Literacy Techniques for Teachers and Parents Peter Edwards, 2003 The main aim of the book is to present 50 key literacy techniques for instructional purposes in outline and graphic form which preserve the essential elements of each technique. Literacy Techniques is designed to assist literacy instruction in four main ways:

- 1 The 50 literacy techniques represent a major knowledge base for individuals who need to develop effective teaching techniques in literacy.
- 2 The 50 literacy techniques have been carefully selected from a wide range of resources in the field. Most of the techniques are not available in a single publication.
- 3 The 50 literacy techniques act as an up date for individuals who are not currently aware of the latest instructional developments in the field.
- 4 The over 50 web sites provide access to an enormous amount of literacy resources that can be used in the classroom and in the home.

A major benefit of using the book is that it provides summaries of literacy techniques that can be quickly applied to a variety of learning situations. The book can be used by undergraduate and graduate students, by pre-service and practicing teachers as well as other caregivers involved in home schooling, family literacy or working as literacy volunteers. The techniques enable them to use interesting and valuable activities to strengthen and encourage their students to achieve their full learning potential. The literacy techniques are not intended for use solely with remedial readers. They include ideas suitable for use with primary, elementary, middle and high school students as well as with students requiring special assistance or acceleration in their programs. A wide variety of hands-on activities including the use of computer programs is a natural follow up to most of the techniques included in Literacy Technique For Teachers and Parents.

Twelve animal bakers are potential suspects, but Detective Duck uses his deductive reasoning skills to quack the case. After all, the thief left hairs behind, so the thief wasn't a bird. Follow along as he subtracts each suspect one at a time to reveal just who the culprit was. This clever story will have children of all ages giggling at the puns and the play on words.
