Debating Modern Revolution Jack R. Censer,2016-02-11 Revolution is an idea that has been one of the most important drivers of human activity since its emergence in its modern form in the 18th century From the American and French revolutionaries who upset a monarchical order that had dominated for over a millennium up to the Arab Spring this notion continues but has also developed its meanings Equated with democracy and legal equality at first and surprisingly redefined into its modern meaning revolution has become a means to create nations change the social order and throw out colonial occupiers and has been labelled as both conservative and reactionary In this concise introduction to the topic Jack R Censer charts the development of these competing ideas and definitions in four chronological sections Each section includes a debate from protagonists who represent various forms of revolution and counterrevolution allowing students a firmer grasp on the particular ideas and individuals of each era This book offers a new approach to the topic of revolution for all students of world history

The Death of Sacred Texts Kristina Myrvold,2016-03-09 The Death of Sacred Texts draws attention to a much neglected topic in the study of sacred texts the religious and ritual attitudes towards texts which have become old and damaged and can no longer be used for reading practices or in religious worship This book approaches religious texts and scriptures by focusing on their physical properties and the dynamic interactions of devices and habits that lie beneath and within a given text In the last decades a growing body of research studies has directed attention to the multiple uses and ways people encounter written texts and how they make them alive even as social actors in different times and cultures Considering religious people seem to have all the motives for giving their sacred texts a respectful symbolic treatment scholars have paid surprisingly little attention to the ritual procedures of disposing and renovating old texts This book fills this gap providing empirical data and theoretical
