Guiding Students from Cheating and Plagiarism to Honesty and Integrity Ann Lathrop, Kathleen Foss, 2005-10-30 In the past it was the struggling student who was more likely to cheat just to get by Today above average college bound students are just as likely to do so This sequel to the eye opening *Student Cheating and Plagiarism in the Internet Era A Wake Up Call* 2000 is a call to arms for students teachers administrators librarians and parents to transpose school culture from one that ignores or tolerates cheating into one where every effort is made to value encourage and support honesty First person accounts lend credence to a cornucopia of practical ideas and actions No home school or library should be without at least one copy *Cheating* continues to be a national epidemic Here Lathrop and Foss have produced a sequel to their 2000 eye opener *Student Cheating and Plagiarism in the Internet Era A Wake Up Call* But where the first volume focused on honor codes and careful monitoring of student tests and written assignments their latest work is a call to arms students teachers

administrators librarians and parents must make a concerted effort to change school culture from one that ignores or tolerates cheating into one where every effort is made to value encourage and support honesty Each chapter offers quick and easy access to practical ideas and actions that can be taken off the page and into the classroom or home situation Among these first person accounts dominate with such compelling themes as Why I Didn't Cheat Policies That Support Honest Students and Student Whistleblowers It is a myth that the struggling students are the ones who are more likely to cheat just to get by The above average college bound students are just as likely to do so as they compete for scholarships and college admission No home school or library should be without at least one copy of this book

Cheating Among High School Students with Reference to the Effects of the Week-day School of Religious Instruction Hollis Duvall Kemper, 1931 *Education's Flashpoints* Jim Dueck, 2014-12-05 The education system is dealing with a concerted effort at making it more accountable and transparent Whereas measurement of a quality education used to focus on inputs such as money spent the new measurement is focused on student outcomes such as learning success determined by large scale standardized tests This change in perspective assesses personnel and system performance using empirical data rather than perceptual information Transparent access to data regarding student learning is uncomfortable to teachers unions because it is difficult to explain away objective information Their substantial success in reducing teacher workload and limiting management s activity is predicated on persuading the public that they are focused on students In reality teachers are their clients and students are frequently disadvantaged as the unions pursue a less work more pay objective Many politicians are complicit in this pursuit

because they are reticent to embrace reform when confronted by such a powerful special interest When considering issues which pit student best interests with those of teachers governments frequently side with teachers because they can vote whereas students cannot Flashpoints emerge as data is introduced into the process for making decisions **Library of Congress Subject Headings** Library of Congress,2010 **Academic Integrity in Canada** Sarah Elaine Eaton,Julia Christensen Hughes,2022-03-03 This open access book presents original contributions and thought leadership on academic integrity from a variety of Canadian scholars It showcases how our understanding and support for academic integrity have progressed while pointing out areas urgently requiring more attention Firmly grounded in the scholarly literature globally it engages with the experience of local practitioners It presents aspects of academic integrity that is specific to Canada such as the existence of an honour culture rather than relying on an honour code It also includes Indigenous voices and perspectives that challenge traditional understandings of intellectual property as well as new understandings that have arisen as a consequence of Covid 19 and the significant shift to online and remote learning This book will be of interest to senior university and college administrators who are interested in ensuring the integrity of their institutions It will also be of interest to those implementing university and college policy as well as those who support students in their scholarly work
