Deep Green Resistance Strategy To Save The Planet:

Deep Green Resistance Derrick Jensen, Aric McBay, Lierre Keith, 2011-01-04 For years Derrick Jensen has asked his audiences Do you think this culture will undergo a voluntary transformation to a sane and sustainable way of life No one ever says yes Deep Green Resistance starts where the environmental movement leaves off industrial civilization is incompatible with life Technology can't fix it and shopping no matter how green won't stop it To save this planet we need a serious resistance movement that can bring down the industrial economy Deep Green Resistance evaluates strategic options for resistance from nonviolence to guerrilla warfare and the conditions required for those options to be successful It provides an exploration of organizational structures recruitment security and target selection for both aboveground and underground action Deep Green Resistance also discusses a culture of resistance and the crucial support role that it can play Deep Green Resistance is a plan of action for anyone determined to fight for this planet and win

Earth at Risk Derrick Jensen, Lierre Keith, 2012-08-01 In America four hundred people own the wealth of more than half of the American population We should not be saying tax the rich but instead we should be saying take their money and redistribute it take their property and redistribute it Arundhati Roy Industrial civilization is devouring the planet and the future The oceans are acidifying whole mountains have been laid to waste and the climate is teetering into chaos Every biome is approaching collapse And fifty years of environmentalism hasn't even slowed the rate of destruction Yet environmentalists are not considering strategies that might actually prevent the looming biocide we are facing Until *Earth at Risk* *Earth at Risk* Building a Resistance Movement to Save the Planet is an annual conference featuring environmental thinkers and activists who are willing to ask the hardest questions about the seriousness of our situation The conference is convened by Derrick Jensen acclaimed author of *Endgame* who has argued that we need a resistance movement against civilization itself The twelve people in this volume present an impassioned critique of the dominant culture from every angle William Catton Jr explains ecological overshoot Thomas Linzey gives a fiery call for community sovereignty Jane Caputi exposes patriarchy's mythic dismemberment of the Goddess Aric McBay discusses historically effective resistance strategies and Stephanie McMillan takes down capitalism One by one they build an unassailable case that we need to deprive the rich of their ability to steal from the poor and the powerful of their ability to destroy the planet These speakers offer their ideas on what can be done to build a real resistance movement one that includes all levels of direct action action that can actually match the scale of the problem *Earth at Risk* includes Derrick Jensen author of *Endgame* A Language Older than Words and many others Lierre Keith author of *The Vegetarian Myth* Food Justice and Sustainability coauthor of *Deep Green Resistance Strategy to Save the Planet* Nora Barrows Friedman journalist and photographer correspondent for outlets such as *The Electronic Intifada* *Al Jazeera* and *Truthout.org* Jane Caputi author of *The Age of Sex Crime* *Gossips* *Gorgons* and *Crones* *The Fates of the Earth* and *Goddesses and Monsters* *Women Myth* *Power and Popular Culture* William Catton Jr sociologist author of *Overshoot* *The Ecological Basis of Revolutionary Change*

Abundant Earth Eileen Crist, 2019-02-08 In *Abundant Earth* Eileen Crist not only documents the rising tide of biodiversity loss but also lays out the drivers of this wholesale destruction and how we can push past them Looking beyond the familiar litany of causes a large and growing human population rising livestock numbers expanding economies and international trade and spreading infrastructures and incursions upon wildlands she asks the key question if we know human expansionism is to blame for this ecological crisis why are we not taking the needed steps to halt our expansionism Crist argues that to do so would require a two pronged approach Scaling down calls upon us to lower the global human population while working within a human rights framework to deindustrialize food production and to localize economies and contract global trade Pulling back calls upon us to free restore reconnect and rewild vast terrestrial and marine ecosystems However the pervasive worldview of human supremacy the conviction that humans are superior to all other life forms and entitled to use these life forms and their habitats normalizes and promotes humanity's ongoing expansion undermining our ability to enact these linked strategies and preempt the mounting suffering and dislocation of both humans and nonhumans *Abundant Earth* urges us to confront the reality that humanity will not advance by entrenching its domination over the biosphere On the contrary we will stagnate in the identity of nature colonizer and decline into conflict as we vie for natural resources Instead we must chart another course choosing to live in fellowship within the vibrant ecologies of our wild and domestic cohorts and enfolding human inhabitation within the rich expanse of a biodiverse living planet

