Debris-flow Hazards and Related Phenomena Matthias Jakob, Oldrich Hungr, 2007-12-26 With climate change and deforestation debris flows and debris avalanches have become the most significant landslide hazards in many countries In recent years there have been numerous debris flow avalanches in Southern Europe South America and the Indian Subcontinent resulting in major catastrophes and large loss of life This is therefore a major high profile problem for the world s governments and for the engineers and scientists concerned Matthias Jakob and Oldrich Hungr are ideally suited to edit this book Matthias Jakob has worked on debris flow for over a decade and has had numerous papers published on the topic as well as working as a consultant on debris flow for municipal and provincial governments Oldrich Hungr has worked on site investigations on debris flow avalanches and rockfall with emphasis on slope stability analysis and evaluation of risks to roads in built up areas He has also developed mathematical models for landslide dynamic analysis They have invited world renowned experts to joint them in this book

Progress in Landslide Science Kyoji Sassa, Hiroshi. Fukuoka, Fawu Wang, Gonghui Wang, 2007-12-29 This book presents current progress in landslide science and consists of four parts 1 Progress in Landslide Science 2 Landslide Dynamics 3 Landslide Monitoring and 4 Landslide Risk Assessment It provides useful information to academics practitioners and government officers working on landslide risk mitigation planning This book can be also used as an introductory textbook for college students who wish to learn fundamental scientific achievements in the field of landslide disaster reduction

Montology Palimpsest Fausto O. Sarmiento, 2023-01-01 This book introduces an innovative approach to sustainable and regenerative mountain development Transdisciplinary to biophysical and biocultural scales it provides answers to the what when how why and where that researchers question on mountains including the most challenging So What Forwarding thinking in its treatment of core subjects this decolonial non hegemonic volume inaugurates the Series with contributions of seasoned montologists and invites the reader to an engaging excursion to ascend the rugged topography of paradigms with the scaffolding hike of ambitious curiosity typical of mountain explorers Chapter 8 is available open access under a Creative Commons Attribution 4 0 International License via link [springer.com](https://www.springer.com)

Advances in Debris-flow Science and Practice Matthias Jakob, Scott McDougall, Paul Santi, 2024-03-28 This book provides a summary of the state of the art of all facets of debris flow science and practice and is designed to be a comprehensive technical reference for practitioners and a state of the art research overview for scientists It is richly illustrated with equations graphs photos and tables The book allows students practitioners and regulators to get a sense of the current state of the art in this science Currently there are 2 to 3 papers published every week on some aspects of debris flow science This creates a bewildering amount of literature that cannot be captured by a single individual This book provides a comprehensive overview of all facets to date including initial hazard assessments detailed quantitative risk assessments debris flow warning systems debris flow mitigation structure designs and failures of mitigation works as well as

new topics such as climate change effects on debris flows Dating Torrential Processes on Fans and Cones Michelle Schneuwly-Bollschweiler, Markus Stoffel, Florian Rudolf-Miklau, 2012-07-15 This book provides a detailed overview on methods used for the dating of past torrential activity on fans and cones and fosters the discussion on the impact of past and potential future climate change on torrential processes The book has a clear focus on the practical applications of these methods complemented by case studies The limits of each dating method in case of excessive natural and human interventions on fans and cones are shown **Natural Hazard Uncertainty Assessment** Karin Riley, Peter Webley, Matthew Thompson, 2016-11-15 Uncertainties are pervasive in natural hazards and it is crucial to develop robust and meaningful approaches to characterize and communicate uncertainties to inform modeling efforts In this monograph we provide a broad cross disciplinary overview of issues relating to uncertainties faced in natural hazard and risk assessment We introduce some basic tenets of uncertainty analysis discuss issues related to communication and decision support and offer numerous examples of analyses and modeling approaches that vary by context and scope Contributors include scientists from across the full breath of the natural hazard scientific community from those in real time analysis of natural hazards to those in the research community from academia and government Key themes and highlights include Substantial breadth and depth of analysis in terms of the types of natural hazards addressed the disciplinary perspectives represented and the number of studies included Targeted application centered analyses with a focus on development and use of modeling techniques to address various sources of uncertainty Emphasis on the impacts of climate change on natural hazard processes and outcomes Recommendations for cross disciplinary and science transfer across natural hazard sciences This volume will be an excellent resource for those interested in the current work on uncertainty classification quantification and will document common and emergent research themes to allow all to learn from each other and build a more connected but still diverse and ever growing community of scientists Read an interview with the editors to find out more <https://eos.org/editors-vox-reducing-uncertainty-in-hazard-prediction> *Transboundary Water Resources in Afghanistan* John F. Shroder, Sher Jan Ahmadzai, 2016-06-13 Transboundary Water from Afghanistan Climate Change and Land Use Implications brings together diverse factual material on the physical geography and political cultural and economic implications of Southwest Asian transboundary water resources It is the outgrowth of long term deep knowledge and experience gained by the authors as well as the material developed from a series of new workshops funded by the Lounsbery Foundation and other granting agencies Afghanistan and Pakistan have high altitude mountains providing vital water supplies that are highly contentious necessities much threatened by climate change human land use variation and political manipulation which can be managed in new ways that are in need of comprehensive discussions and negotiations between all the riparian nations of the Indus watershed Afghanistan China India and Pakistan This book provides a description of the basic topographic configuration of the Kabul River tributary to the Indus river together with all its tributaries that flow back and forth across the border between

