

### Alternative Method

Illustration 10

If the alternative method is used, the cable length should be between 50 degrees and 60 degrees.

**Notes:** Use only the specified location for tying down the machine. Do not use any other location in order to tie down the machine.

Never tie directly at all four locations. These chains are used at the front and behind the machine.

Consult your CAT dealer for shipping instructions for your machine.

### Towing Information

#### Machine Retrieval

Model Code 1000

After machine is placed, the machine should be lifted onto a trailer in order to be transported. Refer to Operation and Maintenance Manual, "Lifting and Tying Down the Machine" for the lifting procedure.

If the machine cannot be lifted, use the following procedure in order to remove the machine.

Illustration 11

When using a crane or hoist to lift the machine, the crane should be positioned at the rear of the machine.

Illustration 12

The machine should be lifted by the front of the machine. Do not use the front of the machine to lift the machine.

When lifting in order to position the machine, it should be lifted.

If a single line is used to lift the machine, then the line must be positioned at 10 to 15 degrees. If two lines are used to lift the machine, then each line must be positioned at 10 to 15 degrees.

Do not position a maximum pull angle of 30 degrees or other position.

Attach the line to the hoisting point. Two hoisting points (1) are located at the front of the machine and two hoisting points (2) are located at the rear of the machine. Do not attach the line to any other point on the machine.

#### NOTES

Do not attach the line to any other hoisting point when you are attaching the machine. Use only hoisting points. Damage to the machine may occur.
