John Loui Porathur,Pijush Pal Roy,Baotang Shen,Shivakumar Karekal,2017-07-06 This comprehensive technical book on highwall mining covers theory and practice coupled with practical examples and design aspects It contains eight extensive chapters elaborating broad spectrum functionalities of highwall mining and its operational aspects covering world scenario economic potential methods of coal extraction design methodology including empirical web pillar design numerical modelling for stress analysis safety factor for web pillars panel and barrier design small and large scale numerical modelling multiple seam interaction and design coal web pillar strength equivalent width concept laboratory testing new web pillar strength formula effect of weak bands in coal seam slope stability safety and ground monitoring hazards and regulatory requirements case examples norms and guidelines for practice It also summarizes the results of research carried out by the CSIR Central Institute of Mining and Fuel Research CSIR CIMFR India and the Commonwealth Scientific and Industrial Research Organisation CSIRO Australia on the subject The book will equip readers in understanding the complex multiple seam scenarios for highwall mining and its design for maximum coal recovery from any given site with better economics which will aid the mining companies in extracting locked up coal following the safety norms to avoid hazards and minimise instability issues A large number of case studies is included to illustrate the application of numerical modelling for prior estimation and viability of highwall mining operations under varying geomining conditions The book will be of interest to professionals and academics in the field of mining engineering specifically but will also interest civil geomechanical and geological engineers as well as rock mechanics professionals *Modeling And Electrothermal Simulation Of Sic Power Devices: Using Silvaco® Atlas* Bejoy N Pushpakaran,Stephen B Bayne,2019-03-22 The primary goal of this book is to provide a sound understanding of wide bandgap Silicon Carbide SiC power semiconductor device simulation using Silvaco ATLAS Technology Computer Aided Design TCAD software Physics based TCAD modeling of SiC power devices can be extremely challenging due to the wide bandgap of the semiconductor material The material presented in this book aims to shorten the learning curve required to start successful SiC device simulation by providing a detailed explanation of simulation code and the impact of various modeling and simulation parameters on the simulation results Non isothermal simulation to predict heat dissipation and lattice temperature rise in a SiC device structure under switching condition has been explained in detail Key pointers

including runtime error messages code debugging implications of using certain models and parameter values and other factors beneficial to device simulation are provided based on the authors experience while simulating SiC device structures This book is useful for students researchers and semiconductor professionals working in the area of SiC semiconductor technology Readers will be provided with the source code of several fully functional simulation programs that illustrate the use of Silvaco ATLAS to simulate SiC power device structure as well as supplementary material for download Related Link s

Routledge Encyclopedia of Translation Technology Chan Sin-wai,2014-11-13 The Routledge Encyclopedia of Translation Technology provides a state of the art survey of the field of computer assisted translation It is the first definitive reference to provide a comprehensive overview of the general regional and topical aspects of this increasingly significant area of study The Encyclopedia is divided into three parts Part One presents general issues in translation technology such as its history and development translator training and various aspects of machine translation including a valuable case study of its teaching at a major university Part Two discusses national and regional developments in translation technology offering contributions covering the crucial territories of China Canada France Hong Kong Japan South Africa Taiwan the Netherlands and Belgium the United Kingdom and the United States Part Three evaluates specific matters in translation technology with entries focused on subjects such as alignment bitext computational lexicography corpus editing online translation subtitling and technology and translation management systems The Routledge Encyclopedia of Translation Technology draws on the expertise of over fifty contributors from around the world and an international panel of consultant editors to provide a selection of articles on the most pertinent topics in the discipline All the articles are self contained extensively cross referenced and include useful and up to date references and information for further reading It will be an invaluable reference work for anyone with a professional or academic interest in the subject

Evaluation of Emission Control Strategies for the 8-hour Ozone Standard in the Houston and Dallas Areas and a Pilot-scale Study of In-use Emissions from Heavy-duty Diesel Dump Trucks Using a Portable Emissions Monitoring System (PEMS) ,2006 This project had two primary objectives The first objective was to examine the relative effectiveness of potential new emission control measures primarily from mobile sources on 1 hour and 8 hour ozone concentrations and population exposure metrics in the Houston and Dallas areas The second objective was to conduct a pilot scale study to examine how portable emissions monitoring system PEMS technology can be used to characterize exhaust emissions from heavy duty diesel vehicles and equipment during real world driving conditions The overall goal of the research was to provide a foundation for effective transportation and air quality policy decisions in eastern Texas A total of 38 modeling simulations were conducted to examine a range of emission control strategies
