**Justice-based ethics** Chris Jones,2018-12-01 The book reflects academically on important and relevant ethical fields from a multidimensional South African context The book challenges conventional borders from different ethical theological philosophical economic and cultural perspectives with insight and expertise and seeks to add academic ethical value locally and globally with its different points of departure deeply embedded in justice From a mainly qualitative methodological perspective this scholarly book demonstrates that ethics requires analytical thinking and critical people who in an existentially and emancipatory way can help make the world a more just decent and humane place in which to live The authors who represent different academic and cultural backgrounds present in their respective chapters their research systematically intersectionally and constructivistically based on profound theoretical analysis and reasoning This epistemology results in an act of knowing that actively gives meaning and order to the reality to which it is responding By doing this they point out that people are in an ongoing process of becoming more human allowing ourselves and our fellow human beings to flourish and to reach fuller potential through justice based ethical reflection and action

**Routledge Handbook of Religion and Ecology** Willis J. Jenkins,Mary Evelyn Tucker,John Grim,2016-07-22 The moral values and interpretive systems of religions are crucially involved in how people imagine the challenges of sustainability and how societies mobilize to enhance ecosystem resilience and human well being The Routledge Handbook of Religion and Ecology provides the most comprehensive and authoritative overview of the field It encourages both appreciative and critical angles regarding religious traditions communities attitude and practices It presents contrasting ways of thinking about religion and about ecology and about ways of connecting the two

terms Written by a team of leading international experts the Handbook discusses dynamics of change within religious traditions as well as their roles in responding to global challenges such as climate change water conservation food and population It explores the interpretations of indigenous traditions regarding modern environmental problems drawing on such concepts as lifeway and indigenous knowledge This volume uniquely intersects the field of religion and ecology with new directions within the humanities and the sciences This interdisciplinary volume is an essential reference for scholars and students across the social sciences and humanities and for all those looking to understand the significance of religion in environmental studies and policy

**Religion and Dangerous Environmental Change** Dieter Gerten, 2010 Given the increasing threats of environmental changes to human societies it is imperative to complement technological and economical problem solutions with alternative perspectives from the humanities and the arts This pioneering book attempts to advance climate and environmental sciences by including religion as a microcosm of cultural response to environmental change The authors are renowned in disciplines as diverse as hydrology religious studies theology cultural studies philosophy and visual arts They exemplify how religion can contribute to sustainable mitigation of climate change and to creative adaption to its impacts thus preparing for a deep cultivation of research on religion in environmental change

**Water** Veronica Strang, 2015-04-15 As any scientist will tell you there is no substance more vital than water Our history is necessarily a history with water whether we have irrigated our fields with it cooled our machines washed ourselves drank it down deeply or even worshipped it In *Water* Veronica Strang ladles through the rich history of our interaction with water offering an accessible examination of the crucial properties that make water so unique alongside the complex story of our evolving relationship with it As Strang shows our attitudes about water and the things that we rely on it for have changed dramatically over time Once a mystical source of regenerative powers it has since played various roles as our attitudes about hygiene health and disease have developed as it has become useful to our industry as agriculture has become ever more complex and of course as we have learned to make money from it Today water who controls it and how is one of the largest issues facing our society influencing everything from the welfare of the billions of people living on earth to the vitality of its natural habitats Balancing history science and environmental and cultural studies Strang offers an important multi faceted view of a critical resource

*Water in World History* Ellen F. Arnold, 2024-10-22 This book takes a thematic approach to the global history of water covering a wide range of human interactions with water and the ways in which it carries both life and death Water is one of the most common and valuable natural resources for the survival of individual people and civilizations As the Anthropocene brings the unpredictable challenges of climate change population growth and global industrialization and urbanism issues of water scarcity and availability will be ever growing and both the presence and absence of water can be sources of far reaching disaster The book argues that a deeper understanding of water s history is essential for navigating these changes The chapters discuss water and religion floods and disasters water engineering and waterpower the history of

drinking water water parks and leisure the history of underwater exploration and the history of drought and water scarcity Each chapter is global in scope and is told over a broad chronology with complementary case studies Water in World History is an accessible introduction to water history and is an ideal resource for undergraduate students in environmental history and world history courses

**Seascapes: Shaped by the Sea** Mike Brown, Barbara Humberstone, 2016-04-01 Despite the fact that the sea covers 70 per cent of the Earth's surface and is integral to the workings of the world it has been largely neglected or perceived as marginal in modern consciousness This edited collection disrupts notions of the sea as other as foreign and featureless through specific situated accounts which highlight the centrality of the sea for the individuals concerned Bringing together academics who combine scholarly expertise with lived experiences on in and with the sea it examines humans relationships with the sea Through the use of auto ethnographic accounting the contributors reflect on how the sea has shaped their sense of identity belonging and connection They examine what it is to be engaged with the sea and narrate their lived sentient corporeal experiences The sea is a cultural seascape just as it is physical reality The sea shapes us and we in turn attempt to shape it as we construct various versions of it that reflect our on going and mutable relationship with it The use of embodied accounts as a way of conveying lived experiences and the integration of relevant theoretical frames for understanding the broader cultural implications provide new opportunities to understand seascapes

