Manga and Anime Go to Hollywood Northrop Davis, 2015-12-17 The media industries in the United States and Japan are similar in much the same way: animals on earth share a similar DNA, but while a horse and a kangaroo may be 95% related on a biological level, they are also very different. This is the way it is with manga/anime in Japan and Hollywood animation movies/TV. Although sharing some key common origins, they developed mostly separately but influenced each other significantly along the way. That confluence is now accelerating into new forms of hybridization that will drive much of future storytelling/entertainment. Understanding these common and divergent DNA origins, the cross-influences and the independent traits is one of many reasons why this book is so important. Through original interviews with top creators in these fields and illuminating case studies including adaptations of Japanese mangas and animes for Hollywood remakes, *Manga and Anime Go to Hollywood* analyzes the specific dynamics of this confluence between Japanese manga/anime and American film/animation and television. In addition, it shows how to use this knowledge creatively to shape the future of global narrative storytelling, including through the educational system. It is a fascinating read to any reader with an interest in the inter-related history of Japanese

manga anime and Hollywood since the Meiji period through WW2 what is happening on the cutting edge right now and into the future
