Marse H. D. Kirkpatrick, 2022-02-15 *Marse A Psychological Portrait of the Southern Slave Master and His Legacy of White Supremacy* focuses on the white men who composed the antebellum southern planter class in the period of 1830-1861. This book is a psychological autopsy of the minds and behaviors of enslavers that helps explain the enduring roots of white supremacy and the hidden wound of racist slavery that continues to affect all Americans today. Marse details and illustrates examples of the psychological mechanisms by which southern slave masters justified owning another human being as property and how they formed a society in which enslavement was morally acceptable. Kirkpatrick uses forensic psychology to analyze the personality formation, defense mechanisms, and psychopathologies of slave masters. Their delusional beliefs and assumptions about Black Africans extended to a forceful cohort of white slaveholding women as well as how they twisted Christianity to promote slavery as a positive good. He examines the masters' stresses and fears and how they coped by developing psychologically fatal slavery-specific defense mechanisms. Utilizing sources such as the vast treasure trove of slavery historiography, diaries, letters, autobiographies, and sermons, Marse describes the ways in which slaveholders created a delusional worldview that sanctioned cruel instruments of punishment and implemented laws and social policies of domination used to rob Blacks of their human rights. The seismic shift in race relations our nation is experiencing right now makes this book timely as it will advance our understanding of the South's self-defeating romance with racist slavery and its latent and chronic effects. The parallels between the psychology of antebellum slaveholding and today's racism are palpable.

The Photographer and the President Richard Lowry, 2015-05-26 A new angle on Lincoln and his legacy exploring the rich and suggestive dialogue between art, image, and politics at the time of the Civil War. Abraham Lincoln was one of the most photographed figures of his century. Richard Lowry explores Lincoln's association with Alexander Gardner, the man who would create the most memorable and ultimately iconic images of the president both in his studio and on the battlefields of the Civil War. Lowry's book is an accessible and lively narrative of this symbiotic relationship and an examination of the emerging role of the media at a moment of national transformation. Lincoln was an early adopter of photographic technology and visionary in how he used it, as FDR was with radio, JFK with television, and Obama with the internet. By highlighting this very modern aspect of such a storied presidency, Lowry opens a new door on Lincoln's relationship to politics and celebrity, just as the mass culture of the image was taking root in America. *The North Carolina Historical Review*, 2011 [Black](#)
