 13th International Joint Conference on Knowledge Graphs CCKS IJCKG 2024 held in Chongqing China during September 20-22 2024 The 30 full

*Shaping U.S. Military Forces for the Asia-Pacific* Michael R. Kraig, 2014-06-04. The first twenty years of post Cold War US defense and diplomatic policies toward Asia have looked a good deal like the previous 50, namely continued deterrence based upon overwhelming offensive military predominance. In East Asia, all powers harbor common and divergent interests based on fragmented nationalist identities and complex economic interdependence. In this multipolar Asian system, new Chinese military capabilities could support both the wish to secure its own interests as well as a more expansive vision for regional leadership, which might harbor a destabilizing geopolitical agenda. How the United States addresses this reality via military procurements and employment concepts for the Asian theater could either detract from or enhance crisis stability. The US defense establishment must reorient its force posture to save money, manage conflicts of interest, and prevent future interstate crises. This analysis provides a framework for how the United States should ideally structure and use military power so as to best support the diplomatic resolution of conflicting interests without resorting to full scale warfare. It also critiques the usual Western military focus on offensive strategic predominance, in force postures itself often fuelled by the unrealistic pursuit of the opponent's complete submission via victory in decisive battles.
