the 1975 Cryogenic Engineering Conference this series enters the third decade of presenting the latest advances in the field of cryogenic engineering The 1975 Cryogenic Engineering Conference also marked the first time the meeting had been held outside the territorial limits of the United States Based on the enthusiastic response of the attendees and the exemplary hospitality of the Canadian hosts it certainly will not be the last meeting to convene beyond the confines of the fifty states The Cryogenic Engineering Conference Board is extremely grateful to The Royal Military College of Canada and Queen's University for the invitation to hold this meeting in Kingston Ontario Canada The assistance of A C Leonard and his staff added immeasurably in making this visit to Canada both a pleasant and a memorable one The 1975 Cryogenic Engineering Conference was the first meeting of this group on the new biennial conference schedule Since the last conference in 1973 the Western Hemisphere has experienced the impact of various energy shortages Thus it was appropriate that the theme Cryogenics Applied to Natural Resource Management for this Conference was not only timely but also an opportunity for the scientific community engaged in cryogenic activities to review the role of cryogenics in meeting these new challenges and problems facing the energy deficient nations of the world The Cryogenic Engineering Conference was also pleased to have the International Cryogenic Materials Conference join them in this meeting

deal with peak loads The liquid is 1 600 the volume of the gas but it requires storage at an extremely low temperature 1 260 F This worked well until 1944 when a liquid natural gas LNG tank in Cleveland ruptured and caused a fire with 130 fatalities The fire did not end the industry but caused it to pause Over the next few years the problems in materials design standards and siting were solved The recognition that liquefaction made LNG transportable without a pipeline was the breakthrough In 1959 a shipload of LNG went from Louisiana to Britain and restarted the LNG industry It is now a major worldwide energy industry and the topic of this work **U.S. News & World Report** ,1958-04 *Annual Report on the Administration of the Natural Gas Pipeline Safety Act* United States.