**Loving Waters Across Religions** McAnally, Elizabeth, 2019-02-20 McAnally presents an academically rigorous spiritually rich approach to the myriad global issues related to water The author draws from Christianity's sacramental consciousness of baptism loving service of the Yamuna River in Hinduism and the compassionate wisdom of the bodhisattva to develop an integral approach to water ethics Building on but distinct from the foundation laid by Christiana Zenner's Just Water this book is a welcome addition to the growing field of concern surrounding global water crises

*Living Water* Manitza Kotzé, Kobus van der Walt, 2023-02-23 Water will undoubtedly become an ever more crucial locus of academic reflection as Christiana Peppard's concern that wars of the future will be fought over water not oil 2014 stresses Increasing water shortages worldwide and global warming of water in particular the salt water of the oceans beg further reflection from natural and agricultural sciences the legal field and also from theology As a basic human right water is also closely connected to peace and justice issues This book is an interdisciplinary undertaking looking at water as a theological symbol in the fields of theology natural and agricultural sciences and law Providing reflections from a variety of disciplines within theology as well as from other disciplines such as natural sciences and law from the South African context this book makes a valuable contribution to knowledge in this field

How Water Makes Us Human Luci Attala, 2019-04-01 This book provides a novel cross disciplinary approach to water demonstrating the role water plays in shaping human lives It uses anthropological information about water in Kenya Wales and Spain to show how what water does in those areas has influenced the way that people can be with it

*Global Challenges in Water Governance* Jeremy J. Schmidt, Nathaniel Matthews, 2017-07-24 This

book presents a historically situated explanation of the rise of global water governance and the contemporary challenges that global water governance seeks to address. It is particularly concerned with connecting what are often technical issues in water management with the social and political structures that affect how technical and scientific advice affects decisions. Schmidt and Matthews are careful to avoid the pitfalls of setting up opposing binaries such as nature versus culture or private versus public, thereby allowing readers to understand how contests over water governance have been shaped over time and why they will continue to be so. Co-written by an academic and a practitioner, *Global Challenges in Water Governance* combines the dual concerns for both analytical clarity and practical applicability in a way that is particularly valuable both for educators, researchers, decision makers, and newcomers to the complexities of water use decisions. **The Right to Water** Farhana Sultana, Alex Loftus, 2013-10-18 The right to clean water has been adopted by the United Nations as a basic human right. Yet how such universal calls for a right to water are understood, negotiated, experienced, and struggled over remain key challenges. *The Right to Water* elucidates how universal calls for rights articulate with local historical, geographical, contexts, governance, politics, and social struggles, thereby highlighting the challenges and the possibilities that exist. Bringing together a unique range of academics, policy makers, and activists, the book analyzes how struggles for the right to water have attempted to translate moral arguments over access to safe water into workable claims. This book is an intervention at a crucial moment into the shape and future direction of struggles for the right to water in a range of political, geographic, and socio-economic contexts, seeking to be pro-active in defining what this struggle could mean and how it might be taken forward in a far broader transformative politics. *The Right to Water* engages with a range of approaches that focus on philosophical, legal, and governance perspectives before seeking to apply these more abstract arguments to an array of concrete struggles and case studies. In so doing, the book builds on empirical examples from Africa, Asia, Oceania, Latin America, the Middle East, North America, and the European Union. **Just Water** Zenner, Christiana, 2018-11-15 *Just Water* explores the necessity and availability of a supply of fresh water from the perspective of Christian ethics. This revised edition includes new data and updates on social developments related to water crises, as well as insights from Pope Francis's encyclical *Laudato Si* and a discussion of water justice from the perspective of the events at Standing Rock. **Choosing Our Religion** Elizabeth Drescher, 2016 In *Choosing Our Religion*, Elizabeth Drescher explores the diverse, complex spiritual lives of Nones across generations and across categories of self-identification as Spiritual, But Not Religious, Atheist, Agnostic, Humanist, just Spiritual, and more. **Water and Human Societies** David A. Pietz, Dorothy Zeisler-Vralsted, 2021-08-18 This book explores the historical relationships between human communities and water. Bringing together for the first time key texts from across the literature, it discusses how the past has shaped our contemporary challenges with equitable access to clean and ample water supplies. The book is organized into chapters that explore thematic issues in water history, including Water and Civilizations, Water and Health, Water and Equity, and Water and Sustainability. Each chapter is introduced by a

critical overview of the theme followed by four primary and secondary readings that discuss critical nodes in the historical and contemporary development of each chapter theme Further readings at the end of each chapter invite the reader to further explore the dynamics of each theme The foundational premise of the book is that in order to comprehend the complexity of global water challenges we need to understand the history of cultural forces that have shaped our water practices These historical patterns shape the range of choices available to us as we formulate responses to water challenges The book will be a valuable resource to all students interested in understanding the challenges of water use today **Pagan Portals - Sabrina** Brett Hollyhead,2025-04-29 Unveiling the mysteries lore and magic of the hidden Goddess of the Severn