Afghanistan and Pakistan and the basic elements that are involved with the hydrological cycle and its derivatives in the high mountains of the Hindu Kush and Himalaya Synthesizes information on the physical geography and political cultural and economic implications of Southwest Asian transboundary water resources Offers a basic topographic description of the Indus River watershed Provides local water management information not easily available for remote and contentious border areas Delivers access to the newest thinking from chief personnel on both sides of the contentious border Features material developed from a series of new workshops funded by the Lounsbery Foundation and other granting agencies

Volcanic Processes in the Sedimentary Record A. Di Capua, R. De Rosa, G. Kereszturi, E. Le Pera, M. Rosi, S.F.L. Watt, 2023-04-18

Volcanoes and sedimentary systems are linked by a strong relationship The ascent and eruption of magma liberates large volumes of material through a variety of mechanisms to the surrounding environment with subsequent sediment input and transport influencing the evolution of that environment This connection between volcanism and adjacent sedimentary systems has long attracted the attention of geologists giving rise to an increasing body of academic research over the past three decades *Volcanic Processes in the Sedimentary Record* When Volcanoes Meet the Environment collects innovative works exploring how volcanoes and sedimentary systems interact moving from the processes directly associated with eruptive behaviour to the most distal sedimentary offshoots where volcanogenic particles are accumulated during or after volcanic activity In doing this different volcanic and environmental settings are explored travelling through space and time showing how volcanoclastic detritus is produced and dispersed by volcanic volcano sedimentary and sedimentary mechanisms via processes affecting development of volcanic edifices themselves through to the most distal depocentres

[Ecological Responses at Mount St. Helens: Revisited 35 years after the 1980 Eruption](#) Charles M. Crisafulli, Virginia H. Dale,2018-01-30 This book builds on existing work exploring succession disturbance ecology and the interface between geophysical and biological systems in the aftermath of the 1980 eruptions of Mount St Helens The eruption was dramatic both in the spatial extent of impacts and the range of volcanic disturbance types and intensities Complex geophysical forces created unparalleled opportunities to study initial ecological responses and long term succession processes that occur in response to a major contemporary eruption across a great diversity of ecosystems lowland to alpine forests meadows lakes streams and rivers These factors make Mount St Helens an extremely rich environment for learning about the ecology of volcanic areas and more generally about ecosystem response to major disturbance of many types including land management Lessons about ecological recovery at Mount St Helens are shaping thought about succession disturbance ecology ecosystem management and landscape ecology In the first five years after the eruption several syntheses documented the numerous intensive studies of ecological recovery The 2005 volume Ecological Responses to the 1980 Eruption of Mount St Helens Springer Publishing was the first ecological synthesis since 1987 of the scores of ecological studies underway in the area More than half of the world s published studies on plant and animal responses to volcanic eruptions have taken place at Mount St Helens The 25 year synthesis which generally included investigations i e data from 1980 2000 made it possible to more thoroughly analyze initial stages of ecological responses and to test the validity of early interpretations and the duration of early phenomena And

35 years after the eruption it is time for many of the scientists working in the first three decade post eruption period to pass the science baton to the next generation of scientists to work at Mount St Helens and a synt hesis a t this time of transfer of responsibility to a younger cohort of scientists will be an enormous asset to the continuation of work at the volcano
