Standards Organization is a worldwide standard setting group headquartered in Geneva and ANSI the American National Standards Institute is the USA's representative to ISO. CompTIA has been accredited by ANSI for compliance with the ISO standard that applies to operating a certification body or organization and CompTIA must maintain certain quality levels in order to maintain that accreditation. That's a bit of background on CompTIA and the Network certification. But who might benefit from this credential? Well, anyone wanting to be hired on by a company that requires it certainly, but more broadly anybody pursuing a career in tech support for example as a help desk analyst, service desk analyst or a desktop support technician. Field service techs will also find the credential helpful as will those who aspire to being a network engineer or a documentation specialist in IT.
