Disarmament and Decommissioning in the Nuclear Domain Jean-Claude Amiard, 2021-09-15 Following the acquisition of the atomic bomb by five states the United Nations began drafting several treaties to limit nuclear proliferation These efforts failed as four more states also acquired nuclear weapons In a similar vein an attempt to limit atomic weapons primarily within the two superpowers was initiated While the number of weapons has decreased the new bombs now being manufactured are more powerful and more precise negating any reduction in numbers In the field of civil nuclear use all nuclear facilities reactors factories etc have a limited lifespan Once a plant is permanently shut down these facilities must be decommissioned and dismantled These operations are difficult time consuming and costly In addition decommissioning generates large volumes of radioactive waste of various categories including long lived and high activity waste Risks to the environment and to health are not negligible during decommissioning The International Atomic Energy Agency IAEA and the Nuclear Energy Agency NEA of the Organisation for Economic Co-operation and Development OECD have produced numerous publications with recommendations Each state has its own decommissioning strategy immediate or delayed and final plan for the site whether it be returning it to greenfield status or obtaining a nuclear site license with centuries long

monitoring **Le désarmement et le démantèlement dans le domaine nucléaire** Jean-Claude Amiard, 2022-03-01 Le désarmement et le démantèlement dans le domaine nucléaire fait un point sur les devoirs des pays en matière de nucléaire et sur l'actualité de la situation actuelle et venir Plusieurs traités ont été signés aux Nations unies afin de limiter la prolifération nucléaire Ce fut un succès puisque quatre États supplémentaires se sont dotés de l'arme nucléaire Par ailleurs si le nombre d'armes a bien diminué en revanche les nouvelles sont plus puissantes et plus précises annulant ainsi les accords obtenus Toutes les installations nucléaires civiles et militaires arrivées en fin de vie doivent être mises à l'arrêt définitif et classées et démantelées mais ces opérations sont difficiles longues et coûteuses De plus le démantèlement génère de grands volumes de déchets radioactifs dont ceux à vie longue et haute activité aux risques environnementaux et sanitaires non négligeables Même si l'AIEA et l'OCDE AEN ont formulé des recommandations chaque État a sa propre politique dans sa stratégie et les conditions de démantèlement