EcoJustice Education Rebecca A. Ideology in a Global Age R. Soborski, 2013-06-11 This book challenges the popular view that established ideologies no longer make sense in today's globalizing world Considered from a broad historical perspective major ideological traditions have not become destabilized and incoherent by globalization but remain meaningful political beliefs that shape the globalization debate

Sustainability and Peaceful Coexistence for the Anthropocene Pasi

Heikkurinen,2017-08-17 The rapid industrialization of societies has resulted in radical changes to the Earth's biosphere and its local ecosystems. Climate scientists have recorded and forecasted worrying global temperature rises going back to the early twentieth century while biologists and palaeontologists have suggested that the next mass extinction is on its way if the current rate of species loss continues. To avert further ecological damage, excessive natural resource use and environmental deterioration are challenges that humanity must deal with now. The human species has had such a significant impact on the natural environment that the present geological epoch can be referred to as the Anthropocene, the age of humans. The blame and responsibility for the prevailing unsustainability, however, cannot be assigned equally to all humans. To analyse the root problems and consequences of unsustainable development as well as to outline rigorous solutions for the contemporary age, this transdisciplinary book brings together natural and social sciences under the rubric of the Anthropocene. The book identifies the central preconditions for social organization and governance to enable the peaceful coexistence of humans and the non-human world. The contributors investigate the burning questions of sustainability from a number of different perspectives including geosciences, economics, law, organizational studies, political theory and philosophy. The book is a state-of-the-art review of the Anthropocene debate and provides crucial signposts for how human activities can and should be changed.

Wrenched from the Land ML Lincoln,2020-04-01 *Wrenched from the Land* features sixteen interviews with some of the most iconic eco-warriors to put themselves on the line for their beliefs. The activists featured in this book are inspired by the late Edward Abbey, one of America's uncompromising and irascible defenders of wilderness. The book includes interviews with Terry Tempest Williams, the late Charles Bowden, Sea Shepherd Society founder Paul Watson, Jack Loeffler, Doug Peacock, Ingrid Eisenstadter, John De Puy, Bob Lippman, Derrick Jensen, Shonto Begay, Ken Sanders, Ken Sleight, the late Katie Lee, Executive Director of the Center for Biological Diversity, Kieran Suckling, Earth First! cofounder Dave Foreman, and climate activist Tim DeChristopher. Some were among Abbey's closest friends and were the inspiration for his irreverent comedic masterpiece *The Monkey Wrench Gang*. Here are mesmerizing stories about how they adapted Abbey's monkeywrenching ideas into a radical blueprint for direct action. Their achievements as ingenious and fierce as the individuals in this book will encourage readers to discover their own pathways toward positive change.

The Green Ghost Chad Weidner,2016-03-16 Weidner uncovers the ecological context of Burroughs's literary texts. Pushing the boundaries of ecocritical theory and practice, Weidner provides a fresh perspective on Burroughs and suggests new theoretical and methodological approaches to understanding the work of other Beat writers.

Philosophy as Practice in the Ecological Emergency Lucy Weir,2023-03-30 This book argues that philosophy is as practical as plumbing and what we need right now is what philosophers can offer as philosophers to help us all, our species and beyond, through this ecological emergency: this climate change, this Anthropocene. This book is about the meaning and purpose of philosophy as a way of a practice of responding to the ecological emergency which includes climate change, biodiversity loss, pollution, habitat destruction, and all

the associated impacts that fragment and threaten to create collapse among the systems that created and sustain us There are the related economic and social impacts the fragmentation of communities and political ideologies through attitude polarisation and the increasing threats to systems by those who seek to promote further exploitation at the expense of attempts to regain some system of cooperation and an attitude of compassion which is at the heart of our survival strategies as a species Philosophy has always sought to address questions related both to our place in the universe and to how to live given our understanding of our place Those of us committed to a philosophical life have used a range of metaphors and narratives to enlighten and to exhort to action those who would seek to understand what to do how and why Philosophy has played a key role in helping us as a species to respond to the ecological emergency What then is the practice of philosophy given that we are in an ecological emergency This question is the thread and it forms the framework for the dialogue that runs through the book
