Characteristically American Joy Giguere,2014-06-30 Prior to the nineteenth century few Americans knew anything more of Egyptian culture than what could be gained from studying the biblical Exodus Napoleon s invasion of Egypt at the end of the eighteenth century however initiated a cultural breakthrough for Americans as representations of Egyptian culture

flooded western museums and publications sparking a growing interest in all things Egyptian that was coined Egyptomania. As Egyptomania swept over the West, a relatively young America began assimilating Egyptian culture into its own national identity, creating a hybrid national heritage that would vastly affect the memorial landscape of the nineteenth and twentieth centuries. Far more than a study of Egyptian revivalism, this book examines the Egyptian style of commemoration from the rural cemetery to national obelisks to the Sphinx at Mount Auburn Cemetery. Giguere argues that Americans adopted Egyptian forms of commemoration as readily as other neoclassical styles such as Greek revivalism, noting that the American landscape is littered with monuments that define the Egyptian style's importance to American national identity. Of particular interest is perhaps America's greatest commemorative obelisk, the Washington Monument. Standing at 555 feet high and constructed entirely of stone, making it the tallest obelisk in the world, the Washington Monument represents the pinnacle of Egyptian architecture's influence on America's desire to memorialize its national heroes by employing monumental forms associated with solidity and timelessness. Construction on the monument began in 1848 but controversy over its design, which at one point included a Greek colonnade surrounding the obelisk, and the American Civil War halted construction until 1877. Interestingly, Americans saw the completion of the Washington Monument after the Civil War as a mending of the nation itself, melding Egyptian commemoration with the reconstruction of America. As the twentieth century saw the rise of additional commemorative obelisks, the Egyptian Revival became ensconced in American national identity. Egyptian style architecture has been used as a form of commemoration in memorials for World War I and II, the civil rights movement, and even as recently as the 9/11 remembrances. Giguere places the Egyptian style in a historical context that demonstrates how Americans actively sought to forge a national identity reminiscent of Egyptian culture that has endured to the present day.

**Across the Bloody Chasm** M. Keith Harris, 2014-11-24. Long after the Civil War ended, one conflict raged on: the battle to define and shape the war's legacy. *Across the Bloody Chasm* deftly examines Civil War veterans' commemorative efforts and the concomitant and sometimes conflicting movement for reconciliation. Though former soldiers from both sides of the war celebrated the history and values of the newly reunited America, a deep divide remained between people in the North and South as to how the country's past should be remembered and the nation's ideals honored. Union soldiers could not forget that their southern counterparts had taken up arms against them, while Confederates maintained that the principles of states' rights and freedom from tyranny aligned with the beliefs and intentions of the founding fathers. Confederate soldiers also challenged northern claims of a moral victory, insisting that slavery had not been the cause of the war and ferociously resisting the imposition of postwar racial policies. M. Keith Harris argues that although veterans remained committed to reconciliation, the sectional sensibilities that influenced the memory of the war left the North and South far from a meaningful accord. Harris's masterful analysis of veteran memory assesses the ideological commitments of a generation of former soldiers weaving their stories into the larger narrative of the process of national reunification. Through regimental

histories speeches at veterans gatherings monument dedications and war narratives Harris uncovers how veterans from both sides kept the deadliest war in American history alive in memory at a time when the nation seemed determined to move beyond conflict *The Era of the Civil War--1820-1876* US Army Military History Research Collection,1974 New York State Library [annual Report] New York State Library,1879 From 1889 to 1918 the reports consist of the Report of the director and appendixes which from 1893 include various bulletins issued by the library Additions Bibliography History Legislation Library school Public libraries These including the Report of the director were each issued also separately

**Tangible Things** Laurel Thatcher Ulrich,Ivan Gaskell,Sara Schechner,Sarah Anne Carter,Samantha van Gerbig,2015-02-06 In a world obsessed with the virtual tangible things are once again making history Tangible Things invites readers to look closely at the things around them ordinary things like the food on their plate and extraordinary things like the transit of planets across the sky It argues that almost any material thing when examined closely can be a link between present and past The authors of this book pulled an astonishing array of materials out of storage from a pencil manufactured by Henry David Thoreau to a bracelet made from iridescent beetles in a wide range of Harvard University collections to mount an innovative exhibition alongside a new general education course The exhibition challenged the rigid distinctions between history anthropology science and the arts It showed that object centered inquiry inevitably leads to a questioning of categories within and beyond history Tangible Things is both an introduction to the range and scope of Harvard s remarkable collections and an invitation to reassess collections of all sorts including those that reside in the bottom drawers or attics of people s houses It interrogates the nineteenth century categories that still divide art museums from science museums and historical collections from anthropological displays and that assume history is made only from written documents Although it builds on a larger discussion among specialists it makes its arguments through case studies hoping to simultaneously entertain and inspire The twenty case studies take us from the Galapagos Islands to India and from a third century Egyptian papyrus fragment to a board game based on the twentieth century comic strip Dagwood and Blondie A companion website catalogs the more than two hundred objects in the original exhibition and suggests ways in which the principles outlined in the book might change the way people understand the tangible things that surround them **From Oligarchy to Republicanism** Forrest A. Nabors,2017-12-19 On December 4 1865 members of the 39th United States Congress walked

into the Capitol Building to begin their first session after the end of the Civil War They understood their responsibility to put the nation back on the path established by the American Founding Fathers The moment when the Republicans in the Reconstruction Congress remade the nation and renewed the law is in a class of rare events The Civil War should be seen in this light In From Oligarchy to Republicanism The Great Task of Reconstruction Forrest A Nabors shows that the ultimate goal of the Republican Party the war and Reconstruction was the same This goal was to preserve and advance republicanism as the American founders understood it against its natural existential enemy oligarchy The principle of natural equality justified American republicanism and required abolition and equal citizenship Likewise slavery and discrimination on the basis of color stand on the competing moral foundation of oligarchy the principle of natural inequality which requires ranks The effect of slavery and the division of the nation into two opposite systems of civilization are causally linked Charles Devens a lawyer who served as a general in the Union Army and his contemporaries understood that slavery's existence transformed the character of political society One of those dramatic effects was the increased power of slaveowners over those who did not have slaves When the slave state constitutions enumerated slaves in apportioning representation using the federal three fifths ratio or by other formulae intra state sections where slaves were concentrated would receive a substantial grant of political power for slave ownership In contrast low slave owning sections of the state would lose political representation and political influence over the state This contributed to the non slaveholders loss of political liberty in the slave states and provided a direct means by which the slaveholders acquired and maintained their rule over non slaveholders This book presents a shared analysis of the slave South synthesized from the writings and speeches of the Republicans who served in the Thirty Eighth Thirty Ninth or Fortieth Congress from 1863 1869 The account draws from their writings and speeches dated before during and after their service in Congress Nabors shows how the Republican majority charged with the responsibility of reconstructing the South understood the South Republicans in Congress were generally united around the fundamental problem and goal of Reconstruction They regarded their work in the same way as they regarded the work of the American founders Both they and the founders were engaged in regime change from monarchy in the one case and from oligarchy in the other to republicanism The insurrectionary states governments had to be reconstructed at their foundations from oligarchic to republican The sharp differences within Congress pertained to how to achieve that higher goal
