Development Bank,2022-03-01 Nearly 40% of the world s population use open fires or simple stoves that burn wood or coal for heating The inefficient combustion of these solid fuels deteriorates air quality causes severe health problems and generates significant carbon dioxide emissions The impacts are aggravated in peri urban and rural communities that lack access to clean district heating options There is a need to identify and deploy appropriate decentralized clean heating solutions to replace coal based heating This publication presents an overview of clean heating technologies and the results of a pilot in northern People s Republic of China The country s clean heating policy framework and the lessons learned from the online clean heating monitoring platform can guide the development of similar tools The report provides recommendations in developing clean heating programs to stimulate market transformation toward more efficient and low carbon heating

The 100% Solution Solomon Goldstein-Rose,2020-03-31 At last a global plan that actually adds up James Hansen former

director NASA Goddard Institute for Space Studies The world must reach negative greenhouse gas emissions by 2050 to avoid the most catastrophic effects of climate change Yet no single plan has addressed the full scope of the problem until now In *The 100% Solution* Solomon Goldstein Rose a leading millennial climate activist and a former Massachusetts state representative makes clear what needs to happen to hit the 2050 target the manufacturing booms we must spur the moonshot projects we must fund the amount of CO₂ we ll have to sequester from the atmosphere and much more Most importantly he shows us the more prosperous and equitable world we can build by uniting the efforts of activists industries governments scientists and voters to get the job done This is the guide we ve been waiting for As calls for a WWII scale mobilization intensify especially among youth activists this fully illustrated action oriented book arms us with specific demands sets the stakes for what our leaders must achieve and proves that with this level of comprehensive thinking we can still take back our future

Beyond Climate Fixes Les Levidow, 2023-05-09 Political elites have been evading the causes of climate change through deceptive fixes Their market type instruments such as carbon trading aim to incentivise technological innovation which will supposedly decarbonize or replace dominant high carbon systems In practice this techno market framework has perpetuated climate change and social injustices thus provoking public controversy Using this opportunity social movements have counterposed low carbon resource light socially just alternatives Such transformative mobilisations can fulfil the popular slogan System Change Not Climate Change This book develops key critical concepts through case studies such as GM crops biofuels waste incineration and Green New Deal agendas Embracing the Future, Powering Growth: An Energy System Renewed for China Shell International B.V., *Climate change* Great Britain: Parliament: House of Commons: Environment, Food and Rural Affairs Committee, 2007-09-13 Incorporating HC 1688 session 2005 06

Investments to Improve the Energy Efficiency of Existing Residential Buildings in Countries of the Former Soviet Union Eric Martinot, 1997-01-01 In the 1990s the issue of human resource development in Malaysia has gained prominence in public and private policy circles Discussions center around training policy where there are concerns about acute labor shortages and around industrial development policy which strives to maintain a skilled and well trained workforce to increase competitiveness and attract foreign direct investment But policymakers have been forced to make critical decisions on resource allocation and to design policies without access to comprehensive training data especially from the private sector This usually results in supply oriented policies stemming from mismatches between skills supplied by public training institutions and those actually needed by industry This report attempts to fill this information gap on private sector training as an aid in formulating training policies that are more demand driven The report contains rigorous analysis of private sector led training and addresses the issue of whether firms in Malaysia underinvest in training Data came from the Malaysia Economic Planning Units 1994 95 survey and analysis of 2 200 manufacturing firms The survey elicited information on firm sponsored training and on a wide range of firm attributes including size industry local or foreign

ownership equipment technology quality control systems markets and exports workforce characteristics wages and other compensation and production The data document for the first time the incidence and characteristics of training in Malaysian industry across firms of different sizes ownership and output profiles The data create an unprecedented opportunity to study the critical links between training new technology and quality control A joint publication of the World Bank the United Nations Development Programme and the Malaysia Economic Planning Unit

An Introduction to Thermogeology David Banks, 2009-01-26 The use of the heat stored in the shallow subsurface for space heating ground source heat is widely used in North America and many European nations such as Sweden and is regarded as the most important and reliable green space heating technology In many nations including Britain the technology remains poorly understood and under used This situation is about to change however with the UK market for ground source heat pumps growing at over 100% per annum This book offers practical guidance and will equip engineers planners and geologists with the fundamental skills to assess and implement this new technology and to introduce them to the science behind thermogeology

South Africa's Energy Transition Tobias Bischof-Niemz, Terence Creamer, 2018-07-11 South Africa s energy transition has become a highly topical emotive and politically contentious topic Taking a systems perspective this book offers an evidence based roadmap for such a transition and debunks many of the myths raised about the risks of a renewable energy led electricity mix Owing to its formidable solar and wind resources South Africa has an almost unparalleled opportunity to turn solar photovoltaic and onshore wind generators into the country s power generation workhorses a role hitherto played by coal This book shows that a renewables led mix will not only provide the lowest cost but will also create more jobs than any of the alternatives currently under consideration In addition it offers a

glimpse of how South Africa's low cost and decarbonised electricity system can power a competitive industrial economy an electric mobility revolution and in the long run create new export opportunities This book will be of great interest to energy industry practitioners as well as students and scholars of energy policy and politics environmental economics and sustainable development **Economics and Politics of Energy** Behram N. Kursunogammalu, Stephan L. Mintz, Arnold

Perlmutter, 2007-11-23 The 1995 conference was organized around two closely related themes and focused on the two pivotal aspects of energy that is economics and politics both of which are decisive in providing long term national and international strategies for the next century Originally the program was going to include the participants from the new oil powers in Central Asia and Caucasus newly independent from the former U S S R However probably both economics and politics prevented their participation Global energy projections technological changes such as nuclear power and the fuel geopolitics of the coming century will be the basis for political and strategic planning Based on the scenarios of likely global economic and population growth and of new energy technologies what are foreseeable scenarios for the geopolitics of energy a half century ahead What fresh worldwide systems should we start now The political problems with profound economic impact could include for example the significance of the continuing worldwide growth of nuclear power with such issues as the use of Highly Enriched Uranium HEU and Plutonium obtained from the dismantling of U S and former U S S R nuclear weapons the urgency of nonproliferation the disposal of civilian and military nuclear waste and nuclear power alternatives In spite of U S reluctance the increasing role of nuclear power is becoming apparent in several countries and its potential has become an important political factor today
