**Why We Lie** David Livingstone Smith,2007-08-07 Deceit lying and falsehoods lie at the very heart of our cultural heritage Even the founding myth of the Judeo Christian tradition the story of Adam and Eve revolves around a lie We have been talking writing and singing about deception ever since Eve told God The serpent deceived me and I ate Our seemingly insatiable appetite for stories of deception spans the extremes of culture from King Lear to Little Red Riding Hood retaining a grip on our imaginations despite endless repetition These tales of deception are so enthralling because they speak to something fundamental in the human condition The ever present possibility of deceit is a crucial dimension of all human relationships even the most central our relationships with our very own selves Now for the first time philosopher and evolutionary psychologist David Livingstone Smith elucidates the essential role that deception and self deception have played in human and animal evolution and shows that the very structure of our minds has been shaped from our earliest beginnings by the need to deceive Smith shows us that by examining the stories we tell the falsehoods we weave and the unconscious signals we send out we can learn much about ourselves and how our minds work Readers of Richard Dawkins and Steven Pinker will find much to intrigue them in this fascinating book which declares that our

extraordinary ability to deceive others and even our own selves lies at the heart of our humanity      **Studying the Dead**

Nicholas G. Meriwether, 2013-07-11 Although academic study of the Grateful Dead began shortly after the group's formation the dramatic growth of scholarly literature only occurred after the band's formal retirement of the name in 1995 One major incubator of much of this work has been the Grateful Dead area of the Southwest Texas Popular Culture and American Culture Association Inaugurated as a separate section in 1998 and nicknamed the Grateful Dead Scholars Caucus it has produced almost three hundred papers over fifteen years nearly a third of which have been revised for publication Caucus presenters have also edited a dozen books and periodical volumes all of which have drawn on Caucus presentations some almost exclusively Studying the Dead The Grateful Dead Scholars Caucus provides an informal history of the Caucus and sketches its significance as a scholarly community focusing on its increasing self awareness its ability to span diverse disciplinary and theoretical perspectives and most of all its contribution to our understanding of the Grateful Dead phenomenon For the academy as a whole the Caucus is a fascinating model for the development of discourse communities from the role of orality to its interrogation of the texts that are derived from them Remarkable for its interdisciplinary dialogue the Caucus demonstrates how the nature of the art and the phenomenon that it studies can shape these discourses Though ostensibly aimed at scholars of the Grateful Dead others who will find this book of interest include students and teachers of popular culture as well as fans of the band      **Collaboration and Co-Creation in Museums, Heritage, and the Arts**

**The Leader's Brain** Bastiaan Heemsbergen,2004 In his new book Dr Heemsbergen shows that the best insights into leadership can come not from what leaders are thinking but from how leaders think The author suggests a fresh approach to how leaders can think and describes the necessary processes and tools required to improve the leader s capability in volatile and complex times Leveraging extensive research findings and observations the author makes some unexpected connections between brain research and how leaders think the artistic process our knowledge of the nonconscious and leadership development Heemsbergen a psychologist university lecturer and developer of leaders has developed new powerful metaphor tools from artistic practice and brain research to help leaders probe deeply into their perceptions thoughts and emotions and uncover those things that they don t even know they don t know There is much that goes on in the mind that we re not aware of and most of what influences what leaders say and do occurs below the water line of the iceberg at the nonconscious level That s why need new methods techniques and tools are required to get at what leaders don t know they know Leaders also need to develop a beginner s mind become better sensors and see things with fresh eyes Much of what leaders do in organizations is based on the idea of finding the right answer to a question Unfortunately it is often assumed there is only one right answer and we do not need to think about the topic further In real life much of what is known is in a state of flux waiting for a new bit of evidence to modify the knowledge To assist leaders in becoming more effective the author has developed methods and tools based on neuropsychology psychoanalysis and artistic practice He calls it the H SAT the Heemsbergen Sensory

Awareness Tools These tools assist in uncovering the mental models that guide leadership behavior illuminating leadership blindspots and improving leadership decision making capability Heemsbergen concludes the eye ear and body have been the most important tools for the gathering of information since the dawn of time Using time tested methods of artistic practice in combination with breakthroughs in brain research opens the possibility for uncovering hidden leadership talent to deal more effectively with a complex and volatile world     Unconscious cognition and perception David Livingstone Smith, John H.
