Jaffa, David

Y. Hwang,2021-06-17 The adult critical care setting requires complex clinical decisions to be made that have a dramatic impact on the lives of patients and their families This textbook offers evidence based case histories around shared decision making providing practical advice to clinicians who are trying to navigate routine clinical scenarios in adult critical care Early chapters explore the definition of the shared decision making process and practical steps that aid its implementation The greater part of the book focuses on how shared decision making can be practiced in specific situations that are common in adult critical care highlighting the relevant knowledge base necessary to manage each situation Do not resuscitate and do not intubate orders ECMO and resolving conflicts regarding potentially inappropriate treatment are among the topics covered An essential resource for healthcare professionals working in critical care and those looking for a framework for the use of shared decision making in this setting The Advanced Practitioner in Acute, Emergency and Critical Care Sadie Diamond-Fox,Barry Hill,Sonya Stone,Caroline McCrea,Natalie Gardner,Angela Roberts,2023-12-11 The Advanced Practitioner in Acute Emergency and Critical Care Dedicated text for trainee and newly qualified Advanced Practitioners specialising in acute emergency and critical care Aligned with the Nursing and Midwifery Council NMC and the Health and Care Professions Council HCPC regulatory body requirements this formative text is the first of its kind covering a variety of key topics for advanced practitioners working in acute emergency and critical care Written by experienced advanced practitioners and academics closely involved in the delivery of both the clinical and academic components of advanced practice training programmes The Advanced Practitioner in Acute Emergency and Critical Care presents Complex decision making covering legal and ethical frameworks including patient safety communication skills and breaking bad news and end of life care Diagnosis and management of patients covering radiology principles of point of care ultrasound PoCUS laboratory tests and prescribing Resuscitation and first stage management of the critically unwell advanced resuscitation skills shock intra and inter hospital transfers and organ donation History taking physical examination and consultation models Learning support with accreditation considerations boxes clinical investigations examination scenarios pharmacology boxes pathological and psychological considerations social and cultural considerations case studies self assessment questions and more Utilising a multi professional and inclusive framework of advanced level practice this is an essential resource for all trainee and newly qualified advanced practitioners The text also serves as an excellent classroom aid for lecturers teaching advanced practice courses **Compelling Ethical Challenges in Critical Care and Emergency Medicine** Andrej Michalsen,Nicholas Sadovnikoff,2020-07-22 This book addresses the ethical problems that physicians have to face every day while caring for critically ill patients Advances in medical technology ageing societies worldwide and their increased demands on health care systems have on the one hand led to better care and remarkable longevity in many parts of the world On the other hand however improved treatments in many medical fields amongst others in emergency and critical care have resulted in more patients surviving with reduced quality of life This entails tradeoffs for many patients their families and the

teams caring for them At the same time health care expenditures have risen dramatically and have to be balanced against costs for other public goods Finally the humane aspects of care have often failed to keep pace with the remarkable technological strides made in recent years In this book experts in their respective fields describe compelling ethical challenges resulting from these discrepancies and discuss potential solutions The book is primarily intended for clinicians who care for two of the most vulnerable patient subpopulations those being treated in ambulances or emergency rooms and those being treated at intensive care units due in part to the fact that they may be temporarily or permanently incapacitated Core medical skills such as diagnosis and predicting outcomes as well as implementing treatment remain challenging However without adequate communication and collaboration both within the inter professional treatment teams and between the teams and the patients their families delivering excellent care is difficult at best Therefore the so called soft skills are given the attention they deserve in order to overcome the gap between technological progress and interpersonal standstill

Clinical Application of Artificial Intelligence in Emergency and Critical Care Medicine, Volume IV Zhongheng Zhang,Rahul Kashyap,Longxiang Su,Nan Liu,Qinghe Meng,2024-01-23 This Research Topic is the fourth volume of the series Clinical Application of Artificial Intelligence in Emergency and Critical Care Medicine Volume I Clinical Application of Artificial Intelligence in Emergency and Critical Care Medicine Volume I Volume II Clinical Application of Artificial Intelligence in Emergency and Critical Care Medicine Volume II Volume III Clinical Application of Artificial Intelligence in Emergency and Critical Care Medicine Volume III Analytics based on artificial intelligence has greatly advanced scientific research fields like natural language processing and imaging classification Clinical research has also greatly benefited from artificial intelligence Emergency and critical care physicians face patients with rapidly changing conditions which require accurate risk stratification and initiation of rescue therapy Furthermore critically ill patients such as those with sepsis acute respiratory distress syndrome and trauma are comprised of heterogeneous population The one size fit all paradigm may not fit for the management of such heterogeneous patient population Thus artificial intelligence can be employed to identify novel subphenotypes of these patients These sub classifications can provide not only prognostic value for risk stratification but also predictive value for individualized treatment With the development of transcriptome providing a large amount of

information for an individual artificial intelligence can greatly help to identify useful information from high dimensional data Altogether it is of great importance to further utilize artificial intelligence in the management of critically ill patients

Anaesthesia, Pain, Intensive Care and Emergency Medicine - A.P.I.C.E. A. Gullo,2004-12-07 In modern medicine the most functional methodologies are taking an increasing importance in spreading informations rendering it credible while at the same time using reliable data to focus interaction between basic science and clinical medicine Critical care medicine embraces these needs and more than any other discipline thrives and develops thanks to interdisciplinary contact APICE 2004 has been organised to provide precise answers to these issues In particular considerable emphasis has been given to the reviews regarding the most important aspects or the most significant clinical developments in the sectors involving variety of functions neurological respiratory and cardiovascular gastrointestinal metabolism and perfusion trauma infections sepsis and organ failure perioperative medicine and life support techniques information technology dedicated to clinical medicine but also as a means of information and education The contributing authors are all part of leading research groups at the international level in the various sectors presented in the volume **Intensive Care for Emergency Surgeons**
